VOLUME I

Opening Statements:

"Cops Have 'NYPD Blue,' Doctors, 'ER.' Now Scientists Want a Show," <i>The Wall Street Journal</i> , March 20, 1996, page B1	5
The Honorable Dana Rohrabacher, Representative in Congress of the United States from the 45th District of California, and Chairman, Subcommittee on Energy and Environment	6
The Honorable Curt Weldon, Representative in Congress of the United States from the 7d District of Pennsylvania	10
The Honorable Eddie Bernice Johnson, Representative in Congress of the United States from the 30th District of Texas	11
The Honorable Harris W. Fawell, Representative in Congress of the United States from the 13th District of Illinois	11

Witnesses:

The Honorable D. James Baker, Under Secretary for Oceans and Atmosphere and Administrator, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Washington, DC.; accompanied by Dr. Elbert W. Friday, Jr., Director, National Weather Service	
Oral statement	12
Prepared testimony	17
The Honorable Joseph F. Vivona, Chief Financial Officer, U.S. Department of Energy, Washington, DC.; accompanied by Mr. Joseph J. Romm, Acting Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy; Mr. Ray A. Hunter, Deputy Director, Office of Nuclear Energy; Dr. James F. Decker, Deputy Director, Office of Energy Research; Dr. Clyde W. Frank, Deputy Assistant Secretary for Technology Development, Office of Environment Management; and Mr. Robert S. Kripowicz, Principal Deputy Assistant Secretary for Fossil Energy	
Oral statement	55
Prepared testimony	58
Insert for the record: Department of Energy Manpower Estimates	70
Insert for the record: FY97 DOE Budget Estimates; State and Laboratory Tables	84
The Honorable Robert J. Huggett, Assistant Administrator, Office of Research and Development, U.S. Environmental Protection Agency, Washington, DC	
Oral statement	314
Prepared testimony	319
"Strategic Plan for the Office of Research and Development," United States Environmental Protection Agency, Research and Development (8101), EPA/600/R-95/162, External Review Draft, November 1995	333
Insert for the record: Answer to the question, "What legislation or regula- tion can be cited as a direct result of EPA's research on indoor air?"	399
Insert for the record: Answer to the question, "To your knowledge, has EPA ever requested the authority to regulate indoor air quality in private homes?"	400
Insert for the record: Nitrates and nitrites	406
Insert for the record: DBPC, pesticide used on pineapples	407

Mr. Stephen A. Hubbs, Vice President, Louisville Water Company, Louisville, KY, testifying on behalf of the American Water Works Association	Page
Oral statement	385
Prepared testimony	388

APPENDIX 1—ADDITIONAL STATEMENTS FOR THE RECORD

Scott Sklar, Executive Director, Solar Energy Industries Association, Washington, DC.: "Fiscal Year 1997 Budget Authorization for Solar Energy (and Related) Programs of the U.S. Department of Energy"	414
Rear Admiral (Retired) Harley D. Nygren, Vienna, VA: "Concerning The Abolishment of The NOAA Corps"	426
Association of California Water Agencies, Washington, DC.: "Comments . . . on Drinking Water Program Research and Development Requirements"	431
Professor Neil E. Todreas Massachusetts Institute of Technology, Cambridge, MA: "Proposal for FY97 Budget of the Department of Energy: University Research Reactor Centers of Excellence"	439

VOLUME II

APPENDIX 2—PREHEARING QUESTIONS AND ANSWERS FOR THE RECORD

The Honorable D. James Baker, Under Secretary for Oceans and Atmosphere and Administrator, National Oceanic and Atmospheric Administration, U.S. Department of Commerce	
NOAA/Contractor Personnel	446
Support Service Contracts	462
Noncompetitive Awards	471
Noncompetitive Awards Made in Fiscal Year 1993	472
Noncompetitive Awards Made in Fiscal Year 1994	534
Noncompetitive Awards Made in Fiscal Year 1995	627

Support Service Contracts	2478
Noncompetitive Awards	2529
Consultants	2640
Trade Associations, Professional and Environmental Organizations	2641
Advisory Committees	2669
Technology Transfer/Industrial Partnerships	2669
Use of Prior Year Balances	2671
OMB Passback Process	2671
Global Change Research Program/Climate Change Action Plan	2672
Out-Year Funding Projections	2674

APPENDIX 3—FOLLOWUP QUESTIONS AND ANSWERS FOR THE RECORD

The Honorable D. James Baker, Under Secretary for Oceans and Atmosphere and Administrator, National Oceanic and Atmospheric Administration, U.S. Department of Commerce	
Questions from Chairman Rohrabacher:	
FY 1997 NPOESS Funding	2676
Funds Spent on NPOESS	2677
Run-Out of NPOESS Program	2677
Contracting Out Mapping and Charting	2677
Oceanographic and Fisheries Research	2678
Termination of NOAA Corps	2679
NOAA Corps vs. Civilian Employees	2679
IG Report on NWS Headquarters Staffing	2680
Privatization of Specialized Weather Services	2680
Closure of Weather Offices in FY 1997	2681
Out-Year Changes	2682
NRC Recommendations	2682
NEXRAD for Evansville, Indiana	2682
Vice-Presidential Support for Evansville, Indiana	2683
Questions from Congressman Baker:	
San Francisco Bay Demonstration Project	2686
Physical Oceanographic Real Time System (PORTS)	2686
Private Sector Involvement in San Francisco Bay Project	2687
Process for Involving Private Sector	2687
Contracting in Promote Safe Navigation	2688
Private Sector Involvement in Hydrographic Data	2688
Uniqueness of the National Ocean Service	2688
Mapping Services Contracts	2689

APPENDIX 2-PREHEARING QUESTIONS AND ANSWERS FOR THE RECORD

The Honorable Dr. D James Baker
 Under Secretary for Oceans and Atmosphere
 and
 Administrator, National Oceanic and Atmospheric Administration
 U.S. Department of Commerce
 Answers to Prehearing Questions

HEARING OF THE SUBCOMMITTEE ON ENERGY AND ENVIRONMENT
COMMITTEE ON SCIENCE
U.S. HOUSE OF REPRESENTATIVES

on

FY 1997 Request for DOE, NOAA, EPA and Safe Drinking Water R&D

Thursday, March 21, 1996

Prehearing Questions Submitted to

The Honorable Dr. D. James Baker
Under Secretary for Oceans and Atmosphere
U.S. Department of Commerce and Administrator
National Oceanic and Atmospheric Administration

NOAA/Contractor Personnel

- Q1. By location (city and state), please identify every NOAA office located in the United States or foreign countries. For each office for fiscal years 1995, 1996, and 1997, please provide the number of employees, the funding to maintain the office staff and office space, and the programmatic funding administered by each office.
- A1. The requested information is provided in the following table. Also attached are tables that provide additional information for the Office of NOAA Corps, the National Ocean Service, the National Weather Service, and for Oceanic and Atmospheric Research.

Organization City/State	FY 1995			FY 1996			FY 1997

National Weather Service	503	640	439
Total, NOAA	1,648.12	1,814.60	1,621.40

(1) The Figures given here for the Office of the Under Secretary for Oceans and Atmosphere include the following: UNDER SECRETARY, Assistant Secretary, Deputy Under Secretary, Executive Secretariat, Program Coordination Office, Office of the Chief Scientist, Office of Policy and Strategic Planning, Office of Legislative Affairs, Office of Public and Constituent Affairs, Office of International Affairs, and Office of Sustainable Development & Intergovernmental Affairs.

(2) NOAA Corps National Headquarters includes NC Headquarters personnel, the Commissioned Personnel Center.

(3) NOAA Corps contractor employee totals include U.S. Public Health Service (PHS) Medical Officers.

(4) The NOAA Corps Atlantic Marine Center includes ships and support personnel at Norfolk, VA; Pascagoula, MS; Woods Hole, MA, and Charleston, SC.

(5) The NOAA Corps Pacific Marine Center includes ships and support personnel at Seattle, WA; San Diego, CA; and Honolulu, HI.

(6) National Weather Service (NWS) Field Office figures include the following assumptions: (1) reflect estimates of Surface Observation Contracts and Upper Air Contracts; (2) FAA/NOAA Interagency Agreement is signed in May 1996 and will not affect the current transition plans; (3) no maintenance contracts are included; (4) contracts are negotiated by tasking level rather than man-level so that numbers shown are estimated. Also, the NWS does not budget at the field office or site level. Therefore, resource estimates can only be provided for the major organizational elements listed above.

Q4. Please provide the size of the public affairs offices maintained by NOAA Headquarters and by each NOAA operations, field, area, site or support office outside of Washington for each of fiscal years 1995, 1996 and 1997.

A4. The requested information is provided in the following table:

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION PUBLIC AFFAIRS

NOAA Public Affairs Offices City/State	FTE FY 1995	FTE FY 1996	FTE FY 1997

Support Service Contracts

- Q8. For each headquarters and field organization, please provide a list of all support service contracts including the cost of each contract and the program activity that funds each contract, the associated full-time employees, and the purpose for each contract. For each support service contract, please provide the average cost per employee.
- A8. The following contains lists of support service contracts, sorted by Line Office, for Fiscal Year 1995.

NOAA Support Service Contracts, by Line Office for FY 1995
(In \$)

Contract Number	Contractor	Purpose of Contract	Total Cost FY 1995	Program Activity	Associated Contractor Employees (FTEs)	Average Cost Per Contractor Employee

Noncompetitive Awards

Q9. For each of FY 1993-FY 1996 (to date), please provide a listing by Fiscal Year, of all NOAA noncompetitive awards of financial assistance and contracts. For each such noncompetitive award, please provide the following information:

Q9a. Identity, including address and contact, of each awardee;

Q9b. Description of work performed under the award;

Q9c. Rationale for the noncompetitive award; and

Q9d. Funding, including the source of funding.

A9. The requested information is provided in the following pages.

**FY 1993 Noncompetitive Awards of Financial Assistance:
National Oceanic and Atmospheric Administration**

FY 1993 NONCOMPETITIVE AWARDS OF FINANCIAL ASSISTANCE**NOTE:**

The rationale for the non-competitive awards of financial assistance is generally that no other organization is as well qualified to accomplish the project objectives. The rationale is not included in the database which generated the listing of NOAA's noncompetitive awards of financial assistance from 1993 to the present.

Consultants

Q10. For each of FY 1993-FY 1996 (to date), please provide a listing by Fiscal Year, of all NOAA consultants. For each such consultant, provide the following information:

Q10a. Identity;

Q10b. Description of work to be performed by the consultant;

Q10c. Rationale for using the consultant rather than relying on in-house of other existing contractor expertise; and

Q10d. Funding, including the source of funding.

A10.

FY 1993

- 1. Contractor Name:** **Hadley S. Depuy**
Address: 10750 Wynkoop Drive
 Great Falls, Virginia
Period: 1/27/93-intermittent
Funds: \$331.92/DAY at 75 days for \$24,894
Line Office: Office of Deputy Under Secretary

Description of work performed under the Contract: Planned and facilitated retreats and meetings for NOAA executive managers, providing guidance and techniques for coping with and managing through conditions of change.

Rationale: Individual was hired to perform these duties as a consultant based on the individual's extensive background and expertise in the above areas and on the individual's intimate knowledge of NOAA and its missions and programs. No in-house or other existing contractor expertise were sufficient to perform these functions at that time.

- 2. Contractor Name:** **John K. Bullard**
Address: 14th and Constitution Ave., N.W. Rm 5222
 Washington, D.C. 20230-0001
Period: 9/13/93-9/13/94
Funds: \$331.92/DAY at 75 days for \$24,894
Line Office: Office of Under Secretary

Description of work performed under the Contract: Provide advice and counsel to Assistant Secretary for Oceans and Atmosphere on all matters dealing with sustainable development of environmental and living resources, in particular where matters entail Federal/State/local government relationships.

Rationale: Individual was hired temporarily on a consultant basis pending completion of paperwork for appointment to a non-career SES position.

3. **Contractor Name:** **Roan Conrad**
 14th and Constitution Ave., N.W. Rm 5222
 Washington, D.C. 20230-0001
Period: 10/4/93-1/17/94
Funds: \$331.92/DAY at 75 days for \$24,894
Line Office: Office of Under Secretary

Description of work performed under the Contract: Provide advice and counsel to Assistant Secretary for Oceans and Atmosphere on all matters dealing with sustainable development of environmental and living resources, in particular where matters entail Federal/State/local government relationships.

Rationale: Individual was hired temporarily on a consultant basis pending completion of paperwork for appointment to a non-career SES position.

4. **Contractor Name:** **Jeffrey Benoit**
Address: 1305 East West Highway, Rm 11523
 Silver Spring, MD 20910-3281
Period: 10/21/93-2/3/94
Funds: \$331.92/DAY at 75 days for \$24,894
Line Office: National Ocean Service

Description of work performed under the Contract: Provide advice and counsel to Assistant Secretary for Oceans and Atmosphere on all matters dealing with sustainable development of environmental and living resources, in particular where matters entail Federal/State/local government relationships.

Rationale: Individual was hired temporarily on a consultant basis pending completion of paperwork for appointment to a non-career SES position.

FY 1994

1. **Contractor Name:** **Ellsworth C. Fullerton**
Address: National Marine Fisheries Service
 c/o Assistant Administrator for Fisheries
 1315 East West Highway
 Silver Spring, MD 20910
Period: March 8 - April 30, 1994
Funds: \$402.68/DAY at 41 days for \$16,510
Line Office: National Marine Fisheries Service

Description of work performed under the Contract: Worked as interim Director of NMFS Office of Enforcement (SES position). Served as principal source of advice and guidance to NOAA on NMFS enforcement matters.

Rationale: Mr. Fullerton provided leadership in this high priority area during this interim period; after his departure detailees were rotated into the position.

2. **Contractor Name:** **Ann M. James**
Address: 14th and Constitution Ave., N.W. Rm 5222
 Washington, D.C. 20230-0001
Period: 8/24/94-9/30/94
Funds: \$195.93/Day for 30 days for \$5,877.90
Line Office: Office of the Under Secretary

Description of work performed under the Contract: Planned and organized a national teleconference on sustainable communities.

Rationale: Individual was hired to perform these duties as a consultant based on the individual's extensive background and expertise in the above areas. No in-house or other existing contractor expertise were sufficient to perform these functions at that time.

FY 1995

1. **Contractor Name:** **Jeffrey R. Pike**
 1306 Calvin Forest Drive
 Vienna, VA 22182
Period: 4/2/95-9/30/95
Funds: \$386.56/Day at 48 days for \$18,555
Line Office: Office of Sustainable Development and Intergovernmental Affairs

Description of work performed under the Contract: Designed and developed emergency pilot vessel buyout program for Northeast fishing industry in cooperation with National Marine Fisheries Service and Members of Congress.

Rationale: Individual was hired to perform these duties as a consultant based on the individual's extensive background and expertise in the above areas. No in-house or other existing contractor expertise were sufficient to perform these functions at that time.

FY 1996

1. **Contractor Name:** **Jeffrey R. Pike**
Address: 1306 Calvin Forest Drive
 Vienna, VA 22182
Period: 10/01/95-3/16/96
Funds: \$386.56/Day at 60 days for \$23,194
Line Office: Office of Sustainable Development and Intergovernmental Affairs

Description of work performed under the Contract: Designed and developed emergency pilot vessel buyout program for Northeast fishing industry in cooperation with National Marine Fisheries Service and Members of Congress.

Rationale: Individual was hired to perform these duties as a consultant based on the individual's extensive background and expertise in the above areas. No in-house or other existing contractor expertise were sufficient to perform these functions at that time.

Trade Associations, Professional and Environmental Organizations

Q11. Please provide the NOAA funding (including funding source) for each of FY 1993 through FY 1996 (to date) of trade associations and professional, environmental or other organizations. For each such trade association/professional, environmental or other organization, provide the following information:

Q11a. Identity;

Q11b. Description of work performed by the trade association/professional, environmental or other organization;

Q11c. Whether or not the funds were awarded on a competitive basis; and if not, the rationale for a noncompetitive award.

A11. The requested information follows. *[Note: NOAA did not provide either the amount of funding or the funding source for many of the listed financial awards.]*

NOAA Funding of Trade Associations, Professional and Environmental Organizations: FY 1993-FY 1997

Name/Address/ Other Information	Description	Competitive Award	Rationale for Noncompetitive Award
FY 1993			
Center for Marine Conservation, Inc. Washington, DC	Coastal cleanup campaign	No	Recipient uniquely qualified to conduct volunteer coastal cleanup nationwide
Center for Marine Conservation, Inc. Washington, DC	California Sanctuary Cooperating Association Project	No	Recipient best qualified to provide required services
National Fish and Wildlife Foundation Washington, DC	Study of proposed National Marine Sanctuary Foundation and Learning Center	No	Recipient best qualified to provide required services
Sport Fishing Institute Washington, DC	A proposal to determine the effects of fishery regulations on marine sport fishing community	No	Recipient best qualified to determine effects of fishery regulations on sport fishing community

Name/Address/ Other Information	Description	Competitive Award	Rationale for Noncompetitive Award
FY 1993 (Continued)			
The Nature Conservancy Arlington, VA	Cooperative volunteer & outreach program	No	Recipient's highly successful program has greatly benefited the sanctuary and the public. Their unique volunteer and outreach programs and acceptance by the public makes them the only entity capable of providing this service.
American Meteorological Society Boston, MA	Support for master precollege teachers workshop	No	No other organization is comparably prepared to authenticate the scientific technical content of a teaching laboratory experience
The Environmental Careers Organization Boston, MA	Transfer of technical knowledge of NOAA's oil spill and hazmat expertise	No	Recipient is the only national nonprofit organization placing recent college graduates into such educational experiences in the environmental field
Undersea and Hyperbaric Medical Society Bethesda, MD	Preparation & dissemination of bibliographical material relating to diving physiology and hyperbaric medicine	No	Recipient is uniquely qualified in areas of diving physiology and hyperbaric medicine
North Atlantic Salmon Conservation Organization Edinburgh, Scotland	Atlantic Salmon Tag rewards	No	North Atlantic Salmon Treaty Obligation
The Nature Conservancy Arlington, VA	Site characterization of Florida Keys National Marine Sanctuary	No	Recipient's highly successful program has greatly benefited the sanctuary and the public. Their unique volunteer and outreach programs and acceptance by the public makes them the only entity capable of providing this service.
50WCNF306098 Dolphin Biology Research 708 Tropical Circle Sarasota, FL 34242 Contact: Patsy Willins Amount: \$34,993.00 Line Office: NMFS, Miami, FL Appropriation: 3FN2400,8L1A3A00	Monitoring bottle-nose dolphin population.	No	Urgency

Advisory Committees

Q12. Please provide a list of advisory committees, a description of each, and the amount budgeted for each in fiscal years 1995, 1996 and 1997, the source of the funding for each, and the work product or products of each.

A12. The requested information follows.

1. Modernization Transition Committee (MTC)

Description (Mission/Purpose): Mandated by PL. 102-567, the Modernization Transition Committee is responsible for reviewing any proposed certification under section 706 of PL. 102-567 and any proposed certification where there is a serious possibility of degradation of services. The MTC may prepare reports evaluating proposed certifications based on the modernization criteria with respect to the requirement there will be no degradation of services to the Secretary.

The MTC advises the Secretary and Congress on the implementation of the strategic plan and the establishment and implementation of modernization criteria. The MTC will also advise the Secretary and Congress on all matters of public safety which relate to the modernization.

Amount Budgeted for:

FY 1995 = \$876,000
FY 1996 = \$876,000
FY 1997 = \$0

Source of Funding: Appropriations

2. Marine Fisheries Advisory Committee (MAFAC)

Description: To advise the Secretary of Commerce on Living Marine Resources. MAFAC develops national fisheries policies and programs on living marine resource matters to meet the needs of commercial and recreational fishermen, environmental, state, consumer, academic, and other national interest groups.

Amount Budgeted for:

FY 1995 = \$128,000
FY 1996 = \$128,000
FY 1997 = \$145,000

Source of Funding: Discretionary Funds

3. National Sea Grant Review Panel

Description (Mission/Purpose): NOAA's Office of Oceanic and Atmospheric Research funds an advisory committee for the National Sea Grant College Program known as the Sea Grant Review Panel. The panel advises the Secretary of Commerce, the Under Secretary

for Oceans and Atmosphere, and the Director of the National Sea Grant Program on matters pertaining to the Program, including:

- (1) applications or proposals, and performance under, grants and contracts awarded under this program;
- (2) the sea grant fellowship program;
- (3) the designation and operation of sea grant colleges and sea grant regional consortia, and the operation of sea grant programs;
- (4) the formulation and application of planning guidelines and priorities; and
- (5) other matters that the Secretary may refer to the panel for review and advice.

The Sea Grant Review Panel consists of 15 voting members appointed by the Secretary and two non-voting members (the Director of the National Sea Grant Program and a director of a sea grant program who is elected by the various sea grant directors).

A list of typical advisory documents (work products) produced by the Sea Grant Review Panel is given below:

- (1) Management of the Sea Grant College Program
- (2) Strategic Management
- (3) Sea Grant/Industry Relationships
- (4) Recertification of Sea Grant College Status
- (5) Costs of Panel Operations
- (6) Toward a Strategic Road map for Sea Grant
- (7) Geographic Concentration and Number of Sea Grant Entities
- (8) Evaluating Proposals and Allocating resources
- (9) NRC/OSB Critique of Panel
- (10) Role and Responsibility of Panel
- (11) Aspirations for Sea Grant in the 21st Century
- (12) Improving Sea Grant's Partnership with Business and Industry

Amount Budgeted for: FY 1995 = \$140,000
 FY 1996 = \$140,000
 FY 1997 = \$180,000

Source of Funding: Appropriation (National Sea Grant College Program)

4. Monterey Bay National Marine Sanctuary (NMS) Sanctuary Advisory Council (SAC)

Description (Mission/Purpose): This SAC provides a strong link to the communities of the sanctuary region. It consists of twenty voting members representing state, federal government agencies; business, industry, tourism, recreation, academic and conservation groups.

Amount Budgeted for: FY 1995 = \$25,000
 FY 1996 = \$20,000
 FY 1997 = \$20,000

Source of Funding: Appropriation

5. Olympic Coast NMS SAC

Description (Mission/Purpose): This SAC provides a strong link to the communities of the sanctuary region. It was established in November 1995 and met for the first time in January 1996. It consists of 15 members representing tribal, State, Federal government agencies; business, marine industry, tourism, recreation, research, education and conservation groups.

Amount Budgeted for: FY 1995 = \$0
 FY 1996 = \$10,000
 FY 1997 = \$10,000

Source of Funding: Appropriation

6. Florida Keys NMS SAC

Description (Mission/Purpose): This SAC has had a strong role in the development of the draft Sanctuary Management Plan. The SAC consists of 22 members representing diving, fishing, boating, research, education, environmental groups and private citizens.

Amount Budgeted for: FY 1995 = \$15,000
 FY 1996 = \$10,000
 FY 1997 = \$10,000

Source of Funding: Appropriation

Technology Transfer/Industrial Partnerships

Q13. Please describe all the instruments used by NOAA to share the cost of programs with industry, including contracts, cooperative agreements, Cooperative Research and Development Agreements (CRADAs), cost-shared contracts, personnel exchanges, Small Business Innovation Research (SBIR) and Small Business Technology Transfer Pilot (STTR) Program grants, technical assistance, user facilities, etc. Please provide the funding by program for fiscal years 1995, 1996, and 1997 for each funding mechanism.

A15.

I. (ORTA/SBIR and Sea Grant)

The Small Business Innovation Research (SBIR) Program (P.L. 102-564) is funded through a set-aside of 2 percent of the NOAA extramural R&D budget, thus no monies are directly budgeted for the program. SBIR uses small technology companies to address identified NOAA R&D needs. The program is unique in that it enables NOAA to obtain both innovative solutions and expert scientific and engineering assistance in solving its R&D problems. These businesses employ consultants with international reputations and subject specialties from non-NOAA disciplines. NOAA also derives indirect benefits from the specialized facilities, laboratories and equipment that these small companies employ in their R&D efforts. To some extent, this program constitutes a "privatization" of identified NOAA R&D requirements. The funding levels for NOAA's SBIR Program for Fiscal Years 1995, 1996, and 1997 are:

FY 1995 = \$1,588,200

FY 1996 = \$1,653,000

FY 1997 = undetermined to date

In addition, NOAA/OAR funds a 50/50 cost sharing program with industry under the National Sea Grant College Program known as the Sea Grant Industrial Fellows Program. Funding levels for Fiscal Years 1995, 1996, and 1997 are:

FY 1995 = \$100,000

FY 1996 = \$190,000

FY 1997 = \$240,000

II. Joint Institute Program

The Environmental Research Laboratories (ERL) Joint Institute Program was established to enhance research between ERL and the academic community. This includes research on such subjects as: long term effects of greenhouse gases; El Nino Southern oscillation and its effects on the weather and climate; long term climate variability, the understanding of fishery recruitment variability; and other studies involved with the oceans and inland waters, the atmosphere, inter-mountain west, the Arctic and the solar-terrestrial environment.

Funding for the Institutes comes from many sources. These amounts come from other Federal Agencies and come NOAA/ERL through formal fiscal arrangements. NOAA cannot commit these funds until they are in hand. The Joint Institute's fiscal year is July-June of each year while the federal government's fiscal year is October-September. Funding is received sporadically and becomes available throughout both of these fiscal years.

The OAR/ERL Joint Institutes are as follows:

CIASTA (Cooperative Institute for Atmospheric Sciences and Terrestrial Applications) - Desert Research Institute (DRI)/University and Community College System of Nevada (UCCSN)

CIPAR (Cooperative Institute for Arctic Research) - University of Alaska

CILER (Cooperative Institute for Limnology and Ecosystems Research) - University of Michigan

CIMAS (Cooperative Institute for Marine and Atmospheric Studies) - University of Miami

CIMMS (Cooperative Institute for Mesoscale Meteorological Studies) - University of Oklahoma

CIRA (Cooperative Institute for Research in the Atmosphere) - Colorado State University

CIRES (Cooperative Institute for Research in Environmental Sciences) - University of Colorado

JIMAR (Joint Institute for Marine and Atmospheric Research) - University of Hawaii

JISAO (Joint Institute for the Study of the Atmosphere and Oceans) - University of Washington

III. National Academy of Sciences, National Research Council NOAA Resident Research Associates Program

The National Research Council's (NRC) Resident Research Associateships Program was established in 1954 under a Presidential Executive Order that directed the National Academy of Sciences (NAS) to serve government agencies in accomplishing scientific missions of national interest. The NOAA/NRC Program evolved in 1970 and is one of thirty Federal agencies participating in the Resident Research Associateships Program. The objectives of the Program are to provide opportunities for research for postdoctoral scientists of unusual promise and ability to work on problems that are compatible with the interests of NOAA. The Office of Atmospheric Research, Environmental Research Laboratories conducts this program for NOAA.

As a Congressionally-chartered organization which serves as an independent advisor to the Federal government on scientific matters, the Academy uniquely exemplifies the highest level of competence and expertise. Their established stringent review processes and distinguished panel and committee members ensures technical integrity for NOAA's Program.

FY 1995 (3/1/94-2/28/95) = \$1,940,860 ACTUAL

FY 1996 (3/1/95-2/29/96) = \$1,966,360

FY 1997 (3/1/96-2/28/97) = \$1,933,520 PROJECTED

Q14. Please provide a complete listing of all NOAA-funded CRADAs including, for each, current-year (FY 1996) funding and out-year funding requirements to complete the agreement.

A14. (ORTA and ERL): NOAA's Office of Research and Technology Applications (ORTA) provides agency-wide assistance for the development of Cooperative Research and Development Agreements (CRADAs). P.L. 99-502, the authorizing legislation, does not permit NOAA to expend funds under these agreements. The following is a list of NOAA's CRADAs:

1. Since March of 1991, two of NOAA's environmental research laboratories, the Aeronomy Laboratory and the Environmental Technology Laboratory, have had a CRADA with Radian Electronics Division, LLC of Austin, Texas and Boulder, Colorado, and with Sonoma Technology, Inc. of Santa Rosa, California, to develop a commercial wind and temperature microwave radar measurement system that provides reliable vertical profiles (i.e., from the surface up to a few kilometers) of air temperature as well as horizontal and vertical wind velocity. This CRADA has recently been extended for an additional five-year period. Under this agreement, the private sector partners pay a commission of six percent to the government on the sale of each unit.
2. Beginning in June of 1994, NOAA's National Ocean Service entered into an agreement with the NAVSYS Corporation to conduct cooperative research and

development that will lead to the utilization of GPS data in a commercial service for vehicle location in emergency and road hazard situations.

3. In August of 1994, the National Ocean Service's Marine Chart Division and BSB Electronic Charts, Inc. began cooperative R&D on electronic charts in order to make them commercially available as digital raster files and to develop the necessary software to make and use the electronic charts.

Use of Prior Year Balances

Q15. What are the FY 1997 levels of prior year balances, by NOAA appropriation account, that NOAA proposes to be used as offsets to the FY 1997 budget request?

A15. The FY 1997 President's budget for NOAA assumes that there will be no prior year unobligated balances. NOAA expects to obligate all funds which are available in FY 1996.

Q16. For those prior year balances identified in the response to question 15 above, please identify the source of those prior year balances by program/project/ activity.

A16. See the answer to questions #15.

OMB Passback Process

Q17. In NOAA's formal FY 1997 budget request to Congress, please identify all FY 1997 funding increases and decreases to NOAA's initial FY 1997 budget request submitted to OMB.

A17. The requested information is provided in the following tables:

U.S. Global Change Research Program/Climate Change Action Plan

Q18. Please provide a complete listing of all NOAA programs/projects included in the U.S. Global Change Research Program, coordinated by the National Science and Technology Council's Committee on Environment and Natural Resources, including, for each:

Q18a. A brief description.

A18a. Descriptions of these Climate and Global Change Program elements follow:

RESEARCH ELEMENTS: The Climate and Global Change Program is comprised of eleven research elements, each focusing on a specific aspect of climate variability. While each basic research element is highly focused, the elements coordinate activities and jointly support the development of a predictive understanding and assessment of climate variability from seasons to a century. The following paragraphs provide a brief description of each contributing research element in the integrated Program.

Climate Dynamics and Experimental Prediction: The Climate Dynamics and Experimental Prediction (CDEP) project is taking the next steps beyond proposal-driven research to establish a program for quantitative predictions and reliable assessments of global climate change and its regional implications on time scales of seasons to a century. In a program of applied research, CDEP is employing predictive models as the central integrator for improving insight into the Earth's climate system behavior. CDEP initially focuses on prediction of seasonal-to-interannual climate fluctuations and will shift to longer and longer time scales as forecast skill is manifested. The case for the initial focus on short term climate is strong: it can be done now; its regional impacts have been identified; and routine forecasts have immediate social and economic benefits. The understanding and confidence gained at the shorter time scales will accelerate progress towards projections and predictions of longer time scale climatic variations. Important lessons will be learned about: (1) the required partnerships between government, university, and private institutions that are required for the implementation of routine forecast systems; (2) the routine observing system enhancements that are needed for initialization and verification of forecasts, and (3) the development of practical social and economic applications. Finally, it is becoming apparent that longer-term climate change will likely be manifested in the character and frequency of occurrence of the shorter term natural variability.

Climate Observations: The Climate Observations (CO) element is central to describing, understanding, and predicting variations in the climate system. It focuses on sustaining the long-term measurements of selected climate variables, on developing ways to better utilize the data from selected existing operational data streams for climate products, and on synthesizing, analyzing and interpreting the data sets. Activities include a diverse set of projects involving ground- and satellite-based observations of the ocean, atmosphere, and land surface. Current CO

activities include deep ocean moorings, instrumented buoys, sea level gauging stations, instruments carried by volunteer observing ships, and a land-surface radiation measurement network. CO also supports projects to utilize measurements made by other observing systems, especially satellites, for climate purposes.

Climate Change Data and Detection: The Climate Change Data and Detection (CCDD) element ensures that the data needed to understand the climate system is available for analysis. The data and resultant products extend the existing long-term climate record and serve as essential input to predictive models. In addition, CCDD provides support for documenting variations in climate on time scales ranging from less than one year to periods of 100 years and longer. Support is also provided for the analysis of observed climate variations and changes to identify causes that are consistent with Earth's long-term climate history.

Atmospheric Chemistry: The Atmospheric Chemistry program seeks to understand the chemical and radiative processes associated with trace chemicals in the atmosphere. Both endeavors are goals of both the International Geosphere-Biosphere Program (IGBP) and World Climate Research Program (WCRP), to which NOAA is contributing in major ways. Global measurements, laboratory studies, and theoretical modeling provide the sound science necessary to understand the stratospheric ozone layer and the role of the atmosphere in the physical climate system. As we enter the period of maximum anticipated ozone depletion, continued monitoring of the ozone layer and its anticipated recovery in coming decades is essential to ensure that our predictions are borne out. For example, observations of the declining growth rate of the chlorofluorocarbons (CFCs) confirm that past decisions to curtail their emissions are, indeed, leading to a safer atmosphere. Process studies, identifying ozone-friendly alternatives to the CFCs, are especially valuable to industry. For example, recent studies have demonstrated the safety of the substitute proposed for use in automobile air conditioners. Related studies are providing the scientific basis for assessing the ozone impacts of methyl bromide use for agricultural fumigation, and the use of high-speed airplanes for civil aviation. Ongoing climate-related studies include (i) observations of the trends of chemically-active trace gases (such as methane and nitrous oxide) and aerosols whose presence alters the radiative budget of the Earth, (ii) characterization of the chemical processes that create or destroy those substances in the atmosphere, and (iii) elucidation of the effect of ozone-layer changes on the radiation budget, all of which are required for a full predictive understanding of the Earth's climate system.

Program on Climate Variability and Predictability (CLIVAR): The CLIVAR program is divided into the Global Ocean-Atmosphere-Land System (GOALS) Program, which concentrates on seasonal-interannual time scales, and the Atlantic Climate Change Program (ACCP), which focuses on decadal-centennial climate change issues.

Global Ocean-Atmosphere-Land System (GOALS): The GOALS program builds upon the successful El Nino research of the recently completed Tropical Ocean-Global Atmosphere (TOGA) program. While TOGA made possible our ability to

forecast El Nino up to a year in advance with useful skill, the forecasts are limited in that they focus on the evolution of the tropical Pacific and its related climate impacts. Forecast skill is highest in the tropics, near the source of El Nino and diminishes at higher latitudes (e.g., over North America) where other processes may play a greater role. GOALS is designed to continue research necessary for continuous improvements of El Nino predictions and to extend predictability of climate fluctuations beyond the tropical Pacific to include the effects of the other tropical oceans, higher latitude oceans, and land surface processes on seasonal-to-interannual climate variability, particularly at higher latitudes. Together with NOAA's GEWEX program, GOALS has initiated a North American Precipitation Study which represents the only concentrated U.S. research effort to improve models for forecasting seasonal-to-interannual precipitation anomalies like those in the Midwest in 1993 and this winter in California, seasons to years in advance.

Atlantic Climate Change Program (ACCP): Following up on the results of both climate models and studies of historical data, ACCP is designed to determine the sensitivity of the global climate system to long-term variability in Atlantic Ocean circulation patterns and air/sea heat exchange. Recent studies suggest that changes in the strength of the Gulf Stream and heat content of the upper ocean are associated with changes in atmospheric temperature and wind patterns over the last few decades. Over even longer time scales, changes in the deep Atlantic circulation appear tied to abrupt climate change observed in earlier periods of the Earth's history. Thus the Atlantic appears intimately tied to the patterns of temperature and precipitation change in the Northern Hemisphere. For these reasons, a field experiment in the Atlantic focusing on its role in the climate system is being planned for 1997-98. This is being undertaken in partnership with the National Science Foundation and a number of European nations.

Ocean-Atmosphere Carbon Exchange Study (OACES): The goal of the OACES is to gain a predictive understanding of the magnitude of the atmospheric carbon dioxide (CO₂) that is ultimately dissolved in the ocean and removed from the atmosphere for a period of time. OACES conducts high quality oceanic and atmospheric measurements that are used to document the quantity of CO₂ absorbed in the ocean's interior. These observations are incorporated into ocean-atmosphere models in order to provide an accurate scientific tracking of the fate of atmospheric CO₂.

Human Dimensions: The Human Dimensions program coordinates the Climate and Global Change Program's broader multidisciplinary effort to conduct end-to-end assessments which require integration of basic research on Earth system processes with that on social processes, vulnerability analysis, and adaptation strategies. The conduct of integrated assessments requires support of research in the social sciences to expand understanding of the relationship between human activity and environmental change. Given the breadth of this field of study, the program concentrates its research efforts in the area of climate-human interactions, undertaking as a priority the study of interactions on seasonal-to-interannual time scales in order to capitalize on recent achievements in climate prediction and pursue

the affinity between this time scale and decision-making time horizons for mitigation of impacts associated with flood and drought emergencies, resource management, and agricultural practices.

Global Energy and Water Cycle Experiment (GEWEX): GEWEX is the major companion to CLIVAR within the World Climate Research Program. The specific aspects of GEWEX addressed by the NOAA Climate and Global Change Program relate to the water/energy exchange processes involved in the coupling of the atmosphere and the land surface (e.g., precipitation, evaporation and runoff). This NOAA effort, the GEWEX Continental-Scale International Project (GCIP), is concentrated within an internationally supported research project centered on the Mississippi River Basin. The project aims to capitalize on the climate data that can be leveraged from the existing infrastructure supporting the weather and hydrological services operated by NOAA and other state and federal agencies. The knowledge gained on how the climate of this data rich region functions will not only benefit those living within the basin itself, but will also be transferable to other regions of the U.S. and the world where significantly less information is available. The project is a key contribution by GEWEX to the North American Precipitation Study sponsored under CLIVAR.

Paleoclimatology: The instrumental and satellite record of climate variability extends back in time about 130 years, and is therefore not long enough to define the full range of natural climate variability. For this reason, NOAA implements a Paleoclimatology program that is tightly focused on using geological and biological records of past climate change to understand the complete patterns, processes and causes of natural interannual to century-scale climate variability. By tapping climate information contained in corals, tree-rings, ice-cores, sediments, and other sources, Paleoclimatology is coordinating international activities to extend NOAA's long-term record of global climate change back millennia. This work has already provided examples of climate system behavior that are not visible in the short instrumental record, but are clues to what might happen in the future. CLIVAR will use this information to evaluate the performance of their predictive models, and NOAA's Climate Change Data and Detection element will use the millennia-long records of natural climate change to detect and understand recent environmental change.

Marine Ecosystem Response: The Marine Ecosystem Response (MER) element contributes to the U.S. Global Ocean Ecosystem Dynamics (GLOBEC) Program, a research initiative jointly supported by NOAA and the National Science Foundation. Research conducted in the MER element is geared toward the generation of quantitative scenarios for the impact of the climate system on marine ecosystems such as the economically significant fisheries in the northeast U.S.

Q18b. FY 1995, FY 1996, and FY 1997 funding levels.

A18b. As follows:

Program Element	FY95	FY96	FY97
Climate Dynamics and Experimental Prediction	8.0	13.9	14.9
Climate Observations	7.1	8.0	9.6
Climate Change Data and Detection	4.0	3.9	5.2
Atmospheric Chemistry	7.2	6.4	7.7
Program on Climate Variability and Predictability (CLIVAR)	16.2	11.6	15.8
Ocean-Atmosphere Carbon Exchange Study (OACES)	2.6	2.4	2.9
Human Dimensions	1.1	1.3	1.4
Global Energy and Water Cycle Experiment (GEWEX)	5.5	4.6	5.9
Paleoclimatology	3.9	3.9	4.1
Marine Ecosystems Response	1.4	0.4	0.0
Aerosols	0.0	1.1	1.1
Total	57.0	57.5	68.6

Q19. Please provide all NOAA funding for each of FY 1995, FY 1996, and FY 1997 used to support the activities of the United Nations Intergovernmental Panel on Climate Change (IPCC) and/or the Intergovernmental Negotiating Committee for a Framework Convention on Climate Change.

A19. During FY 1995, NOAA directly contributed \$46,000 for IPCC Assessments. Requests for FY 1996 have not yet been presented to NOAA and we will not have FY 1997 data until next year. This figure does not include the contributions of time by NOAA scientists, who were extensively involved in the preparation of the 1995 IPCC Climate Assessment.

Q20. Please provide a complete listing of all NOAA programs/projects included as part of the Administration's Climate Change Action Plan, including, for each:

Q20a. A brief description; and

Q20b. FY 1995, FY 1996, and FY 1997 funding levels.

A20. NOAA did not provide financial support to Climate Change Action Plan activities.

Out-Year Funding Projections

Q21. List the estimated FY 1998 through FY 2002 NOAA funding requirements, by fiscal year and NOAA program/subprogram.

A21. See table below. This is the Department of Commerce submission.

National Oceanic and Atmospheric Administration Budget Authority (In Thousands of \$)

	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002

NOAA Laboratory Funding

- Q22. What is the level of funding for each NOAA laboratory, by program/subprogram, for each of FY 1995, FY 1996 and 1997?**
- A22.** The information requested is given in the following table. (NOTE: Program Support/Facility Maintenance/Administration includes reimbursables for the National Marine Fisheries Service. Table also includes Office of Oceanic and Atmospheric Research (OAR) "base" funds, and actual/proposed funding from NOAA-wide programs (Climate and Global Change, Coastal Ocean Science, Environmental Services Data and Information Management, Global Learning and Observation to Benefit the Environment, High-Performance Computing and Communications).)

(1) Officers and crew serve dual role as ship operators and hydrographers.

(2) Being brought on line during 1996.

(3) Out of service part of year for repairs and upgrade.

(4) Minimum of 4-10 years service life remaining.

(5) 20-30 years service life remaining.

(6) Includes some repairs and condition improvement.

*MT MITCHELL, HECK, and SURVEYOR were taken out of service at the beginning of FY 1996. RONALD H. BROWN will be brought on line in FY 1997; officers and crew will total 24.

WM = Wage Marine
RET = Rotating Electronic TechnicianOD = Operating Days
O&M = Operation and Maintenance

Q24. Provide a list of the projected replacement cost and date of replacement for each NOAA vessel.

A24. During the past 2 years, NOAA has aggressively pursued an effective approach to providing ship services. We have expanded use of charters, contracts for data, and UNOLS vessels. We are removing our less cost effective ships from service and replacing them with outsourcing or modern efficient ships. We have reengineered and downsized our ship operations organization to allow us to operate more efficiently, accommodate budget reductions, and increase days at sea. We have used fleet modernization funds to construct one new ship, convert one former new T-AGOS ship, complete significant repairs to three ships, and improve the condition of our remaining ships.

By the end of 1996, we will have removed from service the SURVEYOR, MALCOLM BALDRIGE, DISCOVERER, MT. MITCHELL, and HECK. We will have brought on line the converted KAI'MIMOANA, and by mid-1997 the new RONALD H. BROWN. These vessels can operate for 20 to 30 years. The remaining 13 active NOAA ships, due to repairs funded by fleet modernization, could operate for at least 4 to 10 more years without significant capital investment. The area where some replacement vessels may be necessary is in support of fisheries research and stock management. To effectively meet program requirements, a few modern, acoustically quiet fisheries research ships would be beneficial. The estimated construction and outfitting cost of a modern acoustically quiet fisheries ship is \$40-45 million.

Q25. Provide a detailed breakdown of current use of Marine Services account in FY 1994, FY 1995, FY 1996 and projections for FY 1997, including a listing of all employees paid by the account and their current job title.

A25. The information is provided in the following two tables.

BREAKDOWN OF MARINE SERVICES

(In Thousands of \$)

	Actual FY94	Actual FY95	Estimated FY96	Projected FY97
SHIP OPERATIONS: (Includes ship-related medical, health care for CO's/WM's,HQ/Center ship support, technician, and augmentation costs, and indirect costs associated with ship operations)	\$56,242	\$54,952	\$48,564*	\$44,551*
NON-SHIP OPERATIONS:				
Buyouts/Separation Costs	\$730	\$1,155	\$1,751	\$1,500
Health Care for Non-NC Personnel	2,497	2,667	2,294	2,300
CO's Assigned to Line, Program, & Staff	1,821	2,014	3,875	3,875
Diving Program	473	440	342	342
University National Oceanographic Laboratory System (UNOLS)	41	41	32	32
NW Regional Calibration Center	5	193	160	160
Charter Costs	0	276	2,627	3,127
Indirect Costs Associated with Non-SHIP OPERATIONS	228	273	455	405
TOTAL NON-SHIP OPERATIONS	\$5,795	\$7,059	\$11,536	\$11,741
GRAND TOTAL - MARINE SERVICES	\$62,037	\$62,011	\$60,100	\$66,292

*Reduction in Ship Operations due to layup of MT. MITCHELL and HECK, layup of SURVEYOR, increased outsourcing, and FTE and Administrative Reductions.

EMPLOYEES PAID FROM MARINE SERVICES

TOTAL NON-SHIP OPERATIONS	37	40	71	71
GRAND TOTAL - MARINE SERVICES	808	696	627	549

- Q26. List all new civil service FTE positions that will be created for NOAA Corps personnel once the Corps is dismantled.**
- A26.** NOAA has concluded that there is no longer a need for the NOAA Corps, the seventh and smallest of the uniformed services of the United States. That does not mean that we no longer have a need for the important work currently being done on shore, in the skies, and at sea by the dedicated and uniquely talented women and men of the NOAA Corps. On the contrary, NOAA's need for people to fly our hurricane reconnaissance aircraft, collect hydrographic data, map our oceans and coasts, collect and analyze atmospheric and oceanic research data will continue long after the NOAA Corps ceases to exist. Elimination of the Corps and related streamlining efforts will likely eliminate the need for some positions currently held by NC officers, but it is equally likely that it will require the establishment of new positions. The Administrator has requested a study to investigate how to eliminate the Corps and treat affected persons fairly without adversely affecting NOAA's ability to carry out its core mission. The study will address new civil service positions that will be needed after the elimination of the Corps and current positions that can be eliminated, and will contain recommendations regarding the establishment and filling of those positions that must be filled in order for NOAA to continue to conduct its core mission. At this point, we do not have a list of these positions, but will provide them when the plan is adopted and implemented.
- Q27. How many NOAA Corps personnel will be furloughed when the Corps is dismantled?**
- A27.** The NOAA Corps has been reduced from 403 in October 1994 to 349 today. If the Corps were eliminated on March 31, 1997, we anticipate that there will be 314 officers on the rolls at that time. Of these, 70 will be eligible for 20 year retirement. In addition 54 officers would have served 15 but less than 20 years and could be offered retirement with reduced annuity at the discretion of the Administrator.

Q28. Can the NOAA Corps be dismantled without specific statutory language?

A28. No. Since the NOAA Corps is a Uniformed Service, created by statute, legislation would be required to disestablish the Corps.

Q29. Will NOAA Corps officers be required to compete with civilian scientist for their new jobs?

A29. See answer to question #26.

Q30. How many NOAA Corps officers are required to run the NOAA fleet in FY 1997?

A30. The study referred to in the answer to question 26 will specifically address the question of how many civilian employees will be needed to replace those NOAA Corps officers who currently run the NOAA fleet, conduct research and surveys at sea, and provide headquarters and marine center base support for these activities.

Termination Costs and Savings

Q31. Provide a list of the termination costs of all programs recommended for termination by the Administration in its FY 1997 budget request for NOAA, including programs which currently are funded but are not included in the Administration budget request. Indicate whether the termination costs have been budgeted for in the FY 1996 request.

A31. The requested information is provided in the following table.

Service	Termination Cost	Comments
California data buoys	\$0.1 million	Buoy removal and transportation costs; not included in FY 1996 or FY 1997 request
Regional Climate Centers	\$0.0 million	
Agricultural weather/fruit-frost warning services	\$1.0 million	These services were to be terminated October 1, 1995, but will be continued until April 1, 1996, and April 20, 1996, respectively in order to meet Congressional intent for a smooth transition to the private sector. Interim operations during this time frame will cost approximately \$1.0 million. Costs are not budgeted in the FY 1996 request.
National Undersea Research Program	\$2.1 million	Of this amount \$1.5 million is associated with the elimination of 92 positions, including 84 university scientists and technical personnel. The remaining \$0.6 million will pay for the removal and disposal of assets including the underwater research laboratory "Aquarius," the research submersible "Pisces," and five government-owned surface vessels. Termination costs were not budgeted in the FY 1996 President's Budget.
Total	\$3.2 million	

Q32. Please list all specialized weather services which are to be terminated in FY 1996, FY 1997, FY 1998 and FY 1999, include the expected cost savings from each termination.

A32. The requested information is provided in the following table.

Service	Fiscal Year	Cost Savings
Agricultural weather/fruit-frost warning services	1996	\$2.3 million
Non-Federal, non-wildfire, fire-weather services	1996	\$0.5 million
Marine Radiofacsimile	1996	\$0.5 million
Regional Climate Centers	1997	\$2.0 million
Total		\$5.3 million

The Honorable Joseph F. Vivona
Chief Financial Officer
U.S. Department of Energy

Answers to Prehearing Questions

**HEARING OF THE SUBCOMMITTEE ON ENERGY AND ENVIRONMENT
COMMITTEE ON SCIENCE
U.S. HOUSE OF REPRESENTATIVES**

on

FY 1997 DOE, NOAA AND EPA R&D Budget Authorization Requests

Thursday, March 21, 1996
2318 Rayburn House Office Building

Prehearing Questions Submitted to

**Hon. Joseph F. Vivona, Chief Financial Officer
U.S. Department of Energy**

DOE/Contractor Personnel

Q1. By location (city and state), please identify every DOE office located in the United States or foreign countries. For each office for fiscal years 1995, 1996, and 1997, please provide the number of employees, the funding to maintain the office staff and office space, and the programmatic funding administered by each office.

A1. We do not maintain data in the form you requested, and we will have to collect it via a data call to the field. In the interim, the attached data provides the relevant staffing data at a more macro level. That is, by Headquarters, Operations, Field and Special Purpose Office.

* Includes 527 in FY 1996 and 85 in FY 1997 for Bureau of Mines activities transferred to the Department after the Strategic Alignment Initiative was published. Without these employees, projected employment would be 18,916 in FY 1996 and 18,046 in FY 1997.

Q3. Please provide a listing of the number of DOE-contractor employees detailed to DOE Headquarters and to each DOE operations, field, area, site or support office outside of Washington for each of fiscal years 1995, 1996 and 1997.

A3. *[Note: DOE did not answer.]*

Q4. Please provide the size of the public affairs offices maintained by DOE Headquarters and by each DOE operations, field, area, site or support office outside of Washington for each of fiscal years 1995, 1996 and 1997.

A4. The staffing levels for the Public affairs offices in Headquarters and by each DOE operations, field, area, site and support office outside of Washington is shown at table provided for the record. Some offices incorporate more diverse activities and responsibilities than others. For example, the services could range from researching and responding to Freedom of Information Act inquiries to Tribal liaison, public affairs budgeting, library services, and public participation (as directed by DOE Order P 1210.1). Other offices are staffed with public affairs officers that primarily work with the news media. Explaining Departmental activities to interested publications and localities is an essential part of building the trust and understanding of the affected State and localities for implementation of many of the Department's programs. It is also critical for fostering understanding of the impact of change as the result of streamlining, changes in mission, and budget reductions.

Staffing Levels for DOE Public Affairs: Headquarters and Field Offices

Location	FY 1995	FY 1996	FY 1997
Headquarters, Washington DC	55	55	30*
Albuquerque Operations Office	11	11	11
Carlsbad Area Office	3	3	3

Total	63	36	78	44	77	42

*Congressional, Public & Intergovernmental Affairs and Public & Consumer Affairs merged to form Congressional & Intergovernmental Affairs, 12/95.

Q6. How many employees, by organization, were hired by DOE under the authority of the Ramspeck Act in fiscal years 1994, 1995 and 1996?

A6. FY 1994

1	Office of Congressional and Intergovernmental Affairs
1	Office of Environmental Management
1	Office of the Chief Financial Officer
1	Office of Policy
4	Total FY 1994

FY 1995

1	Office of the Secretary of Energy
1	Office of General Counsel
1	Office of Congressional, Public and Intergovernmental Affairs
2	Office of Policy
1	Office of Fissile Materials Disposition
1	Office of Environmental Management
2	Office of Energy Efficiency and Renewable Energy (one employee has left the Department)
1	Office of Fossil Energy (employee has left the Department)
1	Oak Ridge Operations Office
11	Total FY 1995

FY 1996

No appointments under authority of the Ramspeck Act have been made thus far in FY 1996.

Support Service Contracts

Q7. For each headquarters and field organization, please provide a list of all support service contracts including the cost of each contract and the program activity that funds each contract, the associated full-time employees, and the purpose for each contract. For each support service contract, please provide the average cost per employee.

A7. Enclosed is a listing of support service contracts active on February 29, 1996. The listing is ordered by major contracting office (Head of Contracting Activity), and provides the name of the initiating program office, the current and prior fiscal year obligations, and a brief description of work.

This report was extracted from the Procurement and Assistance Data System (PADS), which is the Department's centralized database for the collection of procurement and financial assistance award information.

PADS does not collect data on the number of support service contractor employees that are used by individual contractors.

Noncompetitive Awards

Q8. For each of FY 1993-FY 1996 (to date), please provide a listing by Fiscal Year, of all DOE noncompetitive awards of financial assistance and contracts. For each such noncompetitive award, please provide the following information:

Q8a. Identity, including address and contact, of each awardee;

Q8b. Description of work performed under the award;

Q8c. Rationale for the noncompetitive award; and

Q8d. Funding, including the source of funding.

A8. Enclosed is one listing each for fiscal years 1993-1996 (to date) of all noncompetitive new procurement awards over \$25,000 and all non-competitive new financial assistance awards.

The listings are sorted by major contracting office (Head of Contracting Activity), and provide the name of the contractor or financial assistance recipient, place of performance of the contract or grant, the initiating program office, the type of award, a brief description of work, the extent of competition for financial assistance awards, and extent competed and competition exemption authority for procurement awards

These reports were extracted from the Procurement and Assistance Data System (PADS), which is the Department's centralized database for the collection of procurement and financial assistance award information. Please note that the reports for 1993 and 1994 are in two parts, one from archives and one from active awards. This is the case as some of the contracts and grants have been retired.

PADS does not collect information on street addresses or contractor points of contact.

Consultants

Q9. For each of FY 1993-FY 1996 (to date), please provide a listing by Fiscal Year, of all DOE consultants. For each such consultant, provide the following information:

Q9a. Identity;

Q9b. Description of work to be performed by the consultant;

Q9c. Rationale for using the consultant rather than relying on in-house of other existing contractor expertise; and

Qd. Funding, including the source of funding.

A9. The table shows the information for Questions 9a, 9b, and 9d for each consultant for the fiscal years 1993 through 1996. *[Note: DOE did not answer Q9d in its entirety.]*

In requesting approval of consultant appointments, Departmental program managers are not required to specify the rationale for hiring a consultant as opposed to obtaining advice through in-house or contractor employees. However, each consultant employment request includes the certification signed by the requesting program manager that the work is temporary in nature, purely advisory, and does not include performance or supervision of operating functions; that the consultant appointment authority is the most appropriate authority for meeting the Department's need; and the appointment documentation is in compliance with Office of Personnel Management rules and regulations and Departmental policy.

A. Identity	B. Description of Work	D. Funding
FY 1993		
Attra, Harvey D.	Advisor to the Director, Office of Export Assistance.	Energy and Water Development (EWD)
Berls, Jr., Robert	Advise on issues related to emerging markets in Russia.	EWD
Bickerton, Brison J.	Advisor to the Director, Energy Information Administration on research and technical program issues.	Interior
Bins, Milton	Advise the Director on minority educational institutions.	EWD
Black, David L.	Advise on research and development programs on fission energy.	EWD
Brown, Jan	Advise on departmental strategies for technology transfer.	EWD
Cochran, Ronald	Provide technical advice to Director, New Production Reactor.	EWD
Cudd, Connie	Advisor to the Assistant Secretary for Congressional and Intergovernmental Affairs.	EWD
Deshields, Evangeline	Advisor to the Director of Scheduling and Logistics.	EWD
Dexter, Robert	Advisor to the Deputy Assistant Secretary for Energy Emergencies.	Interior

Kauffman, Joanne M.	Provide data collection and analytical support for task force.	EWD
Kennedy, Almira	Advisor to the Deputy Secretary on automation and logistical procedures.	EWD
Kepper, Jeanne G.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
King, Marcus Dubois	Advisor to the Deputy Secretary on a variety of nuclear energy issues.	EWD
Klaidman, Stephen D.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Kountoupes, Lisa M.	Advisor to Under Secretary on legislative and policy issues.	EWD
Krebs, Martha A.	Advise on energy research and development missions.	EWD
Laird, Robbin F.	Advisor to Director, Office of Nonproliferation and National Security.	EWD
Lash, Terry	Advisor to the Secretary and the Office of Nuclear Energy.	EWD
Lemerise, Theresa L.	Advisor to Assistant Secretary for Human Resources and Administration.	EWD
Lingle, Linda A.	Advise on matters of communications and outreach policy.	EWD
Luongo, Kenneth N.	Advisor on arms control and nuclear nonproliferation.	EWD
Maeshiro, Rika	Advisor on occupational medicine programs to the Assistant Secretary for Environment, Safety and Health.	EWD
Magwood, William D.	Advisor to Director, Office of Nuclear Energy.	EWD
Marlo, Stephen M.	Advise Deputy Assistant Secretary for Facility Transportation and Management on complex engineering and technical environmental issues.	EWD
Mastroianni, Anna C.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
McBride, Thomas	Advisor to Assistant Secretary on operating controls.	EWD
McCraney, Percy P.	Advisor to the Director, Office of Economic Impact and Diversity.	EWD

A. Identity	B. Description of Work	D. Funding
McCune, Michael O.	Advisor to the Executive Director, Secretary of Energy Advisory Board.	EWD
McDonnell, Karen A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
McGraw, Joseph F.	Advise and assist with the development of contract tasking.	EWD
McNeilly, Lisa D.	Advise on energy supply and demand, transportation and methane emitters.	EWD
Mitterer, Richard	Provide advice on geoscience program initiatives.	EWD
Monlyn, Sylvia M.	Advisor to Assistant Secretary regarding energy issues.	EWD
Monroe, Kevin A.	Advise on legislative issues and proposed policies.	EWD
Moody, Corlis R.	Advise on effects of energy policies on minority businesses.	EWD
Mullarkey, John F.	Advisor to the Deputy Assistant Secretary on program standards and practices.	EWD
Nelson, Kenneth E.	Advisor for the waste minimization and pollution prevention programs.	EWD
Nichols, Cheryl	Advise Chief of Staff on management reviews and studies.	EWD
Ochoa, Gloria Megino	Advise on international issues for Energy Efficiency and Renewable Energy technology development and deployment.	Interior
Olsen, Christopher N.	Advise on development and review of communication plans.	EWD
Ost, John L.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Pardue, Mary-Lou	Serve as a member of a search committee for the Office of Energy Research.	EWD
Parise, Eileen	Advisor in the areas of trade promotion and export assistance.	EWD
Parris, Carmena	Advisor to Chief of Staff on administrative matters.	EWD
Passerini, Margaret E.	Advisor to the Under Secretary on policy and program initiatives.	EWD
Pearson, Orin F.	Provide expert advice on all aspects of nuclear safety.	EWD
Pesyna, Gail M.	Advisory services regarding administrative management services.	EWD
Pickert, Adonica Renee	Advisor to Chief of Staff, Office of the Secretary of Energy.	EWD
Pies, Cheri A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Pillai, Prita	Advisor for Human Radiation Experimentation.	EWD
Radin, Alex	Advisor on the Yucca Mountain Site Project.	EWD
Roales, Judith M.	Advisor on strategic planning process and budget execution.	EWD
Rodgers, Jeffrey S.	Advisor to the senior financial analyst.	EWD
Rodgers, Jeffrey	Provide critical assistance and advice to the General Counsel.	EWD
Rodriguez, Samuel	Advise and assist the Director, Office of Energy Research.	EWD
Rolhding, Joan B.	Advise on the development of nuclear legislation.	EWD

A. Identity	B. Description of Work	D. Funding
Saumweber, David J.E.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Slaughter, Leigh A.	Advise General Counsel on legal issues.	EWD
Smith, Douglas W.	Advisor to the General Counsel on special projects.	EWD
Solit, James N.	Study Freedom of Information Act process within the Department and make recommendations	EWD
Sorensen, Richard P.	Advise on public accountability including speeches.	EWD
Spiller, Reginal W.	Advisor to recommend program strategy relating to oil and gas	EWD
Stallings, Richard H.	Advisor to the Secretary of Energy.	EWD
Sterling, Dean E.	Provide expert advice to the Office of University and Science Education Program.	EWD
Stern, Gary M.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Stevenson, Patricia	Advise on scheduling, calendar, meetings and travel for the Deputy Secretary of Energy.	EWD
Stratton, Christopher A.	Conduct special studies on function of Energy Efficiency and Renewable Energy programs	EWD
Strong, Donsia R.	Advisor on program and policy matters.	EWD
Sugarman, Jeremy	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Sullivan, Mary Anne	Advisor to the General Counsel on special projects.	EWD
Suokko, Kristen L.	Advisor on a range of nuclear energy issues.	EWD
Taimi, Kathleen I.	Advisor to Assistant Secretary for Environment, Safety and Health.	EWD
Tate, Jr., Daniel C.	Advisor to the Assistant Secretary for Congressional, Intergovernmental and International Affairs.	EWD
Tates, Donald E.	Advise the Secretary on Small Business Energy Programs.	EWD
Taylor, Katherine A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Theodosiou, Noel A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Thomas, Marther Sue	Advisor to the Assistant Secretary for Environmental Management.	EWD
Thomas, Sandra D.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Tran, Nga L.	Serve as expert Public Health advisor to Assistant Secretary for Environment, Safety and Health.	EWD
Trout, Douglas B.	Conduct Health Hazard Evaluations.	EWD
Tucker, Bill.	Advisor for Fossil Energy Programs regarding national energy policy.	Interior
Uppulun, Ram Y.	Advisor to Principal Deputy Assistant Secretary for Congressional, Public and International Affairs.	EWD
Vivona, Joseph F.	Advisor to the Acting Chief Financial Officer.	EWD
Volgeley, Jr., Clyde E.	Consultation of technical curricula for Training Center.	EWD

A. Identity	B. Description of Work	D. Funding
Watts, Carolyn H.	Advise on legislative issues of politically sensitive nature.	EWD
Webster, Edward W.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Weidenfeller, Nancy K.	Advisor to the Assistant Secretary for Human Resources and Administration.	EWD
Weiss, Ellyn R.	Provide advice covering the scope of Human Radiation Experiments and record retrieval.	EWD
Werner, James D.	Advise on technical policy program and public relations issues.	EWD
Whittemore, Gilbert F.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Wicker, William A.S.	Advise the Press Secretary on media relations.	EWD
Wisner, William T.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Wolfe, Sheldon	Serve as a member of a search committee for the Office of Energy Research.	EWD
Yuffee, Michael A.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Zwally, Kurt D.	Advise on the policy review process.	EWD
FY 1995		
Adamson, Daniel M.	Advisor to the Assistant Secretary for Energy Efficiency and Renewable Energy on key policy problems and issues.	Interior
Ahearn, John F.	Advisor to the Assistant Secretary for Environment, Safety and Health on protection from potential release of [?].	EWD
Akhtar, M. Salim	Advisor for Energy Policy Institutional and Pricing Reforms.	EWD
Anderson, Janet M.	Technical advisor on environmental matters.	EWD
Annan, Robert H.	Advisor on local and national energypolicies and priorities.	Interior
Attria, Harvey D.	Advisor on U. S. Business opportunities overseas.	EWD
Backer, Paul	Assist with the Development of initiatives, agreements and contracts.	EWD
Beeman, Teresa G.	Advisor to Assistant Secretary for Policy on Federal legislative initiatives	EWD
Berger, David F.	Critical assistance and advice to the General Counsel.	EWD
Benick, David M.	Advisor to Senior Advisors to the Assistant Secretary for Environmental Management	EWD
Berman, Helen	Serve as a member of a search committee for the Office of Energy Research.	EWD
Bobbish, Donna J.	Provide expert advice to the Assistant Secretary for Policy.	EWD
Botkin, Jeffrey	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Boyden, Amy E.	Advisor to Department of Energy's initiative to launch "Climate Challenge."	Interior
Brachman, Lavea	Advise Office of Environmental Management on Environmental laws and impact on technical developments.	EWD

A. Identity	B. Description of Work	D. Funding
Brady, Jayne Ellen	Assist Press Secretary advising on media opportunities for the Secretary	EWD
Buchanan, Allen E.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Buxton, Jo Alice	Advisor to Director, Financial System Division.	EWD
Byrne, Alexis S.	Advisor to Director, Office of Governmental Liaison.	EWD
Caldwell, Jr., James H.	Advisor on energy and environmental policy.	EWD
Caputo, Mansa C.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Carmichael, Ann M.	Advisor to the Director, Office of Nuclear Energy.	Interior
Carroll, Paul M.	Advise on research methodologies and analyses of Environmental Management programs.	EWD
Carter, II, John F.	Advisor to the Assistant Secretary for Fossil Energy.	Interior
Castelli, Brian T.	Advise on cross-cutting energy and renewable energy technology.	EWD
Cheney, David	Advisor to Deputy Under Secretary for Technology Partnerships and Economic Competitiveness.	EWD
Chupka, Marc	Advisor on Federal air pollution policy development.	EWD
Chyba, Christopher F.	Serves as Department of Energy liaison with Office of Science and Technical Policy.	EWD
Cullen, Joseph J.	Advisor to the Assistant Secretary for Energy Efficiency and Renewable Energy on technical renewable energy issues.	EWD
Davis, Howlie R.	Senior Advisor to the Assistant Secretary for Congressional and Intergovernmental Affairs on special projects.	EWD
Debruler, Gregory L.	Advisor to the Director, Office of Public Accountability.	EWD
Denton, Michelle A.	Advisor to Assistant Secretary for Policy on energy, environment and natural resources.	EWD
Dixon, Mary C.	Advisor on speech preparation and presentation.	EWD
Donoghue, Matthew	Advise Press Secretary on media opportunities for the Secretary.	EWD
Donohue, Matthew	Advisor to the Press Secretary on media opportunities for the Secretary.	EWD
Donan, Merry Lew	Recommend revisions of strategic planning and analysis practices.	EWD
Dowdy, Edward J.	Advisor on nonproliferation issues regarding nuclear reactors.	EWD
Edwards, Gregory A.	Assist the Assistant Secretary for Fossil Energy.	Interior
Ewing, Karen D.	Advisor on scheduling and coordinating high profile meetings	EWD
Fernandes, Praveen D.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Fisher, Jr., Thomas J.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Fitzgerald, Patrick A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD

A. Identity	B. Description of Work	D. Funding
Flynn, Sarah C.	Advisor on editing and proofreading final report of the Advisory Committee on Human Radiation Experiments.	EWD
Fogarty, Linda A.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Frederick, Daniel	Advisor on a variety of research program issues.	EWD
Freese, Terence L.	Advisor to Acting Director of Worker and Community Transition.	EWD
Fribush, Stuart L.	Technical advisor to the Assistant Secretary for Environmental Management.	EWD
Garcia, Delmin J.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Geller, Gail	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Gesteland, Raymond F.	Serve as a member of a search committee for the Office of Energy Research.	EWD
Giesen, Clare C.	Advisor on health related issues on Wellness Programs.	EWD
Goodman, Mark W.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Goodman, Steven N.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Gourley, Karoline S.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Granquist, Marilyn M.	Advisor to senior staff personnel on travel and relocation functions.	EWD
Gross, Marilyn E.	Advisor on developing and implementing office initiatives.	EWD
Halcomb, M. Staser	Advisor to Technical Evaluation Panel.	EWD
Hall Crawford, Marian	Advisor to the Director, Office of Public Accountability.	EWD
Hanauer, Stephen H.	Advisor to Director and Deputy Director of Civilian Radioactive Waste Management on special technical projects.	EWD
Harkness, John M.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Heffernan, Beverly C.	Advisor to the Assistant Secretary for Environmental Management.	EWD
Hegburg, Alan S.	Advisor in the areas of international trade.	EWD
Hoffer, Audrey E.	Advises on briefings, conferences, and special appearances by the Secretary of Energy.	EWD
Holman, Philip	Advisor to the Director, Office of Science Education and Technical Information.	EWD
Holmes, Denise E.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Hudson, Maria E.	Advisor to the Principal Deputy Assistant Secretary for Human Resources	EWD
Hurt, Valerie E.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Jasny, Michael D.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Jhirad, David J.	Advisor on international power policy and science technology.	EWD

A. Identity	B. Description of Work	D. Funding
Kahn, Jeffrey P.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Karparkin, Jeremy C.	Advisor on Rocky Flats Field Office operations.	EWD
Kass, Nancy E.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Kauffman, Joanne M.	Provide data collection and analytical support for task force.	EWD
Keller, Ralph A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Klaidman, Stephen D.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Kurtovich, Martin R.	Advisor to the Deputy Assistant Secretary for Compliance and Program Coordination.	EWD
Laird, Robbin F.	Advisor to Director, Office of Nonproliferation and National Security.	EWD
Lakich, Duane Marie	Advise Assistant Secretary for Policy on Congressional hearings process.	EWD
Lee, Ellen H.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Lemense, Theresa L.	Advisor to the Assistant Secretary for Human Resources and Administration.	EWD
Levine, Jeffrey E.	Advisor to policy regarding Congressional hearing process.	EWD
Lindee, May S.	Advisor to the Assistant Secretary for Human Resources and Administration.	EWD
Long, Wilhelmina	Advisor on graphic art/visual information.	EWD
Lowen, Rebecca S.	Advisor to the Assistant Secretary for Human Resources and Administration.	EWD
MacDougal, Carmen E.	Advisor to the Director of Public and Consumer Affairs.	EWD
MacLachlan, Alexander	Advisor to the Under Secretary on technical transfer and economic competitiveness.	EWD
Maeshiro, Rika	Advisor on Occupational Medicine programs.	EWD
Magwood, William D.	Advisor to Director, Office of Nuclear Energy.	EWD
Mastroianni, Anna C.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
McCarthy, Charles R.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
McCraney, Percy P.	Advisor to the Director, Office of Minority Impact and Diversity.	EWD
McCune, Michael	Advisor to the Executive Director, Secretary of Energy Advisory Board.	EWD
McDonnell, Karen A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Miller, Wilhelmine D.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Miller, Jonathan S.	To conduct special environmental management studies and analyses.	EWD
Mitterer, Richard M.	Provide advice on geoscience program initiatives.	EWD
Moskun, Gregory A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Mullarkey, John F.	Advisor to the Deputy Assistant Secretary for Compliance and Program Coordination on program standards and practices.	EWD

A. Identity	B. Description of Work	D. Funding
Nelson, Kenneth E.	Advisor on waste minimization and pollution prevention programs.	EWD
Nichols, Cheryl	Advisor on the development of administrative policies.	EWD
Ochoa, Gloria Megino	Advises on international issues for Energy Efficiency and Renewable Energy technology development and deployment.	Interior
Olsen, Christopher N.	Advise on development and review of communication plans	EWD
Pardue, Mary-Lou	Serve as a member of a search committee for the Office of Energy Research.	EWD
Panse, Eileen	Advisor in the areas of trade promotion and export assistance.	EWD
Parthasarathy, Shobita	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Perentesis, Patricia J.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Pies, Cheri A.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Rabago, Karl R.	Advisor on a range of energy issues.	Interior
Rabin, Alex	Advisor on Yucca Mountain Project siting issues.	EWD
Rodriguez, Samuel	Advise and assist the Director, Office of Energy Research	EWD
Rohlfing, Joan B.	Advise on the development of nuclear legislation	EWD
Royden, Amy E.	Advisor on Department of Energy efforts to launch climate challenge	EWD
Schoch Spana, Monica L.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Skrabut, Kathleen M.	Advisor on labor policy for the Office of Worker and Community Transition.	EWD
Solit, James N.	Study Freedom of Information Act process within the Department and make recommendations.	EWD
Spicer, Linda F.	Advisor to the Director, Office of Financial Policy, on financial management issues.	EWD
Sterling, Dean E.	Provide expert advice to the Office of University and Science Education Program.	EWD
Sugarman, Jeremy	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Supko, Keith	Advisor to the Deputy Assistant Secretary for International Energy Policy.	EWD
Tamu, Kathleen I.	Advisor to the Assistant Secretary for Environment, Safety and Health.	EWD
Todd, Sean P.	Advisor to Assistant Secretary and the Principal Deputy Secretary for Environmental Management.	EWD
Towber, Wendy A.	Advisor to the Assistant Secretary for Energy Efficiency and Renewable Energy.	EWD
Ulin, Jessie K.	Advisor on Office of Energy Efficiency and Renewable Energy.	EWD
Uppuluri, Ram Y.	Advisor to Principal Deputy Assistant Secretary for Congressional, Public and International Affairs.	EWD

A. Identity	B. Description of Work	D. Funding
Vogele, Jr. Clyde E.	Consultation of technical curricula for Training Center.	EWD
Von Hippel, Frank N.	Advisor on the technical bases for nuclear arms control.	EWD
Waters, Lewis	Advisor on planning work programs areas.	EWD
Webster, Edward W.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Weiss, Eilyn R.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Whittemore, Gilbert F.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Wisner, William T.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Wolfe, Sheldon	Serve as a member of a search committee for the Office of Energy Research.	EWD
Zahurak, Marianna	Advisor to the Assistant Secretary for Environment, Safety and Health on a variety of program and policy issues.	EWD
FY 1996		
Ahearn, John F.	Advisor to the Assistant Secretary for Environment, Safety and Health on protection from potential release of [?].	EWD
Annan, Robert H.	Advisor on local and national energypolicies and priorities.	Interior
Attra, Harvey D.	Advisor on U. S. Business opportunities overseas.	EWD
Berrick, David M.	Advisor on program efficiency/effectiveness reform.	EWD
Brachman, Lavea	Advise Office of Environmental Management on environmental laws and impact on technical developments	EWD
Campbell III, Bruce E.	Advisor to Director, Office of Scheduling and Logistics	EWD
Caputo, Marisa D.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Creedon, Madelyn R.	Advisor to the Deputy Secretary of Energy and the Assistant Secretary for Defense Programs.	EWD
Cullen, J. Joseph	Advisor to the Assistant Secretary for Energy Efficiency and Renewable Energy on technical renewable energy issues.	EWD
Dixon, Mary C.	Advisor on speech preparation and presentation.	EWD
Dorian, Merry Lew	Advisor to provide independent and objective evaluation of Office of Environmental Management programs.	EWD
Flynn, Sarah C.	Advisor on editing and proofreading final report of Advisory Committee on Human Radiation Experiments.	EWD
Fredenck, Daniel	Advisor on a variety of research program issues.	EWD
Freese, Terence L.	Advisor to Acting Director of Worker and Community Transition.	EWD
Fribush, Stuart L.	Technical advisor to the Assistant Secretary for Environmental Management.	EWD

A. Identity	B. Description of Work	D. Funding
Gourley, Karoline S.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Granquist, Marilyn M.	Advisor to senior staff personnel on travel and relocation functions.	EWD
Heffernan, Beverley C.	Advisor to the Assistant Secretary for Environmental Management.	EWD
Hoffer, Audrey E.	Advises on briefings, conferences, and special appearances by the Secretary of Energy	EWD
Holman, Philip	Advisor to the Director, Office of Science Education and Technical Information.	EWD
Kahn, Jeffrey P.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Klaidman, Stephen D.	Advisor to Advisory Committee on Human Radiation Experiments	EWD
Long, Wilhelmina	Advisor on graphic art/visual information.	EWD
MacLachlan, Alexander	Advisor on a variety of science and technology matters.	EWD
Maeshiro, Rika	Advisor on Occupational Medicine programs.	EWD
Mastroianni, Anna C.	Advisor to Advisory Committee on Human Radiation Experiments.	EWD
Miller, Jonathan S.	Advisor to the Secretary of Energy on environmental and legal issues.	EWD
Mullarkey, John F.	Advisor to the Deputy Assistant Secretary for Compliance and Program Coordination on program standards and practices.	EWD
Nelson, Kenneth E.	Advisor on waste minimization and pollution prevention programs.	EWD
Nichols, Cheryl	Advisor to the Chief of Staff on technology issues.	EWD
Palmer, Cynthia M.	Advisor on complex and high priority Office of Environment, Safety and Health legal issues.	EWD
Rumsey, Terry C.	Advisor to the Director, Office of Energy Research.	EWD
Skrabut, Kathleen M.	Advisor on labor policy for the Office of Worker and Community Transition.	EWD
Supko, Keith	Advisor to the Deputy Assistant Secretary for International Energy Policy.	EWD
Taimi, Kathleen I.	Advisor to the Assistant Secretary for Environment, Safety and Health.	EWD
Towber, Wendy A.	Advisor to the Assistant Secretary for Energy Efficiency and Renewable Energy	Interior
Uppuluri, Ram Y.	Advisor to Principal Deputy Assistant Secretary for Congressional, Public and International Affairs	EWD
Vickers, Albert F.	Advisor on the environmental restoration program.	EWD
Waters, Lewis	Advisor on planning work programs areas.	EWD
Weiss, Ellyn	Advisor to Advisory Committee on Human Radiation Experiments.	EWD

Trade Associations, Professional and Environmental Organizations

Q10. Please provide the DOE funding (including funding source) for each of FY 1993-FY 1996 (to date) of trade associations and professional, environmental or other organizations. For each such trade association/professional, environmental or other organization, provide the following information:

Q10a. Identity;

Q10b. Description of work performed by the trade association/professional, environmental or other organization;

Q10c. Whether or not the funds were awarded on a competitive basis; and if not, the rationale for a noncompetitive award.

A10. [DOE did not answer this question.]

Advisory Committees

Q11. Please provide a list of advisory committees, a description of each, and the amount budgeted for each in fiscal years 1995, 1996 and 1997, the source of the funding for each, and the work product or products of each.

A11. The Department currently has 20 chartered advisory committees. A list of chartered advisory committees, a description of each committee, and the actual expenditures for fiscal year 1995 and the estimated budgets for fiscal year 1996 and 1997, taken from the fiscal year 1995 Annual Report, are shown in the tables that we would like to insert into the record. (The information follows:)

Department of Energy List of Federal Advisory Committees

Page 1 of 1
03/13/96

Committee Name

Advisory Committee on Demonstration & Commercial Application of Renewable Energy and Energy Efficiency Technologies (ACDCA). GSA #443.

American Statistical Association Committee on Energy Statistics (ASA). GSA #82

Basic Energy Sciences Advisory Committee (BESAC). GSA # 133

DOE/NSF Nuclear Science Advisory Committee (NSAC)

Environmental Management Advisory Board (EMSSAB). GSA #12

Environmental Management Site Specific Advisory Board (EMSSAB). GSA # 1889

Federal Advisory Committee to Develop On-Site Innovative Technologies for Environmental Restoration Waste Management (FACDOIT). GSA # 95

Fusion Energy Advisory Committee (FEAC). GSA # 444

Health and Environmental Research Advisory Committee (HERAC). GSA #445

High Energy Physics Advisory Panel (HEPAP). GSA # 178

Hydrogen Technical Advisory Panel (HTAP). GSA # 446

Inertial Confinement Fusion Advisory Committee/Defense Programs (ICFAC/DP). GSA # 10

Metal Casting Industrial Advisory Board (.MCIAB). GSA # 447

National Coal Council (NCC). GSA # 449

National Electric and Magnetic Fields Advisory Committee (NEMF). GSA # 236

National Petroleum Council (NPC). GSA # 452

Secretary of Energy Advisory Board (SEAB). GSA # 453

State Energy Advisory Board (STEAB). GSA # 459

Technical Advisory Committee on Verification Fissile Material and Nuclear Warhead Controls (TAC) (Inactive)

Technical Panel on Magnetic Fusion (TPMF) (Inactive)

DEPARTMENT OF ENERGY ADVISORY COMMITTEES

1. Advisory Committee on Demonstration and Commercial Application of Renewable Energy and Energy Efficiency Technologies

The Advisory Committee on Demonstration and Commercial Application of Renewable Energy and Energy Efficiency Technologies (ACDCA), formerly the Advisory Committee on Renewable Energy and Energy Efficiency Joint Ventures, was established by the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989, Public Law 101-218, Section 6(b)(3), and the Energy Policy Act of 1992, Public Law 102-486 and was chartered on September 10, 1990. The ACDCA was amended to advise the Secretary of Energy on the development of the solicitation and evaluation criteria for commercialization ventures, and on otherwise carrying out his/her responsibilities under the Act. The Committee shall also advise the Secretary on the implementation of the commercialization ventures program.

2. American Statistical Association Committee on Energy Statistics

The American Statistical Association Committee on Energy Statistics (ASA) was established by the ASA at the request of the Secretary of Energy on October 17, 1984. This Committee was established to utilize the expertise of the ASA for review of elements of Energy Information Administration (EIA) information collection and analysis programs; advice on priorities of technical and methodological issues in the planning, operation and review of EIA statistical programs; and advice on matters concerning improved energy modeling and forecasting tools, particularly regarding their functioning, relevancy and results.

3. Basic Energy Sciences Advisory Committee

The Basic Energy Sciences Advisory Committee (BESAC) was established on October 16, 1986. The BESAC was established to provide advice to the Secretary of Energy through the Director of Energy Research on elements of the Department's Basic Energy Sciences (BES) Program including advice on long-range plans, priorities, and strategies to address more effectively the scientific aspects of energy-related basic energy sciences issues of Departmental policies and programs. The Committee will provide recommendations, as requested, on appropriate levels of funding to develop those plans, priorities and strategies and to help maintain appropriate balance between competing elements of the BES program, and on scientific aspects of basic energy sciences issues of concern to DOE.

4. Environmental Management Advisory Board

The Environmental Management Advisory Board (EMAB), formerly the Environmental Restoration and Waste Management Advisory Committee, was established on January 24, 1992. The EMAB was established to provide information, advice and recommendations to the Assistant Secretary for Environmental Restoration and Waste Management (EM). Its primary functions include:

- A. advise DOE on the process, content, public participation, and scientific, technical and other aspects of the analyses for the Programmatic Environmental Impact Statement (PEIS) and other projects;
- B. regularly assess the progress of the PEIS;
- C. review documents produced for the PEIS process as requested, and similarly, review the documents prepared for other EM projects assigned to the EMAB;
- D. issue reports and recommendations; and
- E. recommend options to resolve difficult issues faced in the EM program, including clean-up criteria and risk assessment, land use, priority setting and strategies for determining the future national configuration of waste management and disposal facilities.

5. Federal Advisory Committee to Develop On-Site Innovative Technologies for Environmental Restoration and Waste Management

The Federal Advisory Committee to Develop On-Site Innovative Technologies for Environmental Restoration and Waste Management (DOIT) was established on December 10, 1992, through a Memorandum of Understanding (MOU) signed in July 1991 by representatives from the U.S. Departments of Energy, Defense, Interior, the U.S. Environmental Protection Agency and the Western Governors' Association. The objective of the MOU is "to establish a more cooperative approach to development of technical solutions to environmental restoration and waste management problems shared by States, commercial entities, and the Federal government. The DOIT serves as the primary vehicle for recommending a program that can be adopted to implement the MOU regarding environmental restoration and waste management in Western States.

6. Environmental Management Site Specific Advisory Board

The Environmental Management Site Specific Advisory Board (EM SSAB) was established on May 16, 1994. The EM SSAB provides the Secretary of Energy, the Assistant Secretary for Environmental Restoration and Waste Management, the Director of the Office of Public Accountability and appropriate field site managers involved with the EM programs at the sites with policy information, advice, and recommendations concerning environmental restoration, waste management, and technology development activities. The EM SSAB will have the following duties:

- A. Advise the Department of Energy on the process, content, public participation, and other policy aspects of EM's environmental restoration, waste management, and technology development activities;
- B. Issue reports and recommendations; and
- C. Recommend options to resolve difficult issues faced in the Environmental Restoration and Waste Management program, including site specific clean-up criteria and risk assessment, land use, priority setting, management effectiveness, cost vs. benefit analyses, and strategies for site waste management and disposal facilities.

7. Fusion Energy Advisory Committee

The Fusion Energy Advisory Committee (FEAC) was established on April 18, 1991. The FEAC provides advice and guidance, on a continuing basis, to the Director, Office of Energy Research, on the Fusion Energy Program, including:

- A. Periodic assessments of both the magnetic and inertial fusion energy program issues and recommendations of any changes considered desirable on the basis of scientific and technological advances or other factors;
- B. Advice on the merits of technical options, long-range plans, priorities, and strategies to demonstrate the scientific and engineering feasibility of fusion;
- C. Advice on recommended levels of funding appropriate to implement those strategies and to help maintain appropriate balance among the various elements of the fusion energy program; and
- D. Advice and guidance on any issues relating to the fusion energy program as requested by the Secretary or the Director, Office of Energy Research.

8. Health and Environmental Research Advisory Committee

The Health and Environmental Research Advisory Committee (HERAC) was established on November 22, 1983. The HERAC was established to conduct periodic reviews of elements of the Health and Environmental Research Program and provide advice on long-range plans, priorities, and strategies to address more effectively the scientific aspects of energy-related health and environmental issues of Departmental policies and programs. Advice would also be sought on appropriate levels of funding to develop those plans, priorities, and strategies, and to help maintain appropriate balance between competing elements of the program.

9. High Energy Physics Advisory Panel

The High Energy Physics Advisory Panel (HEPAP) was established on January 13, 1967. The HEPAP was established to provide advice and guidance on a continuing basis to the Secretary of Energy, through the Director of Energy Research, on the national high energy physics research program, including:

- A. periodic reviews of the program and recommendation of any changes considered desirable on the basis of scientific and technological advances or other factors;
- B. advice on long-range plans, priorities, and strategies for the national high energy physics program;
- C. advice on recommended appropriate levels of funding to assure a world leadership position, and to help maintain appropriate balance between competing elements of the program; and
- D. advice and guidance on any issues relating to the program as requested by the Secretary or the Director of Energy Research.

10. Hydrogen Technical Advisory Panel

The Hydrogen Technical Advisory Panel was established by the Spark M. Matsunaga Hydrogen Research, Development, and Demonstration Act of 1990, Public Law 101-566, Section 108, and was chartered on June 13, 1991. The HTAP will advise and make any necessary recommendations to the Secretary of Energy on the following items:

- A. the implementation and conduct of programs required by the Act;
- B. the economic, technological, and environmental consequences of the deployment of hydrogen production and use systems; and
- C. the contents of the comprehensive 5-year program plan required by the Act.

11. Inertial Confinement Fusion Advisory Committee/Defense Programs

The Inertial Confinement Fusion Advisory Committee/Defense Programs (ICFAC/DP) was established on April 14, 1992. The ICFAC/DP provides advice and guidance to the Assistant Secretary for Defense Programs on both technical and management aspects of the inertial confinement fusion program.

12. Metal Casting Industrial Advisory Board

The Metal Casting Industrial Advisory Board (MCIAB) was established by the Department of Energy Metal Casting Competitiveness Research Act of 1990, Public Law 101-425, Section 7 and was chartered on February 5, 1991. The MCIAB will advise the Secretary of Energy on the implementation of the selection criteria of a required solicitation of proposals for establishing at least four National Metal Casting Research Institutes in the different census regions where the metal casting industry is concentrated, and on otherwise carrying out his responsibilities under the Department of Energy Metal Casting Competitiveness Research Act. On an annual basis the MCIAB will also review the Secretary's solicitation and selection of research proposals and make recommendations as to how each such activity can be altered so as to better achieve the purposes of this Act; and review the research activities of each selected applicant, and the selected applicant's management plan, and report its findings and recommendations to the Secretary.

13. National Coal Council

The National Coal Council (NCC) was established on November 21, 1984 to provide advice and recommendations on a continuing basis as requested by the Secretary of Energy on general policy matters relating to coal, including:

- A. Federal policies which affect, directly or indirectly the production, marketing, and use of coal;
- B. plans, priorities, and strategies to address more effectively the technological; regulatory, and social impact issues relating to coal production and use;
- C. appropriate balance between various elements of federal coal-related programs;
- D. scientific and engineering aspects of coal technologies, including emerging coal conversion, utilization, or environmental control concepts; and
- E. the progress of coal research and development, pursuant to the Office of Coal Research Act, Public Law 86-599.

14. National Electric and Magnetic Fields Advisory Committee

The National Electric and Magnetic Fields Advisory Committee (EMF) was established by the Energy Policy Act of 1992, Section 2118(d)(1) and was chartered on January 14, 1993. The EMF advises the Secretary of Energy and the Director of the National Institute of Environmental Health Sciences with respect to the design and implementation of the program, including preparation of solicitations for proposals to conduct research under the program. The committee will review reports that summarize activities and their results from individuals who conduct activities under the program. The committee will provide advice to the Interagency Committee on Electric and Magnetic Fields in legislatively mandated reports to the Secretary of Energy and the U.S. Congress.

15. National Petroleum Council

The National Petroleum Council (NPC) was established by the Secretary of Interior on May 3, 1946, at the request of President Harry S. Truman. The NPC was transferred to the Department of Energy after DOE's formal establishment on October 1, 1977. The NPC was established to continue government-industry cooperation which had begun during World War II and currently provides the Secretary of Energy with advice, information, and recommendations on matters relating to oil and gas or the oil and gas industry.

16. DOE/NSF Nuclear Science Advisory Committee

The DOE/NSF Nuclear Science Advisory Committee (NSAC) was established September 23, 1977. The NSAC was established to provide advice upon request to both the Department of Energy and the National Science Foundation on scientific priorities within the field of basic nuclear science research. Basic nuclear research is understood to encompass experimental and theoretical investigations of the fundamental interactions, properties, and structures of atomic nuclei.

16. Secretary of Energy Advisory Board

The Secretary of Energy Advisory Board (SEAB) was established on January 2, 1990. The SEAB was established to advise the Secretary of Energy on the research, development, energy, and national defense responsibilities, activities, and operations of the Department of Energy (DOE) and to provide expert guidance in these areas to the DOE.

17. State Energy Advisory Board

The State Energy Advisory Board (STEAB) was established by the Energy Policy and Conservation Act, Section 365 (42 U.S.C 6325; the "Act"), and was chartered on November 29, 1991. The STEAB was established to advise the Secretary through the Assistant Secretary for Conservation and Renewable Energy on the following:

- A. energy efficiency goals and objectives of programs and make administrative and policy recommendations to improve these programs;
- B. serve as a liaison between States and the Department of Energy on energy conservation and renewable energy resource programs; and
- C. encourage transfer of the results of the energy conservation and renewable energy activities carried out by the Federal Government.

18. Technical Advisory Committee on Verification of Fissile Material and Nuclear Warhead Controls (Inactive - Requested Termination)

The Technical Advisory Committee on Verification of Fissile Material and Nuclear Warhead Controls (TAC) was established by the National Defense Appropriation Act for Fiscal Year 1991, Public Law 101-510, Section 3151, and was chartered May 16, 1991. The TAC was established to advise the President, through the Secretary of Energy, on the availability, use, and further development of techniques which could be applied to warhead dismantlement, production controls, and disposition. The Committee will assist in preparing a Report to Congress on these issues. The Committee has completed its final report and is inactive while awaiting legislation to terminate.

19. Technical Panel on Magnetic Fusion (Inactive - Requested Termination) The Technical Panel on Magnetic Fusion (TPMF) was established by the Magnetic Fusion Engineering Act of 1980, Public Law 96-386, Section 7, and was rechartered on May 18, 1990. The TPMF was established to perform a review of the conduct of the national magnetic fusion energy program and make recommendations on the following items, among others:

- A. the preparation of the 5-year program plan required by Section 5 of the Act;
- B. the type of future facilities needed to meet the goals of the Act along with their projected completion dates;
- C. the adequacy of participation by universities and industry in the program;
- D. the adequacy of international cooperation in magnetic fusion and any problems associated therewith; and,
- E. institutional, environmental, and economic factors limiting, or prospectively limiting, efforts to achieve commercial application of magnetic fusion energy systems.

BUDGET INFORMATION FOR ADVISORY COMMITTEES

(In Dollars)

FEDERAL ADVISORY COMMITTEES	FY 1995	FY 1996	FY 1997*
Advisory Committee on External Regulation of Department of Energy Nuclear Safety (1)	1,417,178	627,337	0
Advisory Committee on Human Radiation Experiments (2)	4,504,666	0	0
Advisory Committee on Demonstration and Commercial Application of Renewable Energy and Efficiency Technologies (3)	23,450	244,700	252,041
American Statistical Association Committee on Energy Statistics	51,300	56,700	58,401
Basic Energy Sciences Advisory Committee	358,000	417,000	429,510
Environmental Management Advisory Board	1,043,826	913,796	941,210
Environmental Management Site Specific Advisory Board	2,441,150	3,356,610	3,457,308
Federal Advisory Committee to Develop On-Site Innovative Technologies for Environmental Restoration and Waste Management	813,484	856,079	881,761
Fusion Energy Advisory Committee	32,600	128,600	132,458

FEDERAL ADVISORY COMMITTEES	FY 1995	FY 1996	FY 1997*
Health and Environmental Research Advisory Committee	66,600	89,000	91,670
High Energy Physics Advisory Panel	99,600	101,400	104,442
Hydrogen Technical Advisory Panel	97,800	91,200	93,936
Inertial Confinement Fusion Advisory Committee/Defense Programs (4)	58,247	60,425	0

*FY 1996 Budget Request column reflects FY 1995 anticipated costs adjusted upward for all advisory committees, except the Environmental Management Site Specific Advisory Board.

- (1) Advisory Committee terminated December 1995.
- (2) Established by Executive Order 12891, January 15, 1994. Terminated October 1995.
- (3) Formerly the Advisory Committee on Renewable Energy and Energy Efficiency Joint Ventures.
- (4) Committee will be terminated in Fiscal Year 1996.
- (5) Inactive, pending legislation to terminate the committee.
- (6) Inactive, pending legislation to terminate the committee.

ADVISORY COMMITTEE	MEETINGS	REPORTS
Advisory Committee on External Regulation of Department of Energy Nuclear Safety	FY 1995 March 9-10; April 13-14; May 15-16; June 28-29; July 27-28; September 18-19. FY 1996 October 16; and November 28.	FY 1995 Interim Report of the Advisory Committee on Human Radiation Experiments, October 21, 1994. FY 1996 Final Report, December 1995.
Advisory Committee on Human Radiation Experiments	FY 1995 October 11-13; November 14-15; December 15-16; January 19-20; January 30; February 15-17; March 2; March 15-17; April 10-12; May 8-10; June 21-23; and July 17-19. FY 1996 None.	FY 1995 Status Report by the Co-Chairs, August 1995. FY 1996 Final Report- Advisory Committee on Human Radiation Experiments, December 1995.
Advisory Committee on Demonstration and Commercial Application of Renewable Energy and Efficiency Technologies	FY 1995 October 6; and June 21, 1995. FY 1996 December 12, 1995.	FY 1995 Report to the Secretary of Energy: Interim Report and Findings, 12/94; Addendum to the 1994 Interim Report, 8/95; and Annual Report under P.L. 101-216, 9/95. FY 1996 None.
American Statistical Association Committee on Energy Statistics	FY 1995 October 27-28; and April 20-21. FY 1996 November 8-9.	FY 1995 None. FY 1996 None.
Basic Energy Sciences Advisory Committee	FY 1995 October 20-21; and January 17-18. FY 1996 February 5-6.	FY 1995 1993/94 Review of the Basic Energy Sciences Program of the Department of Energy, DOE/ER-0638, January 1995. FY 1996 None.

ADVISORY COMMITTEE	MEETINGS	REPORTS
Environmental Management Advisory Board	FY 1995 October 27-28; April 17-18; July 28; and September 14. FY 1996 October 30-31; November 30; and February 15.	FY 1995 Recommendations regarding the following: DOE Risk Report to Congress, July 28; DOE Risk Principles, July 28; CERE Risk Report to DOE, July 28; Barriers to Environmental Technology Commercialization, September 24; EM Budget Development Process, September 14; and Draft EM NEPA Guidance, September 14. FY 1996 None.
Environmental Management Site Specific Advisory Board	FY 1995 80 meetings held. FY 1996 30 meetings held.	FY 1995 See below for list of 63 recommendation. FY 1996 None.
Federal Advisory Committee to Develop On-Site Innovative Technologies for Environmental Restoration and Waste Management	FY 1995 None. FY 1996 None.	FY 1995 Mixed Waste Working Group Annual Report; Mine Waste Working Group Annual Report; Waste Contaminants at Military Bases Working Group Annual Report; Military Munitions Working Group Annual Report; Coordinating Group Report to the DOIT Committee; and Guide to Tribal Community Involvement in Technology Assessment, May 1995. FY 1996 None.
Fusion Energy Advisory Committee	FY 1995 December 1-2. FY 1996 December 7-8; and January 18.	FY 1995 None. FY 1996 None.
Health and Environmental Research Advisory Committee	FY 1995 November 7-8. FY 1996 October 31-November 1.	FY 1995 Protection of Human Research Subjects, May 1994; Human Genome Project, November 1994; and Program for Ecosystem Research, November 1994. FY 1996 None.
High Energy Physics Advisory Panel	FY 1995 November 18-19; March 2-3; May 7-8; and September 18-19. FY 1996 December 11-12, and February 27-28.	FY 1995 High Energy Physics Advisory Panel's Subpanel on Accelerator-Based Neutrino Oscillation Experiments (DOE/ER-0662). FY 1996 None.
Hydrogen Technical Advisory Panel	FY 1995 March 6-7; July 24-25; and September 21-22. FY 1996 None.	FY 1995 The Green Hydrogen Report - The 1995 Progress Report of the Secretary of Energy's Hydrogen Technical Advisory Panel, August 1995. FY 1996 None.
Inertial Confinement Fusion Advisory Committee/Defense Programs	FY 1995 June 6-8. FY 1996 November 14-15.	FY 1995 Inertial Confinement Fusion Advisory Committee Chairman's Letter Report to the Assistant Secretary for Defense Programs on October 2, 1995. FY 1996 None.

ADVISORY COMMITTEE	MEETINGS	REPORTS
Metal Casting Industrial Advisory Board	FY 1995 February 28-March 1; and August 1-2. FY 1996 None.	FY 1995 None. FY 1996 None.
National Coal Council	FY 1995 November 1-2; February 21; and May 17. FY 1996 November 15-16.	FY 1995 A Critical Review of Efficient and Environmentally Sound Coal Utilization Technology, May 1995. FY 1996 None.
National Electric and Magnetic Fields Advisory Committee	FY 1995 March 14-15. FY 1996 November 16-17.	FY 1995 None. FY 1996 None.
National Petroleum Council	FY 1995 August 9. FY 1996 None.	FY 1995 Research, Development, and Demonstrations Needs of the Oil & Gas Industry, August 1995; Future Issues-A View of U.S. Oil & Natural Gas to 2020, August 1995. FY 1996 None.
Secretary of Energy Advisory Board	FY 1995 October 12; December 15; January 25; February 1; March 30; April 25; and June 13. FY 1996 October 26.	FY 1995 Final Report: Energy R&D Shaping Our Nation's Future in a Competitive World, Annex 1 - Technology Profiles, Annexes 2-4 - Supporting Material, June 1995; and Final Report: Alternative Futures for the DOE National Laboratories with White Papers, February 1995. FY 1996 None.
State Energy Advisory Board	FY 1995 November 3-4; March 23-24; July 20-21. FY 1996 November 30-December 1.	FY 1995 A Climate of Change in Energy Efficiency and Renewable Energy, January 1995. FY 1996 None.
Technical Advisory Committee on Verification of Fissile Materials and Nuclear Warhead Controls (Inactive)	FY 1995 None. FY 1996 None.	FY 1995 None. FY 1996 None.
Technical Panel on Magnetic Fusion (Inactive)	FY 1995 None. FY 1996 None.	FY 1995 None. FY 1996 None.

Department of Energy (DOE)
Environmental Management Site-Specific Advisory Board
Fiscal Year 1995 Annual Report
GSA Committee ID Number: 1889

Attachment for term number 16b on GSA Form T-822H: List of Report Titles/Dates

- 1) Recommendations on the Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental and Waste Management Draft Environmental Impact Statement (9/30/94)
- 2) Recommendations on the Idaho National Engineering Laboratory Draft Site Treatment Plan (12/7/94)

- 3) Recommendations on the Department of Energy Idaho Operations Office, FY 1995 Draft Workforce Restructuring Plan (2/8/95)
- 4) Recommendations on the Environmental Management Budget (2/22/95)
- 5) Recommendations on the Long-Term Land Use Future Scenarios for the Idaho National Engineering Laboratory (5/2/95)
- 6) Recommendations on the Proposed Nuclear Weapons Non Proliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel (6/20/95)
- 7) Recommendations on the Department of Energy-Owned Spent Nuclear Fuel Strategic Plan (6/20/95)
- 6) Recommendations on the Groundwater Contamination at Test Area North at the Idaho National Engineering Laboratory (6/21/95)
- 9) Recommendations on the Integration of Environmental Management Activities at the Idaho National Engineering Laboratory (8/2/95)
- 10) Recommendations on the Stationary Low-Power Reactor-1 and the Boiling Water Reactor Experiment Burial Grounds (Operable Units 5-05 and 6-01) and Central Facility Area Landfills I, II, III (Operable Unit 4-03) (8/2/95)
- 11) Vote on Recommendation to DOE on Disposal of Mill Tailings (12/13/95)
- 12) Recommendation to Deed the Monticello Millsite to the City of Monticello (7/26/95)
- 13) Notice of Intent for a Site-Wide Environmental Impact Statement for the Nevada Test Site: Comments from the Nevada Test Site Community Advisory Board (11/10/94)
- 14) Recommendations on-Nevada Environmental Restoration Funding Equity Issues (11/29/95)
- 15) Recommendations on the Waste Generator Fees System Structure (12/3/94)
- 16) Comments on Guidance on Identifying Goals for Evaluation of the SSAB Initiative (3/31/95)
- 17) Comments on the Fernald, Ohio, Remedial Investigation/Feasibility Study (RI/FS) for Operable Unit 6 (5/26/95)
- 18) Nevada Test Site Environmental Impact Statement Transportation Recommendations (5/95)

- 19) Recommendations on the Environmental Impact Statements Being Considered for the Nevada Test Site (8/24/95)
- 20) Comments on the Proposed FY 1997 NTS Budget (8/25/95)
- 21) Interim Recommendations Report for Cleanup and Future Use (11/94)
- 22) Recommendations on Remediation Levels, Waste Disposition, Priorities, and Future Use (7/95)
- 23) Comments on the Independent Scientific Peer Review (ISPR) of Significant SRS Environmental Documents (10/25/95)
- 24) Recommendations on the Industrial/Residential Land Use Guidelines for CERCLA Near Term Decisionmaking (1/24/95)
- 25) Recommendations on the ISPR of Groundwater Remediation Technologies in A/M, F and H Areas (3/28/95)
- 26) Transuranic Waste Treatment Plan Recommendation (Waste Management EIS) (3/28/95)
- 27) Recommended Performance and Screening Criteria for the Foreign Research Reactor EIS (3/28/95)
- 28) Recommendation on Foreign Research Reactor Spent Nuclear Fuel Draft EIS (6/20/95)
- 29) Recommendation to Conduct Tritium Health Effects Study (7/25/95)
- 30) Recommendation on the Future Uses of Savannah River Site (nine-part recommendation) (9/26/95)
- 31) Recommendation on the Implementation of the F&H Groundwater Remediation Project (9/26/95)
- 32) Recommendation to Develop and Implement Long-term Comprehensive Strategic Environmental Remediation Plan (9/26/95)
- 33) PPCAB Position and Advice on ER/WM Funding at Pantex for FY 97 (4/10/95)
- 34) PPCAB Position on Content and Agreement in Principle with Texas DOE (4/20/95)
- 35) Recommendations on the Community Values Regarding Stockpile Management EIS (7/31/95)
- 36) Recommendations on Spent Fuel (11/3/95)

- 37) Recommendations on the Systems Requirements Review of Tank Waste Remediation System (12/1/94)
- 38) Recommendations on 1995 Funding Allocations (12/2/94)
- 39) Recommendations on Environmental Restoration Refocusing (12/2/94)
- 40) Recommendations on Carbon Tetrachloride Pump and Treat (12/2/94)
- 41) Recommendations on Honor TPA in Cost-Cutting (1/5/95)
- 42) Site-Specific Flexibility in Allocation of Resources Comments (1/5/95)
- 43) Off-Site Mixed Waste Acceptance Comments (2/3/95)
- 44) Recommendations on the Pursuit of Possible Economic Opportunities at Hanford (Radioisotopes) (2/3/95),
- 45) Recommendations on the CERE Process (3/2/95)
- 46) Recommendations on Spent Fuel Group Initiatives to Access Reprogrammed Funds (3/2/95)
- 47) Recommendations on Fiscal Year 1997 Budget, Parts A thru G (4/7/95)
- 48) Recommendations on Privatization (4/7/95)
- 49) Recommendations on Public Involvement & Timely Public Meetings on Budget (4/7/95)
- 50) Recommendations on Building Partnerships and the Tank 241-C-106 Experience (4/7/95)
- 51) Recommendations on the CERE Report (5/4/95)
- 52) Comments on the Technical Team Review of Proposed New Double Shell Tanks (5/4/95).
- 53) Recommendations on the 100 Area Cleanup (5/4/95)
- 54) Recommendations on TWRS Privatization (6/1-2/95)
- 55) Recommendations on Consolidating Public Involvement Activities (6/12/95)
- 56) Recommendations on Defending the TPA in the face of Emerging Legislative Initiative (6/1 -2/95)

- 57) Recommendations on the 100 Area Remediation (8/3-4/95)
- 58) Recommendations on the Risk Initiative Report (8/3-4/95)
- 59) Recommendations on the Stewardship and Stockpile Scoping Hearings (8/34/95)
- 60) Recommendations on the June 22, 1995, "Exercise Oz" Emergency Drill (9/7/95)
- 61) Recommendations on the M-33: Integrated Strategy for the Acquisition of Facilities for Storage, Processing, and/or Disposal of Solid Waste and Materials (9/7/95)
- 62) HAB Advice on TWRS Privatization (10/5-6/95)
- 63) Recommendations on the Management and Integration Contract (10/5-6/95)

Q14. Please describe all the instruments used by the DOE to share the cost of programs with industry, including contracts, cooperative agreements, Cooperative Research and Development Agreements (CRADAs), cost-shared contracts, Environmental Cleanup Technology Transfer Work, personnel exchanges, Small Business Innovation Research (SBIR) and Small Business Technology Transfer Pilot (STTR) Program grants, technical assistance, user facilities, and "technology maturation." Please provide the funding by program for fiscal years 1995, 1996, and 1997 for each funding mechanism.

A14. Attached is a DOE document entitled "Partnering in Technology with the Federal Government" which includes descriptions of those instruments used by DOE to share the cost of programs with industry. Described in the document are all of the instruments identified in the question except for Environmental Cleanup Technology Transfer Work, technical assistance, and technology maturation. Those instruments are described below.

Environmental Cleanup Technology Transfer Work: instruments that primarily utilize cost-shared contract arrangements wherein the purpose is technology leveraging, i.e., sharing the costs, risks and the benefits of an environmental cleanup project with the private sector.

Technical Assistance: a consulting arrangement whereby scientists and engineers at the DOE laboratories and facilities offer assistance in their areas of technical expertise to a private sector party. Laboratory and facility staff are generally free to consult for a fee. These arrangements involving technical assistance can lead to more complex, cooperative relationships.

Technology Maturation: an activity which involves additional research and development to facilitate the transfer of technology with the purpose to facilitate the commercialization of new or existing technology by U.S. industry. Technology maturation can also occur as part of a CRADA or other technology transfer arrangement with a recipient. Candidate technologies requiring further development to realize their commercialization potential are selected according to defined and documented criteria. Such criteria include: substantiation of commercial potential, potential to support U.S. competitiveness objectives, maintenance or enhancement of laboratories' skills and capabilities, recognition of the technology as a critical technology militarily or economically. Research and development costs for technology maturation are supported by direct program funding, and/or revenues generated as a result of laboratory technology transfer activities, and are not funded from laboratory overhead.

 Partnering in Technology

 Federal Government

A Quick Reference

Finding Technologies

Virtually every area of science and technology is addressed by the knowledge and expertise of people working in the federal research and development (R&D) laboratories and facilities. There are more than 700 federal research and development laboratories and facilities employing over 100,000 scientists and engineers.

These federal laboratories are looking to industry to transfer federal technologies and expertise to improve the U.S. economy. Valuable and complimentary resources exist to locate research, technical information, or staff expertise available from federal sources for transfer to industry for commercialization. Most federal agencies have established an office within its organization to implement technology transfer. In addition to these offices, the following organizations form the backbone of a national technology transfer network and coordinate their response to inquiries to ensure that comprehensive and appropriate information is provided.

FINDING TECHNOLOGIES

Technology Transfer Network			
Resource	Purpose	Service	Contact
Federal Laboratory Consortium Locator Network	The Federal Laboratory Consortium for Technology Transfer (FLC) promotes and facilitates the movement of federal R&D into the mainstream of the U.S. economy. FLC members include all major federal R&D laboratories, centers, and their parent agencies.	The Consortium operates an FLC locator network comprising the technology transfer officers located within the federal laboratories. The network provides a technology support system to help firms capitalize on federal resources. A central locator within the FLC network helps in accessing the federal R&D laboratories and centers by matching technical requests for technologies, expertise, and facilities with appropriate federal laboratory capabilities.	FLC Administrator: George Linsteadt (206) 683-1005 or contact one of the six FLC Regional Coordinators listed in the following chart

Resource	Purpose	Service	Contact
National Technology Transfer Center (NTTC)	The NTTC has three major functions: • to serve as a gateway to a national technology transfer network • to provide education and training to leaders in business, government, and economic development circles concerning the best ways to implement technology procedures • to perform outreach services to develop working relationships and agreements with trade and professional associations and sources for technology transfer	The NTTC offers free service in assisting industry in locating the appropriate information and technical resources within the federal R&D sector. The NTTC works very closely with six Regional Technology Transfer Centers (RTTCs) located in separate regions of the United States.	Executive Director: Lee Rivers Phone: (800) 678-NTTC
Regional Technology Transfer Centers (RTTCs)	The RTTCs are sponsored by NASA in support of the federal technology transfer mission.	The centers provide a full range of services to U.S. firms, industry within their regions, assisting clients to locate, assess, acquire, and commercialize technologies from throughout NASA and the federal R&D base.	Contacts for the RTTCs are listed in the following chart.

FINDING TECHNOLOGIES (continued)

Regional Contacts for the Technology Transfer Network		
Region	FLC Regional Coordinator	RTTC Contact
 Far West Region	Geoff Phillips DOD-Advanced Manufacturing Center (916) 643-1248	Robert L. Stark University of Southern California (213) 743-6132
 Midcontinent Region	Douglas Blair DOD-Air Force Armstrong Laboratory (210) 536-3817	Gary Sera Texas Engineering Experiment Station (409) 845-0538
 Midwest Region	T.F. Schoenborn HHS-Nat'l Inst. for Occupational Safety & Health (513) 841-4305	Joseph W. Ray Great Lakes Industrial Technology Transfer Center (216) 734-0094

FINDING TECHNOLOGIES (continued)

Working with the Federal Government

The federal laboratories, and the agencies who manage them, are looking to industry to transfer federal technologies and expertise for commercial applications that will improve the U.S. economy. This reference lists characteristics and features of ways to access the knowledge and expertise of the federal laboratory system and work with the federal government.

Ways to Work With the Federal Government	
Mechanism	Description
Collegial Interchange	The informal and free exchange of information among colleagues
Technical Assistance	Provided to a private sector party by laboratory/facility personnel to further technology transfer
Cooperative Research and Development Agreement (CRADA, also known as CRDA)	An agreement between one or more federal laboratories and one or more non-federal parties under which the government, through its laboratories, provides personnel, facilities, equipment, or other resources with or without reimbursement (but not funds to non-federal parties)
Contract	An acquisition instrument entered into between the government and a contractor for the contractor to provide supplies or services to the government

Mechanisms	Description
Co-funded and Cost-shared Contract	A contract entered into between the government and a non-federal party in which costs associated with the work are shared as specified in the contract
Grant and Cooperative Agreement (Assistance Instruments)	An agreement between the government and a recipient whereby money or property is transferred to the recipient to support or stimulate research
Licensing from the government or laboratory/facility to the private sector	The transfer of less-than-ownership rights in intellectual property to a third party, to permit the third party to use intellectual property
Personnel Exchange	A transfer of personnel either to the laboratory/facility from another party or from the laboratory/facility to another party to exchange expertise and information
Small Business Innovation Research (SBIR) Program	Federally funded to promote small business participation in government programs
Use of Facilities	Unique, complex, experimental scientific facilities, including equipment and expertise at a government laboratory, designated by the government for use by the technical community, universities, or industry

NOTE: There are two main types of laboratories associated with the federal government. Employees of a government-owned, government-operated laboratory are federal employees. Employees of a government-owned, contractor-operated laboratory are employed by the contractor which manages and operates the laboratory. The requirements of these two types of laboratories differ somewhat in implementing technology transfer mechanisms; these differences are not noted in this reference.

WORKING WITH THE FEDERAL GOVERNMENT

Collegial Interchange		
Mechanism	Description	Characteristics/Features
Collegial interchange, conference, publication, databases, and technical information centers	The informal and free exchange of information among colleagues	• Often becomes a precursor to longer-term interactions between a company and a federal R&D center • Includes: – presentation at professional and technical conferences – publication in professional magazines – identification of licensable technologies, software and research-in-progress through commercial and government databases and technical information centers NOTE: Parties sometimes use non-disclosure agreements prior to receiving or giving out proprietary information

Technical Assistance		
Mechanism	Description	Characteristics/Features
Technical assistance provided by laboratory/facility personnel	Provided to a private sector party by laboratory/facility personnel to further technology transfer	• Laboratory must approve of the laboratory/facility personnel consulting arrangement • Conflict of interest on the part of the laboratory staff must be avoided

Collegial Interchange, Technical Assistance

CRADA		
Mechanism	Description	Characteristics/Features
Cooperative Research and Development Agreement (CRADA, also known as CRDA)	An agreement between one or more federal laboratories and one or more non-federal parties under which the government, through its laboratories, provides personnel, facilities, equipment, or other resources with or without reimbursement (but no federal funds may flow to non-federal parties)	• Although the collaboration involves the expenditure of federal funds and the use of federal personnel, services, equipment, intellectual property or other resources, no federal funds may flow to the CRADA partner • The non-federal parties may provide funds, personnel, services, facilities, equipment, or other resources to conduct specific research or development efforts that are consistent with the laboratory's mission • A CRADA is not a procurement contract, grant or cooperative agreement as those terms are used in 31 USC 6303-6305 • ✓ Rights to inventions and other intellectual property are negotiated as part of the CRADA agreement • Certain generated information (of non-federal party or laboratory) that qualifies as protected CRADA information may be withheld from public dissemination for a period of time up to 5 years

Mechanism	Description	Characteristics/Features
		• Special consideration is given to small businesses and consortia involving small businesses • Preference is given to businesses that are located in the United States and agree to manufacture substantially in the United States products that embody inventions developed under the CRADA or are produced using inventions developed under the CRADA • U.S. government always retains a nonexclusive or nontransferable, irrevocable, and paid-up license to practice any invention developed under a CRADA for governmental purposes • Federal departments and agencies are developing general policy guidelines. For example: – IR&D funds may be used as a CRADA contribution in the case of DOD and NASA contractors, providing costs would have been allowable as IR&D had there been no CRDA

CRADA

CRADA (continued)		
Mechanism	Description	Characteristics/Features
CRADA (continued)		– For DOE laboratories: ■ Each CRADA must have a joint work statement (JWS) approved by DOE and each CRADA must be reviewed and approved by DOE ■ CRADAs are cost shared; typically are "no funds" exchange arrangements with a non-federal party and laboratory performing their respective parts of the Statement of Work. The non-federal party may provide a "fund-in" contribution to the laboratory. ■ DOE has granted a class patent waiver to inventions arising out of

CRADA (continued)

Contract		
Mechanism	Description	Characteristics/Features
Contract	An acquisition instrument entered into between the government and a contractor for the contractor to provide supplies or services to the government	• Can be used to fund R&D that may be transferred to the private sector • Allocation of patent rights determined by the type of contractor performing the work – Large businesses may frequently obtain a waiver on inventions where waiver criteria are satisfied – Nonprofit organizations/small businesses may obtain title to inventions under the Patent and Trademark Amendments Act of 1980 (Public Law 96-517)

Co-funded and Cost-shared Contract		
Mechanism	Description	Characteristics/Features
Co-funded and Cost-shared Contract	A contract entered into between the government and a non-federal party in which costs associated with the work are shared as specified in the contract	- Includes in-cash or in-kind arrangements - Must be of mutual benefit to industry and government - Commercially valuable data may be protected for a limited period of time - Advance waivers frequently not granted unless the contractor share at least 20% of the total contract cost

Grant and Cooperative Agreement (Assistance Instruments)		
Mechanism	Description	Characteristics/Features
Grant and Cooperative Agreement (Assistance Instruments)	An agreement between the government and a recipient whereby money or property is transferred to the recipient to support or stimulate research	Only the government can enter into these agreements; laboratories cannot

Contract, Grant, Cooperative Agreement

Licensing from the Government or Laboratory/Facility to the Private Sector		
Mechanism	Description	Characteristics/Features
Licensing from the government or laboratory/facility to the private sector	The transfer of less-than-ownership rights in intellectual property to a third party, to permit the third party to use intellectual property	• Can be exclusive or non-exclusive, for a specific field of use, geographical area, or U.S. or foreign usage • Potential licensee must present plans and intentions to commercialize the invention • Follows General Services Administration (GSA) issued licensing regulations with preference for non-exclusive licenses being granted. Where exclusive license is requested, requires a notice of availability, an opportunity for the public to object, and plans and intentions to commercialize • Government obtains a non-exclusive, royalty-free world-wide license to the invention

Personnel Exchange		
Mechanism	Description	Characteristics/Features
Personnel Exchange	A transfer of personnel either to the laboratory/facility from another party or from the laboratory/facility to another party to exchange expertise and information	• Generally no proprietary data are exchanged • Cost is paid by the organization sending the personnel • Programs are short-term (usually one year)

Licensing, Personnel Exchange

Small Business Innovation Research (SBIR) Program		
Mechanism	Description	Characteristics/Features
Small Business Innovation Research (SBIR) Program	Federally funded to promote small business participation in government programs	• Data have a 2-year confidentiality limit • Small business acquires title to inventions • Provides multiple funding phases from feasibility to private commercialization

Use of Facilities		
Mechanism	Description	Characteristics/Features
Use of Facilities	Unique, complex, experimental scientific facilities, including equipment and expertise at a government laboratory, designated by the government for use by the technical community, universities, industry, other laboratories, and other government facilities	• Includes designated user facilities and other user resources • Research may be conducted on a proprietary or non-proprietary basis • Full-cost recovery is required for proprietary R&D • Class patent waiver granted in which title goes to the user and the user's proprietary data can be protected • For non-proprietary R&D, title to inventions goes to the user but data generated are freely available • If funded under another government contractor or international agreement, users are subject to those intellectual property clauses

SBIR, Use of Facilities

Glossary

Background Patent	A patent that was in existence prior to the CRADA, i.e., the invention described and claimed in the patent must have been conceived outside of the CRADA and not first actually reduced to practices under the CRADA.
Class Waiver	A special type of waiver that affects all members or all activities of a specified class. For technology transfer purposes, an example is the class waiver of DOE's right to obtain title to inventions developed under CRADAs to permit negotiation of these title rights by CRADA participants, whether they be GOCOs or others.
Contract	An acquisition instrument entered into between the government and a contractor for the contractor to provide supplies or services to the government. Often used to promote research and development that can subsequently be transferred to the private sector.
Copyright	Legal protection provided for original works of authorship fixed in a tangible medium of expression as provided for in Title 17 of the United States Code. Examples of some works that are copyrightable: writings, paintings, movies, sculptures, and computer software.
Cost-Shared Contract	Include in-cash or in-kind arrangements. Patent rights are allocated as described in the contract.
CRADA (also known as CRDA)	A cooperative research and development agreement as provided for by Title 15 of the United States Code. This agreement is between one or more federal laboratories and one or more nonfederal parties under which the laboratory may provide personnel, services, facilities, equipment, intellectual property, or other resources (but not funds) with or without reimbursement to the nonfederal parties. The nonfederal parties may provide funds, personnel, services, facilities, equipment, or other resources to conduct specific research or development efforts that are consistent with the federal laboratory's mission.
Dual Use	A technology that has military and commercial applications.
Exchange Programs	Short-term (usually one year or less) agreements between the laboratory and others to interchange information by the unilateral or bilateral exchange of personnel. Generally, no proprietary data are exchanged, and costs are borne by the organization sending the personnel.
Exclusive Patent License	A right granted by a patent owner to one or more licensees to provide for the exclusive legal right to make, use, or sell the patented invention in the United States. If several parties are licensees, then such licenses are called partially exclusive licenses.

FLC	Federal Laboratory Consortium for Technology Transfer. The organization of federal research and development laboratories and centers established pursuant to Section 10(e) of reference (b) (codified in Title 15 U.S.C. Section 3710(e)). It was formed to identify and mobilize the necessary resources to provide the environment, organization, and necessary technology transfer mechanisms required for the fullest possible utilization of federally sponsored research and development.
FOCI	Foreign-owned, -controlled, or -influenced.
FOIA	Freedom of Information Act.
FTTA	Federal Technology Transfer Act of 1986 (PL 99-502).
GOCO	Government-Owned, Contractor-Operated (facility).
GOGO	Government-Owned, Government-Operated (facility).
Intellectual Property	An intangible right that can be bought and sold, leased or rented, or otherwise transferred between parties in much the same way that rights to real property or other personal property can be transferred.
Invention	Any innovation or discovery which is or may be patentable or otherwise protected under Title 35 U.S.C., or any novel variety of plant which is or may be protected under the provision of the Plant Variety Protection Act, Title 7 U.S.C.
Laboratory	A facility or group of facilities owned, leased, or otherwise used by a federal agency, a substantial purpose of which is the performance of research, development, or engineering by employees of the federal government.
License	The contract that gives permission to make, use, or sell a patented product or process. Licensing can be exclusive or nonexclusive, for a specific field of use, for a specific geographical area, or U.S. or foreign. If ownership is transferred, it is called an assignment.
Mask Work	A series of related images, however fixed or encoded, having or representing the predetermined, three dimensional pattern of metallic insulating or semiconductor material, present or removed from the layers of a semiconductor chip product; and in which series the relation of the images to one another is that each image has the pattern of the surface of one form of the semiconductor chip product. Source: 17 U.S. Code 901 (a) (2)
NCTTA	National Competitiveness Technology Transfer Act of 1989.
Nonexclusive License	Right granted by patent holder to licensee to use, manufacture, and sell patented article. A nonexclusive license allows the patent holder to grant additional licenses for a patented article.

GLOSSARY

Glossary (continued)

NTTC	National Technology Transfer Center. The NTTC was established to serve as a gateway to a national technology transfer network, to provide education and training to leaders in business, government, and economic development circles concerning the best ways to implement technology transfer procedures, and to perform outreach services to develop working relationships and agreements with trade and professional associations and sources for technology transfer.
ORTA	Office of Research and Technology Applications is an organizational unit created under Public Law 96-480. The primary function of this office is to disseminate information on federally owned or originated products, processes, and services linking the research and development resources of the federal laboratories, and the federal government as a whole, to state and local government and the private sector.
Patent	A grant from the federal government to an inventor wherein, in exchange for the inventor providing an enabling disclosure of the invention and complying with other legal requirements, the government awards the inventor with the right to exclude others from making, using, or selling the claimed invention for a period of time, usually 17 years.
Proprietary Information	Information which embodies trade secrets developed at private expense and commercial or financial information which is privileged or confidential under the Freedom of Information Act. Normally, for such information to be afforded legal protection, it should be recorded and marked as proprietary. Note: Related terms sometimes used are <i>restricted computer software</i> and <i>limited rights data</i> .
Patent Royalty	Monies or other consideration usually payable to a patent owner by a licensee of the covered patent.
RTTC	Regional Technology Transfer Center. The RTTCs, established in the six FLC regions spanning the United States, are sponsored by NASA in support of the federal technology transfer mission. The centers provide a full range of services to U.S. firms and industry within their regions, assisting clients to locate, assess, acquire, and commercialize technologies from throughout NASA and the federal R&D base.
Small Business	A business defined as a small business by the Administrator of the Small Business Administration in accordance with 15 U.S.C. 632 and implementing regulation (e.g., 13 CFR 121.3-8 and 13 CFR 121.3-12). For many businesses, this designation is determined by its industrial classification, the number of its employees (e.g., less than 500), and its competitive relationship to other businesses in that industry.

SBIR	The Small Business Innovation Research (SBIR) Program is federally funded to promote small business participation in government programs. Characteristics of the arrangement include a 2-year confidentiality limit on data, ability of the contractor to acquire title to inventions, and multiple funding phases from feasibility to private commercialization.
STTR	The Small Business Technology Transfer (STTR) program requires five federal agencies to fund cooperative research and development projects involving a small company and a researcher at a university, federally funded research and development center, or nonprofit institution.
T2	Technology transfer.
Technology Transfer	The process by which technology, knowledge, and information developed in one organization, one area, or for one purpose applied or used in another organization, in another area, or for another purpose.
Title	An intangible legal right of ownership to property.
Trademark	Establishes a unique expression to identify the source of goods or services for commercial purposes. Trademark registration can be obtained from the federal government and often from state governments.
Trade Secret	Provides the right for withholding any commercial formula, device, pattern, process, or information that affords a businessperson an advantage over others who do not know it.
TRP	Technology Reinvestment Program. A federally-funded program to help U.S. companies convert defense-related technologies to commercial applications or to combined civilian-military use.
User Facilities	Unique, complex, experimental, scientific facilities, equipment, software, and collection of expertise at a government laboratory specifically designated by the cognizant agency for use by the technical community, including universities, industries, other laboratories, and other government entities.
Waiver	The relinquishment of a legal right to do something. In technology transfer agreements, this right is usually the right of the government to obtain title to inventions developed under an agreement.

GLOSSARY (continued)

Q15. Please provide a complete listing of all Solar and Renewable Energy-funded CRADA's including, for each, current-year (FY 1996) funding and out-year funding requirements to complete.

A15. Following listing of CRADAs funded through Solar and Renewable Energy (In Thousands of \$):

Organization/Participant	FY 1996 Funding	Out-Year Funding
Seimens Solar Industries (SNL)	12	0
ASE Americas (SNL)	100	170
Martin Manetta (NREL)	50	0
Crystal Systems (NREL)	50	50
Energy Conversion Devices (NREL)	200	0
Energy Photovoltaics, Inc. (NREL)	40	0
International Radiation Detectors (NREL)	10	0
Direct Contact Condenser Improvements for Cooling Towers (NREL and Pacific Gas & Electric)	200	0
Tests of Thermally Conductive Composites for Heat Exchanger-Tubing at the Salton Sea Geothermal Power Plant (NREL/BNL/California Energy Company)	180	0
Test of New Waste Reduction Technology at The Geysers Geothermal Power Plant (CET Environmental Services, Inc.)	200	200
Intermagneics (ANL)	400	0
Oxford Instruments (ANL)	300	0
Oxford Instruments (LANL)	540	0
Martin Manetta (LANL)	330	0
National High Magnetic Field Lab (LANL)	260	0
General Electric (NREL)	150	0
Electric Power Research Institute (ORNL)	176	0
Oxford Superconducting (ORNL)	150	0
Nuclear Metals/AT&T (SNL)	286	0
System Integration Ommunion Power Engineering (SNL)	320	320
Kenetech Windpower (NREL)	200	200
Kenetech Windpower (SNL)	200	0
Zond Systems Z-46 Turbine (NREL) (CRADA under negotiation)	100	100
Northern States Power (NREL) (CRADA under negotiation)	50	50
Assist Zond Systems in building improved blades by transfer of SNL-developed non-destructive testing techniques to manufacturing and testing Zond Systems' blades	100	100
Rockwell (SNL)	404	333
Hydrogen Power Corporation (LANL)	300	0
Development of a Fiber-Optic Sensor for Hydrogen Leak Detection (NREL) (CRADA under negotiation)	200	0
Texaco (LLNL)	700	0
Total	6,208	1,523

Q16. Please provide a complete listing of all Nuclear Energy-funded CRADA's including, for each, current-year (FY 1996) funding and out-year funding requirements to complete.

A16. While no CRADA's have been awarded in FY 1996, two CRADA's were awarded in FY 1995 for which FY 1996 funding will be provided. Pertinent information about each activity follows:

Advanced Weigh-in-Motion System for Weighing Vehicles at High Speeds

- Develop and commercialize, using DOE developed technology, advanced weigh-in-motion system including assessment of various sources of error that might effect high-speed weight measurement, evaluation of emerging technology, test and demonstration system and sensors in a mainline environment, collect and analyze data from sensors, and develop advanced weight determination algorithm and electronic equipment for proof-of concept. The estimated cost saving to the carriers is over \$15 million per day. Savings will be passed to customers.
- Industry Partner: International Road Dynamics Inc.
- CRADA Manager: Oak Ridge National Laboratory

Funding
(In Thousands of \$)

	FY 1995	FY 1996	FY 1997
Industry Contribution	550		
Federal Obligations	500		
Estimated Federal Costing	13	247	240

- Start Date: August 1995
- Performance Period: 27 months
- CRADA and Project contain propriety information

Electroluminescent Material for Flat Panel Display

- Develop and commercialize an improved electroluminescent material using DOE develop technologies with potential for various flat panel display and other lighting applications. The goal is to develop flat panel display that is 10 times brighter (2500 foot-lamberts) than conventional display and operate over 10,000 hours.
- Industry Partner: Osram Sylvania Inc.
- CRADA Manager: Oak Ridge National Laboratory

Funding
(In Thousands of \$)

	FY 1995	FY 1996	FY 1997
Industry Contribution	500		
Federal Obligations	500		
Estimated Federal Costing	2	255	243

- Start Date: August 1995
- Performance Period: 24 months
- CRADA and Project contain propriety information

Q17. Please provide a complete listing of all BER-funded CRADA's including, for each, current-year (FY 1996) funding and out-year funding requirements to complete.

A17. BER does not directly fund CRADAs. BER funding for CRADAs in FY 1996 is \$0. Basic Research in the BER program has led to the origination of some CRADAs at the National Laboratories funded from sources other than the BER program.

Q18. Please provide a complete listing of all BES-funded CRADA's including, for each, current-year (FY 1996) funding and out-year funding requirements to complete.

A18. Total BES funding for CRADAs in FY 1996 is \$0. Basic research under BES has led to the origination of about 150 CRADAs at the National Laboratories funded from sources other than BES.

Q19. Please provide a complete listing of all ER Laboratory Technology Transfer-funded CRADA's including, for each, current-year (FY 1996) funding and out-year funding requirements to complete.

A19. The attached table provides a complete listing of all ER Laboratory Technology Transfer-funded CRADAs including out-year funding requirements to complete, as requested. The industrial partner for these projects brings matching contributions or better.

Funding
(In Thousands of \$)

Laboratory	Project Title	Partner	City	State	FY96	FY97	FY98	FY99
ANL	Development of rapid prototype technology	Spectra Group Limited/Scientific Measurement Systems	Muskegon Austin	OH TX	280			
ANL	Studies of sealing processes and inhibition in industrial boiler and cooling water systems	NALCO Chemical Corp.	Naperville	IL	290			
ANL	Development of environmentally acceptable microbial corrosion control methods	The Gas Company	Los Angeles	CA	280			
ANL	Development of LUMELOID, a solar energy conversion material	Advanced Research Development, Inc.	Athol	MA	100	200		
ANL	Application of high performance computing to automotive design and manufacturing	USCAR, Supercomputing Automotive Applications (SAA) and University of Michigan	Dearborn	MI	200	300		
ANL	Wear- and corrosion-resistant coatings for plastics exposed to alcohol fuel environments	GMAC Rochester Division	Flint	MI	240

- Q20. Please provide a complete listing of all High Energy and Nuclear Physics-funded CRADA's including, for each, current-year (FY 1996) funding and out-year funding requirements to complete.**
- A20. The High Energy Physics and Nuclear Physics programs have identified no CRADA's active in FY 1996 or FY 1997.
- Q21. Please provide a complete listing of all Fossil Energy R&D-funded CRADA's including, for each, current-year (FY 1996) funding and out-year funding requirements to complete.**
- A21. The table shown below lists only those Fossil Energy (FE) R&D CRADA's which are presently active and which also require DOE funds during FY 1996 and beyond. The funding of CRADA's by FE is provided through the Energy Technology Centers directly out of R&D program funds. This mechanism supports the requirement that tangible mission-related benefits accrue to DOE, in addition, to the private sector stakeholders.

Federal Energy Management Program (FEMP)

CRADAs are funded by the Federal Energy Management Program's New Technology Demonstrations featuring cutting-edge, energy-efficient technologies.

There are three CRADAs with the Pacific Northwest National Laboratory that have been signed and will be completed in FY 1996. The information on these CRADAs follows:

- 1) Demonstrations of natural gas engine driven air conditioning systems at Willow Grove Naval Air Station (NAS), Willow Grove, Pennsylvania. Of the two demonstrations, one is a CRADA. The CRADA was signed in July 1993 and will be completed in FY 1996.

Total Contributions: \$377,424
PNNL/DOE Contributions: \$229,979
NAS Willow Grove: \$58,850
Utility: \$98,595

- 2) Demonstration of natural gas engine drive heat pump at Fort Sam Houston, Texas. The CRADA was signed February 1994 and will be completed in FY 1996.

Total Contributions: \$389,923
PNNL/DOE Contributions: \$169,923
Fort Sam Houston: \$11,000
Manufacturer: \$209,000

- 3) Demonstration of residential water heat conversion from electric to natural gas. The CRADA was signed in 1994 and will be completed in FY 1996.

Total Contributions:	\$86,615
PNNL/DOE Contributions:	\$60,250
Fort Stewart:	\$2,400
Huntsville Corps of Engineers:	\$7,500
Manufacturer:	\$16,465

There are four CRADAs underway, two demonstrations awarded by PNNL, one by NREL, and one by ORNL.

- 1) Demonstration of full-spectrum polarized lighting.

		<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
Total Contributions:	\$101,600	\$25,000	\$76,600	-----
PNNL/DOE Contributions:	\$53,600			
Department of Defense:	\$5,600			
Manufacturer:	\$42,400			

- 2) Demonstration of polarized lighting panels.

		<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
Total Contributions:	\$60,200	\$16,000	\$44,200	-----
PNNL/DOE:	\$40,000			
Department of Defense:	\$5,600			
Manufacturer:	\$14,600			

- 3) Demonstration of a desiccant cooling technology,

		<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
Total Contributions:	\$157,000	\$25,000	\$66,000	\$66,000
NREL/DOE Contribution:	\$67,000			
US Army CERL Contribution:	\$90,000			

- 4) Demonstration of Radiant Control Roofing Technologies.

		<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
Total Contributions:	\$100,625			
ORNL/DOE		\$44,128	\$32,713	\$16,284
Therm Shield		<u>\$6,500</u>	<u>\$1,000</u>	<u>\$0</u>

U.S. DEPARTMENT OF ENERGY
REPORT ON UNCOSTED BALANCES

for Fiscal Year ended

September 30, 1995

TABLE OF CONTENTS

Report Summary	1
Composition of End-of-FY 1995 Uncosted Obligations	2
Comparison of FY 1995 with FY 1994, FY 1993 and FY 1992	3
Review Procedures for Uncosted Obligations	4
Results of DOE Review	6
Application of Uncosted Obligation Balances	9

APPENDICES

1. Analysis of Uncosted Obligations	11
2. Use of Uncosted Obligations	15
3. Legislative History and Definition of Terms	19

Report Summary

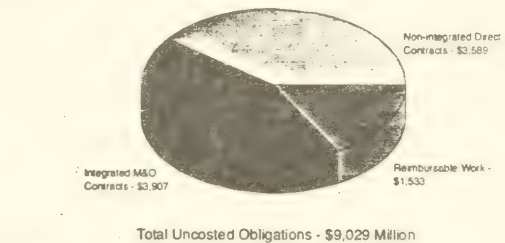

The Department of Energy's FY 1995 total year-end uncosted obligation balances declined 11 percent from the previous year's totals. Balances held by the Department's Management and Operating (M&O) contractors declined 22 percent in FY 1995, a significant improvement over FY 1994. The total reduction in these balances from FY 1992 is 35 percent.

In financing the Department of Energy's FY 1997 congressional budget request, the Department plans to use \$222 million of uncosted balances. In addition, \$1,131 million of prior year balances are being applied to meet congressional requirements in FY 1996. In total, \$1,560 million of prior year balances, both unobligated and obligated but uncosted, are being applied to finance the Department's programs in FY 1996 and 1997.

Composition of End-of-FY 1995 Uncosted Obligations

In total, the Department had uncosted balances as of September 30, 1995, of \$9,029 million. As shown in Chart 1, \$1,533 million was associated with reimbursable work that is not under the control of DOE. Another \$3,589 million was associated with direct contracts to non-integrated DOE contractors. These are contractors who neither perform a management and operating service nor are integrated into the DOE accounting system. They bid and are competitively awarded individual contracts in the normal course of business. Withdrawal of funds from these contracts usually triggers a contract termination clause of some type, with an associated fiscal penalty to the Department. The tasking statements in these contracts are also much more specific than are tasking statements in management and operating contracts. The balance remaining of \$3,907 million was attributable to balances at DOE integrated management and operating contractor sites.

Report on Uncosted Obligations
Dollars in millions
FY 1995

Integrated management and operating contractor balances were the focus of our reviews. The numeric details are provided in Appendix 1 to this report. The balances at September 30, 1995, are not static but reflect a snapshot in time. Operations have continued in the intervening months. Funds that were encumbered on September 30, 1995, have been partially or completely expended. In addition, new work scope has been approved from new fiscal year 1996 appropriations totaling \$16,330 million.

Comparison of FY 1995 with FY 1994, FY 1993, and FY 1992

Chart 2 shows the improvement in end-of-year uncosted non-reimbursable balances held by integrated management and operating contractors in FY 1995 compared to the previous three fiscal years. Balances declined 35 percent over that period.

Uncosted Balances at Integrated M&O Contractors

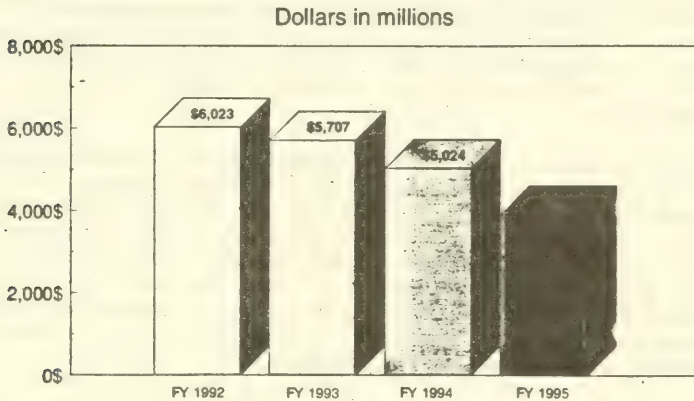

Chart 2

The largest reduction was between the end of FY 1994 and the end of FY 1995, when the integrated management and operating contractors' uncosted balances declined by \$1,112 million, or 22 percent, to \$3,907 million. Of this total, \$1,751 million was encumbered and \$2,156 million was unencumbered (approved work scope balances awaiting encumbrance or contractor execution and other). The numeric details are provided in Appendix 1.

Review Procedures for Uncosted Obligations

Since well before the submission of the first annual report to Congress on uncosted balances, the Department has worked to understand what drives uncosted obligation balances and to control their growth and eliminate any excess. It should be noted that there is nothing intrinsically wrong with balances of uncosted obligations; they are natural and acceptable for any agency which contracts out much of its appropriated funds. The Department's focus of concern is with excess uncosted balances.

In response to the Energy Policy Act of 1992, Section 2301, in November of 1993, budget formulation guidance was amended to formally acknowledge consideration of uncosted balances as potential funding sources to offset the need for budget authority. M&O contractors and Field CFOs were formally required to make such considerations a part of their budget development process. In fulfilling this requirement, the Field has been delegated the authority to choose and use the review processes and methodologies they determine to be the most effective in analyzing these costs at the particular sites for which they are responsible. These reviews by field activities are considered to be the Department's primary processes for reviewing and controlling uncosted balances.

The Department's procedures for reviewing uncosted balances have subsequently been amended to follow recommendations included in the February, 1994 Report of the Contract Reform Team. That report called for two interim reports on uncosted balances in addition to the year-end report to Congress. The first report, based upon balances at the end of April, was due July 1 and was for internal use by the Department in determining whether there might be balances available for use as offsets in the FY 1997 budget then under development. The second report, due on November 1 and based upon balances through August, was for use by the Office of Management and Budget in developing their budget passback to the Department.

This Report on Uncosted Balances for Fiscal Year ended September 30, 1995 is based upon receipt of year-end data from the integrated management and operating contractors which was provided, through DOF Field offices, to the Office of the Chief Financial Officer in December of 1995 for review, analysis, and recommendation. In addition to the numerical data, the Field Offices, working with the M&O contractors, supplied analyses of encumbered and unencumbered program and project balances. As a part of these analyses (as described above), M&O contractors and Field Offices considered uncosted balances as potential funding sources to offset the need for new budget authority.

Analysts in Headquarters program offices and the Office of the Chief Financial Officer reviewed the contractor submissions, addressing various aspects of the data provided,

the underlying assumptions used, variances from the uncosted balance definitions provided by the Chief Financial Officer, and other areas necessary to provide the basis for a more informed analysis of the data. Among the issues addressed were, again, whether additional balances could be applied as offsets to the FY 1997 budget without causing undue hardship to ongoing programs.

Reviews in the recent past have relied upon a system of categorization of uncosted balances, in which all balances were defined as either 'encumbered' or 'unencumbered' and the latter category further subdivided into 'approved work scope', 'prefinancing', and 'remaining unencumbered'. Working with the General Accounting Office, the Department has determined that this method has not been as helpful in analyzing these balances as had been projected. In response, the Department is shifting its analytical focus to a methodology which will use standard percentage goals for the analysis of uncosted balances. This new method is in line with the recommendations published in GAO's April 1996 report on DOE uncosted balances.

Results of DOE Review

As described above, a major goal of DOE's review of non-reimbursable integrated management and operating contractor uncosted balances was to determine whether the amounts could be applied as offsets to the FY 1997 budget without undue hardship. Our midyear analysis and review of year-end accounting data and field-supplied documentation suggested that balances in the amounts proposed could be made available in the appropriate accounts in FY 1997 without unduly constraining program progress. We have reflected these offsets in our FY 1997 budget.

ENERGY AND WATER DEVELOPMENT APPROPRIATION - DEFENSE

Progress in reducing non-reimbursable, integrated, uncosted balances continued in FY 1995 in the Atomic Energy Defense appropriation accounts, which together make up over half of the Department's integrated uncosted balances. The non-reimbursable integrated portion of these accounts (Weapons Activities, Other Defense Activities, Defense Environmental Restoration, and Defense Nuclear Waste) falls by a total of almost \$1 billion from FY 1994 to FY 1995. This represents a 30% decline in uncosted balances during FY 1995.

Of particular interest is the 42 percent and \$540 million reduction of these uncosted balances in the Defense Environmental Restoration and Waste Management Account. This is the second consecutive year in which balances have significantly decreased. This continued reduction in uncosted balances demonstrates the emphasis being placed on improving cost performance.

Similar uncosted balances in the Weapons Activities account declined by 29 percent and \$338 million to \$845 million. Reductions occurred in every major weapon program including Core Research and Development, Technology Transfer, Stockpile Support, Reconfiguration, and Program Direction.

The Other Defense Activities non-reimbursable integrated uncosted balances declined by 12% and \$96 million to \$685 million. Reductions were achieved in several of the programs including the Naval Reactors, Verification and Control Technology research and development, and Materials Support.

ENERGY AND WATER DEVELOPMENT APPROPRIATION - NON-DEFENSE

The remaining integrated non-reimbursable balances in the non-defense accounts

declined by more than 10 percent during FY 1995. For example, uncosted balances for the Uranium Supply Enrichment Activities and Uranium Enrichment D&D Fund appropriation accounts declined by 16% and 25%, respectively. However, an exception is the Energy Supply R&D appropriation account, where similar non-reimbursable integrated contractor balances increased slightly by a net of about 3%. Increases were primarily in the Solar and Renewable Energy and Nuclear Energy program areas. In the former, the funding for most of these programs has increased for seven years (FY 1989 through FY 1995), resulting in increased uncosted balances. Furthermore, these programs are characterized by a very large number of relatively small projects, many of which have unique, business-oriented parameters associated with them. Much of the work is carried out directly by the private sector or in cost-shared partnerships with private sector entities including the industries, states, universities, non-profit organizations, and others who utilize the technologies that are being jointly developed. This has proven to be a very successful approach to the achievement of Solar and Renewable mission requirements, but does result in funds being costed, or reported as costed, more slowly. As to Nuclear Energy, significant balances were received late in FY 1995 from the Agency for International Development for the Soviet Designed Reactor Safety Program, making it difficult to cost the balances before the end of the fiscal year.

Note that several funding areas have high levels of uncosted balances that are difficult to control and are costed at a slower rate than other programs. They include the Small Business Innovative Research program, the Small Business Technology Transfer Research program, construction and capital equipment funding.

INTERIOR APPROPRIATION

Non-reimbursable integrated contractor uncosted balances in the Interior accounts increased slightly less than 2 percent during FY 1995, rising \$6 million to \$331 million. However, the majority of uncosted balances for the Interior accounts are associated with non-integrated contracts. These balances rose by \$174 million, or 15 percent, from FY 1994 to FY 1995. Most of the increase in balances is in the Clean Coal, Fossil Energy, and Energy Conservation appropriation accounts. The increase of \$87 million in Clean Coal balances was expected, because the bulk of the 45 projects are beginning the construction phase when costing rates will increase.

The \$46 million increase in non-integrated balances in the Energy Conservation account results primarily from the increase in budget authority made available by Congress. As has been true in other accounts, the pace of costing always lags somewhat behind a rapid increase in funds available.

Uncosted balances in several accounts are high because of a management practice in

which program and project authorizations and related annual funding for some programs were not issued by DOE Headquarters program management organizations until well into the fiscal year. For continuing activities, this results in an operational year that does not coincide with the fiscal year ending September 30, and contributes to the uncosted balances of those programs at September 30, 1995. The Energy Efficiency and Fossil Energy program organizations are most prone to follow this practice for conservation research and development and grant programs and fossil energy research and development programs, respectively. We continue to look at ways to change the timing to reduce uncosted balances, but there are often program-specific reasons which must be respected. For example, the conservation grant programs must conform to a grant schedule dictated by the need to conform to state funding cycles and grant formula requirements, such as winter temperatures. The Department will soon be convening a meeting of contractor and federal financial personnel to attempt to find ways to reduce these balances.

Application of Uncosted Obligation Balances

Chart 3 reflects the disposition of the Department's total September 30, 1995, uncosted balance of \$9,029 million as of the date of the President's FY 1997 budget submission. Of this amount, \$5,340 million was encumbered and \$1,533 million was associated with non-DOE funds (reimbursable work).

The Department is requesting that \$222 million of uncosted balances be used to finance the 1997 congressional budget request. The remaining uncosted and unencumbered balance of \$1,934 million is being or has been utilized in fiscal year 1996 for the purposes for which the funds were appropriated (approved work scope, etc.).

Use of Uncosted Obligations

Dollars in millions
FY 1995

Chart 3

Congressional appropriation action

utilized \$1,131 million of

prior year balances as offsets to the Department's fiscal year 1996 congressional budget request. The details are provided in Appendix 2.

Some of the unobligated balances used to partially meet congressional requirements for prior year balances in FY 1996 were originally uncosted balances which had been deobligated and held in reserve for use in FY 1996. Similarly, the FY 1997 offsets described as uncosted balances are not likely to appear as uncosted balances in the September 30, 1996, accounting reports. Instead, they will appear as year-end unobligated balances, representing either deobligations of excess uncosted balances from the integrated management and operating contracts or fourth-quarter Office of Management and Budget apportionments which are applied to the FY 1997 funding offset requirements in lieu of further deobligations from contract funds.

Because of the dynamic nature of the process, the uncoded obligations proposed as offsets to the FY 1997 budget should not be viewed as traceable directly to year-end FY 1995 balances. Instead, they more properly represent balances associated with FY 1996 work scope displaced into FY 1997 by the need to complete first the work scope represented by the FY 1995 year-end balances.

a/ Uncosted Revolving Fund Balance

b/ Multi- or No-Year funds

c/ For presentation purposes, Reimbursable Work is categorized as encumbered since they are not available for DOE use

Legislative History and Definition of Terms

On October 24, 1992, the President signed the Energy Policy Act of 1992 into law (P.L. 102-486). Section 2307 requires the DOE to submit an annual report on uncosted obligations to Congress simultaneously with the President's annual budget request. This is the fourth submission of that report.

In addition to the requirements of the Energy Policy Act, House Report 103-200, accompanying the FY 1994 Defense Authorization Act (P.L. 103-160), asks the Department to provide additional information on uncosted balances in the defense appropriation accounts, including the split among the various categories of balances; reasons for the growth in uncosted obligations; an explanation of prefinancing; and an outline of the Department's efforts to reduce uncosted obligations to a reasonable level; for fiscal years 1992, 1993, and 1994. This report is responsive to these requirements, and goes beyond them in not confining the narrative and tabular material to defense accounts.

Definition of Terms

This report describes and analyzes uncosted obligations which are divided into encumbered and unencumbered obligations. Public Law 102-486, (Energy Policy Act of 1992) section 2307, required the DOE to provide within 90 days of enactment definitions of the various terms used in the discussion and description of uncosted obligations. This report was provided by letter dated January 19, 1993. The terms used then are defined below.

Uncosted Obligation

The balance of the amounts obligated by the Department under its integrated management and operating contracts for which costs have not yet been incurred by the integrated management and operating contractor. This balance consists of the following categories:

Encumbered (Committed) Uncosted Obligation

Uncosted balances under contracts awarded by the integrated management and operating contractor and uncosted balances related to other integrated management and operating contractor liabilities. Encumbrances consist of uncosted balances of (1) purchase orders issued; (2) contracts and subcontracts awarded including the full liability under lease purchases and capital leases; (3)

termination cost for incremental funded firm fixed price contracts, operating lease agreements, and multiyear service contracts that contain termination clauses; (4) other agreements for the acquisition of goods and services not yet received and uncosted balances related to other integrated management and operating contractor liabilities. Encumbrances include uncosted balances of work orders or authorizations issued to integrated management and operating construction contractors, provided such work is specific in scope and has clear milestones or tangible deliverables.

Unencumbered (Uncommitted) Uncosted Obligations

The portion of the uncosted obligation balance that has not yet been encumbered by the integrated management and operating contractor. The unencumbered uncosted obligation balance can be divided into the following categories:

- **Approved Work Scope** consists of balances for work that is clearly defined in task or work authorizations or program direction letters. Such work must be specific in scope and have clearly defined milestones and tangible deliverables where possible. This category may not at the end of year include any costs for which funds are appropriated in the subsequent fiscal year (e.g., level-of-effort for research and development activities or to maintain capability in Defense Programs). Any balances in this category resulting from delays and slippage are prime candidates for reversion to the remaining unencumbered category (see below) absent convincing justification for retention.
- **Prefinancing** is funding maintained for the purpose of ensuring continuity of contractor operations during a potential funding lapse at the beginning of the fiscal year. Prefinancing is limited to those amounts required to cover salaries and related benefits and other mandatory requirements; e.g., rent and utilities, not otherwise covered in the encumbered and approved work scope categories, for up to 20 calendar days.
- **Remaining Unencumbered** is the portion that remains after subtracting approved work scope and prefinancing and is potential excess funding resulting from project and program underruns and changing program missions that may be available for withdrawal and reallocation to support current or future departmental funding requirements.

Use of Prior Year Balances

Q24. What are the FY 1997 levels of prior year balances, by DOE appropriation account, that DOE proposes to be used as offsets to the FY 1997 budget request?

A24. See Chart

Department of Energy
Offsetting Prior Year Balances used to Finance the FY 1997 Request to Congress
(In thousands of \$)

Uranium supply and enrichment activities	\$17,266
Defense environmental restoration & waste management	150,400
Office of the inspector general	897
Southeastern power administration	6,545
Southwestern power administration	904
Western area power administration	30,800
Energy conservation	<u>15,000</u>
Total, DOE Use of Prior Year Balances in FY 1997	\$221,812

Q25. For those prior year balances identified in the response to question 23 above, please identify to source of those prior year balances by program/project/ activity.

A25. See Chart

Department of Energy
Source of Offsetting Prior Year Balances used to Finance The FY 1997 Request
(In Thousands of \$)

Uranium supply and enrichment activities	\$17,266
(\$14,916 from FY 1993 funds for Gaseous Diffusion Operations and support and from construction)	
Defense environmental restoration & waste management	150,400

(From program direction)	
Western area power administration	30,800
(\$4,700 from program direction; \$1,500 from operation and maintenance: \$14,600 from purchase power and wheeling; and \$10,000 from construction)	
Energy Conservation	<u>15,000</u>
(Source to be Determined)	
Total DOE -Use of Prior Year Balances in FY 1977	\$221,812

Strategic Alignment Initiative (SAI)

Q26. According to the "SAVING DOLLARS AND MAKING SENSE" document on the "August 3, 1995, Strategic Alignment Initiative Implementation" page of DOE's "Web" site: "Re-engineering of science education programs saves \$9 million." Please document these savings.

A26. The re-engineering of University and Science Education (USE) programs at the \$9 million level was overtaken by the FY 1996 Congressional Budget process which reduced funding for these programs from over \$60 million to \$18.9 million. As suggested in the legislative language, University and Science Education (USE) programs are being reconfigured to improve the alignment of the Department of Energy's education activities with the research mission of the agency and to focus the program on using the Department's laboratories for hands-on research experiences. To date, of the \$18.9 million provided to support USE programmatic activities in FY 1996, over \$16 million has been allocated to support hands-on research experiences for faculty and students at DOE's national laboratories. The remaining funds support DOE laboratory minority university alliances and other Administration and Congressionally recommended efforts. Substantial reductions had to be taken in education projects and the Department's base programs.

Q27. According to the "February 1996, Status Update - Tracking Our Progress" document on the "Strategic Alignment" page of DOE's "Web" site, the following were January 1996 accomplishments:

Q27a. "Federal employee staffing reduced by 790 people since May 3rd, 50% ahead of plan and only 190 away from end of year target."

Q27b. "3 Washington D.C. locations have been closed ahead of schedule, saving \$282,000 in rent. 3 additional closings planned for Fiscal Year 1996."

Q27c. "Department support service contracting reduced by \$108 million, \$18 million more than originally projected. \$40 million in travel to be saved, exceeding goal by \$5 million."

Please provide the documentation supporting each of these accomplishments, including for a., the distribution of the 790-person reduction for each Departmental organization, including all operations, field, area, support and site offices.

A27a. The following data illustrates the 790 person reduction in DOE employment between May 13, 1995, and January 21, 1996. The data is presented by Departmental Organization, Operations Office, Field Office and Special Purpose Offices. Data for Support Offices and Site Offices is not readily available, but is included within the data for the appropriate Program Office or Operations Office. At the end of January, the Department was actually within 149 people, not 190 as reported, of the Strategic Alignment goal set by the Secretary in May 1995. This is shown in the column marked, "Delta From Target" in the following data.

Department of Energy Strategic Alignment Report

**Reflects the Secretary's unfunded, unallocated reserve. These 99 unencumbered positions contribute to the Department's progress toward the end of the year SAI employment target of 12,677.

A27b. This initiative (#31 – HEADQUARTERS SPACE CONSOLIDATION) spans five (5) years (Fiscal Year 1996-2000) and the milestones were set for the end of each fiscal year. By the end of Fiscal Year 1996, we are to decrease our building inventory from 16 to 11 locations, release a net of 16,000 sq. ft. of space and save \$821,000.00. We are on target.

As of 12/31/95 (the end of the first quarter of Fiscal Year 1996), we vacated the following three (3) buildings:

<u>Location</u>	<u>Vacated (Sq. Ft.)</u>	<u>Rate/Sq. Ft.</u>	<u>Annual Rent</u>
1707 H St., NW	46,352	\$42.98	\$1,992,209
750 1st St., NE	9,416	\$37.58	353,853
955 L'Enfant Plaza, SW	4,966	\$33.84	168,049
TOTAL	60,134		\$2,514,111

However, we have consolidated into space at 950 L'Enfant Plaza, S.W. as follows:

<u>Location</u>	<u>Vacated (Sq. Ft.)</u>	<u>Rate/Sq. Ft.</u>	<u>Annual Rent</u>
950 L'Enfant Plaza, SW	71,308	\$32.00	\$2,281,856

Therefore, our actions through the first quarter have decreased the Headquarters building inventory from 16 to 14 locations and have decreased our rent by \$232,255.

We have also decreased local travel costs by approximately \$50,000 since 950 L'Enfant Plaza is in walking distance of the Forrestal Building.

As of 3/11/96 (and the end of the second quarter of Fiscal Year 1996), two additional buildings, 1726 M St., NW and 820 first St., NE., have been vacated. A more accurate accounting of the Fiscal Year 1996 rent savings through the second quarter would be to compare the rent based on the former plan with the rent based on the Strategic Alignment Initiative Plan (SAI). In summary:

<u>Fiscal Year 1996</u>	<u>FORMER Plan</u>	<u>SAI Plan</u>
1st Quarter Rent	\$14,430,034	\$14,560,677
2nd. Quarter Rent	14,116,338	13,730,455
Subtotal	\$28,546,372	\$28,291,132

Therefore, the rent savings through the end of the second quarter is \$255,240. By the end of Fiscal Year 1996, we will have decreased our building inventory to 11 locations, released a net of 17,205 sq. ft. and saved approximately \$1.27 million in rent. This amount of savings exceeds the Strategic Management Initiative #31 targeted Fiscal Year 1996 savings by more than \$450,000 in rent and 1,200 sq. ft. of space.

- A27c. As part of her Strategic Alignment Initiative, the Secretary of Energy announced her intention to reduce DOE contract obligations for support services (excluding housekeeping) by 90 million per year for fiscal years 1996 - 2000. The Secretary used \$700M as the baseline for such reductions. Accordingly the Department set \$610 million as the target obligation ceiling for fiscal year 1996. However, as a result of an implementation methodology whereby each DOE organizational component was provided a specific obligation ceiling, we were able to reduce that target further to \$600 million. In addition, the actual fiscal year 1995 baseline proved to be somewhat higher, \$720 million. The current projection for fiscal year 1996 support services is still \$600 million, yielding projected savings of \$120 million.

During the first quarter of fiscal year 1996 the Department obligated approximately \$98 million under support service contracts. This compares to fiscal year 1994 first quarter obligations in the amount of \$164 million, and \$223 million for the first quarter of fiscal year 1995.

Q28. Marshall Group

Q28a. Who is the Marshall Group and where are they headquartered?

- A28a. The Marshall Group is a management consulting firm specializing in strategic planning, organizational redesign and change, resource alignment, and downsizing. The Marshall Group has experience in assisting major private sector corporations in the alignment of human resources to overall company missions. The company headquarters is in Scottsdale, Arizona.

Q28b. What was/is the role of the Marshall Group in the DOE SAI?

- A28b. The Marshall Group provided planning assistance, consultation, and facilitation services to the Department during phase I of the strategic alignment initiative (January through April 1995). This Phase included an intensive review of the activities of the Department by a full-time team of more than 40 DOE employees

that led to specific recommendations for cost-savings and workforce downsizing and alignment. Virtually all of these recommendations were adopted by the Department and will result in a staffing reduction of 3,788 and savings of \$1.7 billion over the next 5 years.

The Marshall group provided full and part-time management consultants and technical project assistance for the project. The period of performance for the task that involved the Marshall Group ended on April 28, 1995.

Q28c. What is the level of funding level provided to the Marshall Group since the beginning of the DOE SAI effort?

A28c. \$791,867.

OMB Passback Process

Q29. In the DOE's formal FY 1997 budget request to Congress, please identify all FY 1997 funding increases and decreases to the Department's initial FY 1997 budget request submitted to OMB.

A29. Attached is the DOE FY 1997 History Table by Appropriation, which reflects the budget levels internally requested by each DOE organization, the overall request that DOE made to the Office of Management and Budget and DOE's share of the President's FY 1997 budget request to the Congress.

Department of Energy
FY 1997 Budget Request to Congress
History (Hollifield) Table by Appropriation

Summary	1	Economic regulation	12
Energy supply research and development	2	Strategic petroleum reserve	13
Uranium supply and enrichment activities	5	Energy information administration	13
UE decontamination & decommissioning fund	5	Clean coal technology	13
General science and research	5	Uranium enrichment D&D fund discretionary payments	13
Weapons activities	6	Proprietary receipts	13
Defense environmental restoration & waste management	6	This table reflects the budget levels internally requested by each DOE organization, the overall request that DOE made to the Office of Management and Budget (OMB), and DOE's share of the President's FY 1997 budget request to Congress.	
Other defense activities	7	The FY 1996 column represents actual appropriations levels for accounts funded within the Energy and Water Development appropriation, and the most recently approved conference committee level for Interior and Related agencies appropriations.	
Defense nuclear waste disposal	7		
Departmental administration	8		
Office of inspector general	9		
Power marketing administrations	9		
Federal energy regulatory commission	10		
Nuclear waste disposal fund	10		
Fossil energy research and development	11		
Alternative fuels production	12		
Naval petroleum and oil shale reserves	12		
Energy conservation	12

U.S. Global Change Research Program/Climate Change Action Plan

Q30. Please provide a complete listing of all DOE programs/projects included in the U.S. Global Change Research Program, coordinated by the National Science and Technology Council's Committee on Environment and Natural Resources, including, for each:

Q30a. A brief description; and

Q30b. FY 1995, FY 1996, and FY 1997 funding levels.

A30a. Research supported by DOE's Office of Energy Research in the U.S. Global Change Research Program is focused on understanding the basic chemical, physical, and biological processes of the Earth's atmosphere, land, and oceans, and how these processes may be affected by energy production and use, primarily the emission of carbon dioxide from fossil fuel combustion. A major part of the research is designed to provide the data that will-enable an objective assessment of the potential for, and consequences of, global warming. Research in the program is focused on four major areas of climate research: (1) climate and hydrology; (2) atmospheric chemistry and carbon cycling; (3) ecological processes; and (4) human interactions.

A30b. The FY 1995, 1996, and 1997 funding level for the program is as follows (B/A in Millions of \$):

Area	FY 1995	FY 1996	FY 1997
Climate and Hydrology	53.5	51.8	54.3
Atmospheric Chemistry and Carbon Cycle	27.3	29.0	27.2
Ecological Processes	12.3	11.8	11.4
Human Interactions	9.7	9.0	9.4
Capital Equipment	9.9	9.2	9.1
Total	112.7	110.8	111.4

Q31. Please provide all DOE funding for each of FY 1995, FY 1996, and FY 1997 used to support the activities of the United Nations Intergovernmental Panel on Climate Change (IPCC) and/or the Intergovernmental Negotiating Committee for a Framework Convention on Climate Change.

A31. The Department supports climate change research to meet its mission needs. Funding for the Intergovernmental Negotiating Committee (INC) and the Intergovernmental Panel on Climate Change (IPCC) comes out of two offices at the Department of Energy, the Office of Policy (PO) and Energy (ER).

In FY 95, PO spent \$2,600 in support of the 11th session of the INC, which was held in February 1995 in New York, and \$60,000 in general support through the Department of State for the INC, IPCC and follow-on to INC activities. The INC ended its work in February 1995. Additionally, PO sent staff to participate in the INC-10 and INC-11 meetings.

In FY 95, PO spent \$125,000 to fund five lead authors of IPCC Working Group 2 to do technology assessment work in the area of impacts and mitigation. PO also sent 3 staff to participate in Working Groups II and III meetings.

In FY 96, PO has not funded any INC activities. PO did fund 2 staff people to attend the December 1995 meeting of the IPCC in Rome, where the IPCC *Second Assessment Report* and the IPCC *Second Assessment Synthesis of Scientific-Technical Information Relevant to Interpreting Article 2 of the UN Framework Convention on Climate Change* were adopted. In October 1995, 3 staff attended meetings in Montreal where the Working Group II and Working Group III reports were adopted.

PO has not prepared a funding plan for the IPCC in FY 97 because the IPCC workplan has not been decided. However, PO anticipates funding travel for 1-2 staff people to attend 3 one-week meetings, venues unknown, at estimated costs of approximately \$10,000.

The DOE Office of Energy Research (ER) funds research on climate change that is used by the IPCC in its state of science assessments of climate change and the potential consequences. ER's support is largely indirect, i.e., supporting research that is used by the IPCC and providing support to scientists that participate in the IPCC science assessments (Working Group I) and in the impacts and mitigation assessment (Working Group II). Information from this research has also been used by the Intergovernmental Negotiating Committee in support of the Framework Convention on Climate Change. The total funding for this research provided by DOE's Office of Energy Research in FY 1995, FY 1996, and FY 1997 is as follows:

(B/A in Millions of \$):

<u>FY 1995</u>	<u>FY 1996</u>	<u>FY 1997</u>
112.4	110.9	112.4

Q32. Please provide a complete listing of all DOE programs/projects included as part of the Administration's Climate Change Action Plan, including, for each:

Q32a. A brief description; and

Q32b. FY 1995, FY 1996, and FY 1997 funding levels.

A32a and A32b. A complete listing and brief description of all DOE Climate Change Action Plan programs and FY 95, FY 96 and proposed FY 97 funding levels are outlined in the chart below. This listing includes both original actions funded in FY 1995 and a small number of new initiatives in the FY 1997 budget request. This list does not include actions (from the 1993 Climate Change Action Plan) that DOE eliminated.

FY 95/96/97 Funding for Climate Change Action Plan Actions			
Energy Partnership (CCAP) Action	Budget Data (In Millions of \$)		
	FY95 Approp	FY96 Conf.	FY97 Con. Req.
Rebuild America: Catalyzing regional and community partnerships to implement energy efficiency investments in new and existing commercial multifamily buildings.	5.9	8.1	10.1
Partnerships for Technology Introduction: Manufacturer/utility partnerships to develop and commercialize super efficient equipment.	8.3	4.8	11.9
Building Operator Training: Development of materials and facilitation of training to ensure that energy efficiency equipment is operated at peak efficiency.	0	0	1.65
Enhanced Appliance Standards: Aggressive implementation of standards.	0	0	1.9
Advanced Housing Technologies.	0	0	5.0
High Reflectivity Surfaces: Research, development and rating of paving and roofing materials that reduce energy requirements for communities.	0	0	1.3
Building Standards: Technical assistance and grants to States to accelerate building code upgrades.	5.7	5.9	10.5
Affordable Low Income Housing: Partnership with HUD to facilitate energy efficiency investments in public housing and lower government costs.	0	0	3.1
Advanced Architectural Design: Design tools for improving research program output including the use of ENERGY-10.	0	0	1.0
Fuel Cells in Buildings.	0	0	1.0
Superwindow Collaborative: Technical assistance and partnerships with industry to develop, label, and commercialize the next generation of windows.	0	1.0	2.8
Home Energy Rating Systems: Energy-efficient financing, builder assistance and recognition provided.	1.0	1.0	4.0
Federal Energy Management Partnerships for Technology Introduction: Funds renewable energy projects in federally-owned and -leased facilities and demonstrates chiller replacements and steam plant conversions to meet energy service performance contract goals.	0	0	7.0
Motor Challenge: Increase the market penetration of efficient motor-driven systems through the replication of Showcase Demonstrations, commitments by Excellence Partners, technical assistance, user education, and market transformation strategies.	5.2	5.2	7.35
Enhance Energy Analysis and Diagnostic Centers: Sponsor university-based energy audits to small- and mid-sized industrial facilities.	0	0	1.0
NICE-3 (National Industrial Competitiveness through Energy, Environment, and Economics): Seed grants to develop pollution prevention/energy efficiency technologies for widespread industry use.	3.0	2.9	9.0
Renewable Energy Commercialization: Develop and commercialize renewable energy technologies including wind, biomass, photovoltaics, geothermal heat pumps, and geothermal power through collaborative partnerships.	54.8	27.8	60.0
Promote Integrated Resource Planning: Expand technical assistance and outreach to State regulatory bodies to develop IRPs and evaluate efficiency technologies.	1.75	0	0.9
Improve Hydroelectric Generation: Remove market impediments to increased use of environmentally-sound hydroelectric generation.	0	0	0

FY 95/96/97 Funding for Climate Change Action Plan Actions			
Energy Partnership (CCAP) Action	Budget Data (In Millions of \$)		
	FY95 Approp	FY96 Conf.	FY97 Con. Req.
Evaluate feasibility of efficiency standards for electric transformers: Determine whether energy efficiency standards for electricity distribution transformers should be set, and, if warranted, establish test procedures, standards and labeling requirements.	0.1	0	0
Coalbed Methane Utilization: Reduce emissions of methane from coal mines while providing the coal industry with a marketable new energy source.	2.0	0	1.0
Expand Landfill Recovery R&D: Reduce danger of landfill gas accidents and minimize methane emissions; provide landfill operators new energy source.	0	0	0
U.S. International Joint Implementation: Encourages cooperative, voluntary, cost-effective projects between the U.S. and developing countries. Projects emphasize technology cooperation and sustainable development.	3.2	3.2	2.0
Climate Challenge: Joint DOE/Electric Utility Industry program that promotes voluntary efforts to reduce, avoid, or sequester greenhouse gas emissions.	0	0	1.0
Climate Wise: Partnership program between DOE and EPA is establishing voluntary public/private partnerships with industry to achieve significant bottom-line improvements in industries resulting from energy efficiency and pollution prevention programs.	2.4	3.2	4.0
Total	93.35	63.10	147.50

Out-Year Funding Projections

- Q33. What are the estimated FY 1997, FY 1998, FY 1999, and FY 2000 requirements, by DOE civilian R&D program/subprogram, given the FY 1997 budget request for DOE?
- A33. Estimates for outyear spending for the civilian R&D programs are taken from the Analytical Perspectives volume of the President's FY 1997 budget.

Department of Energy Civilian R&D Programs
FY 1997 Budget Request—Outyear Projections by Appropriation
(In Millions of \$)

Program	FY 1997	FY 1998	FY 1999	FY 2000
Energy Supply Research & Development	\$3,070	\$2,902	\$2,779	\$2,654
General Science & Research Activities	1,009	928	845	760
Fossil Energy Research and Development	319	321	292	263
Energy Conservation (<i>R&D portion only</i>)	531	567	582	599
Clean Coal Technology	-500	313	0	0
Total, DOE Civilian R&D	\$4,429	\$5,031	\$4,498	\$4,276

DOE Laboratory Funding

- Q34. What is the level of funding for each DOE Laboratory, by Solar and Renewable Energy program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q35. What is the level of funding for each DOE Laboratory, by Nuclear Energy program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q36. What is the level of funding for each DOE Laboratory, by Environment, Safety and Health program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q37. What is the level of funding for each DOE Laboratory, by BER program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q38. What is the level of funding for each DOE Laboratory, by Fusion Energy program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q39. What is the level of funding for each DOE Laboratory, by BES program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q40. What is the level of funding for each DOE Laboratory, by Environmental Management (Non-Defense) program/subprogram, for each of FY 1995, FY 1996 and FY 1997?
- Q41. What is the level of funding for each DOE Laboratory, by High Energy and Nuclear Physics program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q42. What is the level of funding for each DOE Laboratory, by Fossil Energy R&D program/subprogram, for each of FY 1995, FY 1996 and 1997?
- Q43. What is the level of funding for each DOE Laboratory, by Energy Conservation R&D program/subprogram, for each of FY 1995, FY 1996 and 1997?

Advanced Light Water Reactor Program

Q44. Section 2123(a) of the Energy Policy Act of 1992 (EPACT, Public Law 102-486) directs the Secretary of Energy to "conduct a 5-year program of technical and financial assistance to encourage the development and submission for certification of advanced light water reactor designs which, in the judgment of the Secretary, can be certified by the Commission by no later than the end of fiscal year 1996."

Q44a. Please provide a status report of DOE activities conducted under Section 2123(a) of EPACT.

A44a. Four Advanced Light Water Reactor (ALWR) plant designs have been supported by DOE under cooperative, cost-shared programs with the nuclear industry. First, the Department is supporting the designing of two large ALWRs (each approximately 1350 megawatts), the Advanced Boiling Water Reactor (ABWR) and System 80+. The Department is also supporting the development of two mid-sized (nominally 600 megawatts) ALWRs with simplified design features and passive safety systems.

These are the AP600 and Simplified Boiling Water Reactor (SBWR). These programs preceded the enactment of EPACT in 1992. The large plant certification program was initiated in late 1986, and the mid-sized plant program was initiated in 1990. They were subsequently subsumed into the EPACT program.

After extensive design safety review by the Nuclear Regulatory Commission (NRC), the ABWR and System 80+ received NRC Final Design Approval in July 1994, accomplishing the last major milestone on the way toward design certification. We anticipate the NRC will certify these two designs within the next several months. Because of the new passive safety system features of the AP600 and SBWR designs, NRC required extensive testing of the new technologies in each design to verify performance and validate computer codes. This requirement caused substantial program delays and cost increases. Currently, all of the AP600 testing has been completed, and NRC review of the safety report and resolution of key technical issues is in progress. We expect that NRC will award a Final Design Approval for the AP600 by mid-1997 and certify the design in 1998.

The Department's industry partners on the SBWR project experienced resource limitations that resulted in a delay in the NRC review of the design until the test program was completed. The test program has now been essentially completed, and validation of the computer codes should be completed by the end of 1996.

However, GE, the industry sponsor of this design has recently indicated its intention to modify its SBWR program. DOE is investigating this situation and will soon make a decision as to future participation in the SBWR program.

Q44b. Please provide the DOE funding, by work performer (i.e., GE, Westinghouse, Combustion Engineering, Nuclear Regulatory Commission, other) for each of FY 1993-FY 1997 for the DOE activities conducted under Section 2123(a) of EPACT.

Q44c. Please provide the non-DOE funding, by work performer (i.e., GE, Westinghouse, Combustion Engineering, Nuclear Regulatory Commission, other) for each of FY 1993-FY 1997 for the DOE activities conducted under Section 2123(a) of EPACT.

A44b&c: The requested information is provided in the attached table. Note that the Nuclear Regulatory Commission is not a "work performer" in this program in the same manner as Westinghouse and GE. The NRC's costs for reviewing the ALWR designs submitted for certification are reimbursed in full by the applicants (Westinghouse, GE, ABB-Combustion Engineering), as required by Federal law. These costs are included in the contractors' cost shares in the attached table.

Funding of Advanced Light Water Reactor Certification Programs

\$ in millions

(Based on actual costs)(3)

Contractor	FY 93	FY 94	FY 95	FY 96	Projected FY97& FY98
General Electric ABWR					
DOE cost share	9.1	4.1	1.0	0.3	0.3
GE cost share	6.4	4.1	1.0	0.3	0.3
Total	15.5	8.2	2.0	0.6	0.6
ABB-Combustion Engineering System 80+					
DOE cost share	2.8	9.1	4.5	4.0	3.0
ABB-CE cost share	8.3	7.3	1.0	7.0	0.0

GE cost share	34.3	20.6	12.9	7.4	(1)
Total	48.7	26.9	15.4	8.9	

(1) Continuation of SBWR program currently under review.

(2) Contractors did receive International Participants as part of their share.

(3) The numbers are based on actual costs provided by the contractors..

Q45. Section 2123(b) of the EPACT directs the Secretary of Energy to "conduct a 5-year program of Federal financial and technical assistance for the first-of-a-kind engineering design of standardized commercial nuclear powerplants which are included, as of the date of enactment of this Act, in the Department of Energy's program for certification of advanced light water reactor designs."

Q45a. Please provide a status report of DOE activities conducted under Section 2123(b) of EPACT.

A45a. The principal objectives of the First-of-a-Kind Engineering (FOAKE) program are to complete the designs of two selected advanced light water reactor plants in sufficient detail to support commercial standardization, define firm plant cost and construction schedule estimates, and prepare for construction. To manage this program, DOE selected the Advanced Reactor Corporation (ARC), a not-for-profit corporation of the electric utility industry, to foster advances in nuclear technology. ARC selected the Advanced Boiling Water Reactor (ABWR) and AP600 for this program in a competitive selection of design proposals submitted.

AP600 and ABWR design activities under this program were initiated in March 1993.

The work includes extensive detailed systems designs, arrangements, structural design, equipment specifications, construction schedule, capital cost estimates, and other activities that should result in completion of about 60 to 65 percent of the total detailed design. Currently, the ABWR program is about 80% complete, and is expected to conclude on schedule in September 1996. The AP600 program is about 60 to 65 percent complete. However, this program is scheduled to be completed in 1998, a significant delay from the original schedule. This delay is due to delays in the companion AP600 certification program. The certification program must be completed before the FOAKE program to avoid expensive FOAKE design rework or changes resulting from the certification process.

Q45b. Please provide the DOE funding, by work performer (i.e., GE, Westinghouse, Combustion Engineering, Nuclear Regulatory Commission, other) for each of FY 1993-FY1997 for the DOE activities conducted under Section 2123(b) of EPACT.

Q45c. Please provide the non-DOE funding, by work performer (i.e., GE, Westinghouse, Combustion Engineering, Nuclear Regulatory Commission, other) for each of FY 1993-FY1997 for the DOE activities conducted under Section 2123(b) of EPACT.

A45b&c: The requested information is provided in the attached table. Note that the Nuclear Regulatory Commission is not a participant in the First-of-a-Kind Engineering program.

Funding of First-of-a-Kind Engineering Program
\$ in millions
(Based on actual costs)(2)

Contractor	FY 93	FY 94	FY 95	FY 96	Projected FY97& FY98 (3)
DOE cost share	8.5	28.7	30.1	14.0	17.7
ARC cost share (1)	4.0	12.2	14.5	15.2 (2)	
GE (ABWR) cost share	0.2	5.3	18.6	21.3	
Westinghouse (AP600) cost share	4.5	17.2	15.8	34.9 (2)	
Total	17.2	63.5	79.0		

(1) Utility source.

(2) Total for FY'96 to FY'98 inclusive (based on actual costs provided by contractors).

(3) Clarifying appropriation language may be required before these funds can be expended because of limitations in EPACT.

Q46. Please explain the differences between activities funded under Section 2123(a) of the EPACT and Section 2123(b) of the EPACT.

A46. The joint DOE-industry cooperative, cost-shared programs (conducted in response to Section 2123(a)) seek to satisfy the new Nuclear Regulatory Commission certification requirements, specified in Title 10, Code of Federal Regulations, Part 52. This improved process will be used in the four ALWR plant designs: the large plant designs (each approximately 1,350 megawatts), the Advanced Boiling Water Reactor and System 80+, the mid-sized plant (each approximately 600 megawatts), the AP600 and the Simplified Boiling Water Reactor. For each design, extensive standard safety analysis reports were submitted to NRC for review. Additionally, for the mid-sized plant designs, extensive systems testing was performed to validate the new technologies incorporated in the design. The ABWR and System 80+ are expected to receive certification within several months. The AP600 certification is expected in the late 1998 period, and future status of the SBWR is still to be determined.

In contrast, the First-of-a-Kind Engineering (FOAKE) program (2123(b)) is intended to complete design work to a greater level of detail than that required for certification. This higher level of detail will encourage standardization of the design and facilitate reliable construction schedule and cost estimates. FOAKE should result in completion of up to about 60 to 65 percent of the total required detailed design. The design work not performed under the FOAKE program includes engineering work that is site specific, dependent on actual procured components and equipment, or dependent on construction. The ABWR FOAKE program is about 80 percent complete and should be concluded in September 1996. The AP600 program should be concluded in late 1998.

Q47. Section 2123(b)(4) of the EPACT states that “[b]efore entering into an agreement with an entity under this subsection, the Secretary shall establish a cost ceiling for the contribution of the Federal Government for the project, and shall report such cost ceiling to Congress.”

Q47a. What cost ceiling was established?

A47a. The Cooperative Agreement between DOE and the Advanced Reactor Corporation for the First-of-a-Kind Engineering program specified a DOE cost ceiling of \$100 million.

Q47b. How much cost ceiling remains after FY 1996?

A47b. \$17.7 million of the cost ceiling will remain after FY 1996.

Fusion Energy

Q48. What are the estimated FY 1998, FY 1999, FY 2000 budget authorization funding requirements, by Fusion Energy subprogram, given the FY 1997 budget request for Fusion Energy?

A48. The Department has endorsed the recommendation of the recent Fusion Energy Advisory Committee Report, “A Restructured Fusion Energy Sciences Program,” that recommended a restructured fusion program. With stable funding at the FY 1997 request level in FY 1998 and beyond, we could pursue a balanced FEAC program in plasma science, concept innovation, and international collaboration by maintaining world leadership in selected areas of expertise. The Department recognizes the importance of stable funding for fusion and to the extent possible will try to maintain a constant level of funding with no significant increases planned above the FY 1997 level. One of the changes underlining the restructured program was that there are no large project mortgages included in the budget. The Tokamak Physics Experiment construction project that was previously planned for has been terminated.

Q49. What is the level of funding, by Fusion Energy subprogram, for each of the TFTR, TPX, Alcator C-Mod, DIII-D, PBX-M, and TEXT tokamaks, and the Advanced Toroidal Facility (ATF) for each of FY 1995, FY 1996, and FY 1997?

¹In FY 1997 TFTR will focus on completing the scientific objectives uniquely attainable in that device. The FEAC will review the work in progress at TFTR in mid-FY 1997 to help the Department decide as to whether to continue the planned experiments through the rest of the year into FY 1998 at the latest or whether to stop scientific operation in mid-year and use the remaining funds to prepare for decommissioning.

The ATF has been shut down and no funding has been provided since 1994 for research on ATF.

Q50. Please describe what, if any, alternative fusion energy concepts (i.e., alternatives to tokamaks or inertial fusion driven by heavy ions) are being explored by DOE. Please provide funding levels of each of the alternative concepts, by Fusion Energy subprogram, for each of FY 1995, FY 1996, and FY 1997.

A50. The DOE presently supports a small but high quality alternative confinement concepts program. Some research in all of the important alternative concepts is supported, including stellarators, reversed field pinches, reversed field configurations, staged Z pinches, ion rings and inertial electrostatic confinement. The U.S. is among the world's leaders in many of these areas. Budget levels for FY 1995, FY 1996, and FY 1997 are shown below. The U.S. alternative concepts program will be reviewed by the Fusion Energy Advisory Committee and its report will be available this summer.

Alternate Fusion Concept Funding
(Expressed in \$ thousands)

CONCEPT	FY95	FY96	FY97
Spherical Tokamak	1,750	1,200	6,300
Stellarator	1,800	1,600	2,000
Reversed Field Pinch	1,800	1,600	2,250
Field Reversed Configuration	750	750	2,000
Staged Z Pinch	500	400	400
Ion Rings	550	400	400
Inertial Electrostatic Confinement	400	400	400
Spheromak/Other	400	400	600
New Initiatives	0	0	3,500
Total	7,950	6,750	17,850

Q51. What is DOE's total funding, by Fusion Energy Subprogram, in each of FY 1995, FY 1996 and FY 1997 for:

Q51a. International Thermonuclear Experimental Reactor (ITER) activities?

A51a.

International Thermonuclear Experimental Reactor (ITER) Activities
(Expressed in \$ thousands)

ACTIVITY	FY95	FY96	FY97
ITER			
Fusion Technologies	67,554	54,927	54,930
Related Capital Funding	1,900	100	70
Total	69,454	55,027	55,000

Q51b. ITER-related activities?

A51b.

International Thermonuclear Experimental Reactor (ITER)-Related Activities
(Expressed in \$ thousands)

ACTIVITY	FY95	FY96	FY97
Fusion Technologies	0	5,000	5,000
Total	0	5,000	5,000

In general, fusion theory, modeling and experimental results are shared throughout the U.S. and the international community. As such they are available to the ITER activity to be used where appropriate. While much of this is generically applicable to the ITER device, the keen interest in the scientific exploration possibilities of ITER has inspired some of the work to be directed to scientific issues associated with ITER.

Q52. What is the annual cost per FTE, by ITER Joint Work Site, for U.S. personnel assigned to one of the ITER Joint Work Site?

A52. The current average annual cost for a full time equivalent (FTE) U.S. person is \$288,000 at San Diego, \$376, 000 at Naka, Japan, and \$418,000 thousand at Garching, Germany. The overall average cost is \$353,000. Many factors influence these numbers such as availability of subsidized housing and free schooling at Naka, cost of living and exchange indices, and skill and experience level of the U.S. personnel at each site.

Q53. What is the current status of the ITER site selection process?

A53. As stated in our written and oral testimony, because of the budget reductions, the U.S. can no longer consider offering to host the ITER facility here. Furthermore, because of the projection of these lower budgets into the future, any future participation of the U.S. in construction would have to be within limited financial resources. In order to pursue the possibility of such U.S. participation, we are now considering whether to enter non-committal, pre-negotiation discussions with the other ITER Parties on possible arrangements for construction. Should the other ITER Parties decide that they can provide sufficient resources to bear the majority of the needed funding and should the U.S. decide that it is in our overall interest to join such non-committal, pre-negotiation discussions on construction arrangements, then the involved Parties could determine how to proceed to select the site for construction. In that case, it is likely that the Party or Parties providing the majority of the funding would have a determining say in which country the site would be located.

Q54. When do you expect to have an agreement with the international partners about how to proceed to ITER site selection and construction commitment?

A54. The four ITER Parties recently accepted a tentative sequence of events that could lead to decisions about construction arrangements. This acceptance represents the first level of agreement, i.e., solely the desired timing of preparatory discussions and following negotiations, with the other Parties on how we might proceed toward construction decisions. This sequence projects that the Parties should begin non-committal, pre-negotiation discussions by July of this year. This timing would maintain the possibility of reaching agreement on mutually acceptable construction arrangements before the end of the current Engineering Design Activities in July 1998. The other ITER Parties appear to have the authority to enter such discussions. If the U.S. does decide to enter these non-committal discussions by July, then the further projection of the sequence is that negotiations should be initiated by the middle of 1997. Mutual readiness for negotiations would represent a higher level of agreement on how to proceed toward construction decisions, namely, substantive approaches including specific proposed responsibilities for the likely host and non-host parties.

Q55. What are the current estimated decontamination and decommissioning costs of the TFTR?

A55. The decontamination and decommissioning of the Tokamak Fusion Test Reactor (TFTR) would follow the safe shutdown of the TFTR facility at the conclusion of deuterium-tritium operation. It would include dismantling and disposing of all TFTR systems that will no longer be needed. Total costs for this work, including waste disposal, were previously estimated to be about \$140 million (in fiscal year 1994 dollars), assuming that the building and many ancillary systems would be reused in the future. A revised project plan for decommissioning the TFTR facility will need to be prepared in the light of current program plans and priorities.

Approximately \$4 million per year is required to mothball and safeguard the facility until a decision is made to begin the actual decontamination and decommissioning activity.

Basic Energy Sciences

Q56. What are the prospects for upgrading the HFBR and HFIR research reactors at Brookhaven National Laboratory and Oak Ridge National Laboratory, respectively? Specifically, what, if any, studies are underway or have been concluded that have addressed such upgrades, and what are the projected costs of each such upgrade?

A56. Preliminary studies by Brookhaven and Oak Ridge indicate that technically both of these reactors could be upgraded. In the case of the HFBR, the pressure vessel would be replaced, the position of the cold source would be moved to a better position in the new pressure vessel, and a guide hall for cold neutrons would be built. In the case of the HFIR, a small guide hall would be built to use a small cold source incorporated in one of the beam tubes and a small guide hall would be built for thermal neutrons from another beam tube.

Because of the importance of these reactors to the Nation, these upgrades are under serious consideration; however, there are many factors, including their cost and schedules, regulatory requirements and impact on programs, that have not yet been fully determined. Plans are underway to determine more accurately these factors further.

The Basic Energy Sciences Advisory Committee was asked to study the need and possibilities for upgrades to the research reactors. The Advisory Committee has advised the Department that the reactors would need to continue operations because the Advanced Neutron Source will not be built and that upgrades would be needed if the Nation is to meet well documented needs for neutrons for neutron scattering, isotope-production, and materials irradiation studies. There are no firm cost estimates now. The very preliminary estimates, based on feasibility studies, indicate that the costs will be in the \$100-\$200 million range for the HFBR and \$50-\$100 million range for the HFIR. The Department is seriously considering these recommendations and will provide resources, subject to the availability of funds, for further technical analysis in FY 1997 once decisions are made regarding the upgrades.

Q57. What are the prospects for upgrading the IPNS spallation neutron source and the Manuel Lujan, Jr. Neutron Scattering Center at Argonne National Laboratory and Los Alamos Laboratory, respectively? Specifically, what, if any studies are underway or have been concluded that have addressed such upgrades, and what are the projected costs of each such upgrade?

A57. The Manuel Lujan, Jr. Neutron Scattering Center, a short pulse spallation source at Los Alamos National Laboratory, could be upgraded to higher powers for a modest cost (about \$40 million). Preliminary studies by Los Alamos indicate that the existing linear accelerator, which is used by the Manuel Lujan, Jr. Neutron Scattering Center, could also provide 800 MeV protons directly to a new target for a new (one millisecond) long-pulse spallation source. The cost of this option is about \$90 million. The IPNS cannot be upgraded. Essentially a new facility with a new linear accelerator, synchrotron ring, and target would have to be built. The prospects for these upgrades depend on many factors, including their cost and schedules and impact on programs, that have not yet been fully determined.

The Basic Energy Sciences Advisory Committee was asked to study the need and possibilities for upgrades to spallation neutron sources. The Advisory Committee recommended additional studies on the long-pulse concept and cost of the target and instrumentation. The cost for this upgrade, based on preliminary feasibility studies, is in the \$100-\$200 million range. The upgrade for the IPNS with a 400 kilowatt target is in the \$400-500 million range. The Advisory Committee advised the Department that the IPNS upgrade was not justified based on cost and to consider lower-cost upgrade options for a spallation neutron source in the 100 to 200 kilowatt power range. The Department is considering an upgrade of the Manuel Lujan, Jr. Neutron Scattering Center at Los Alamos.

The preliminary estimate for an upgrade of this facility to a power of 16.0 kilowatts is about \$40 million including additional instrumentation.

Q58a. What is the status of the Continental Scientific Drilling Program?

A58a. The Continental Scientific Drilling Program is becoming a broad-based international program under the leadership of the National Science Foundation. Formal DOE participation under Basic Energy Sciences will be concluded in FY 1997. Support of the DOE Geosciences Research Drilling Office at Sandia National Laboratories (Albuquerque) concluded in FY 1995 and it is expected that support of the DOE Core repository at Grand Junction will terminate in FY 1996. Coordination of research activities (U.S. Geological Survey, National Science Foundation, and Department of Energy) under the Interagency Coordinating Group for Continental Scientific Drilling will continue as they are mutually beneficial. We will continue to support research activities using down-hole measurements and samples as they related to DOE missions and objectives. Research projects will be selected on the basis of individual investigator initiated research proposals subjected to expert peer review.

Q58b. What is the Program's funding in FY 1995, FY 1996, and FY 1997?

A58b. FY 1995	\$897,000
FY 1996	\$525,000
FY 1997	\$200,000

Q58c. When is the program due to be completed?

A58c. Participation by DOE Basic Energy Sciences will be concluded in FY 1997.

Q58d. What are the out-year funding requirements?

A58d. There are no out-year funding requirements.

Q59. Please provide a brief description of the Advanced Energy Projects subprogram current (FY 1996) and anticipated (FY 1997) portfolio.

A59. The Advanced Energy Projects subprogram funds research to establish the feasibility of novel energy-related concepts that span the Department's energy mission and are usually derived from advances in basic research. A common theme for each concept is the initial linkage of new, or previously neglected, research results to a practical payoff for the U.S. energy economy. Concepts are typically supported at a level of \$300,000 per year for a period of 3 years.

Of the 55 projects currently in the AEP research portfolio, nine (9) were initiated so far in fiscal year 1996. New projects under investigation include a potentially highly-efficient approach for converting methane into heat and a novel technique for producing magnets for micromotors. One project nearing completion is developing a precise optical method for mapping oil and gas fields, eliminating the need to use radioactive tracers.

In FY 1997, we plan to initiate about 10-15 projects. Possible projects will address innovative energy approaches that reduce the dependency on traditional fuels. We expect some of these approaches will involve biologically-based techniques. Also, we plan to continue those projects initiated in FY 1995 and FY 1996 toward completion as scheduled.

Scientific Facilities Initiative

60. The FY 1996 request for the Scientific Facilities Initiative (SFI) was \$100 million (\$60 for BES, \$25 million in Nuclear Physics, and \$15 million in High Energy Physics).

Q60a. For the original \$100 million request, please provide a table listing, by facility, the funding for each and the number of hours of operation expected at that funding level.

A60a.

Fossil Energy R&D Program

Q62. Assuming zero funding for Fossil Energy R&D in FY 1998, please provide the funding required in FY 1997 to provide for closeout costs (including contract termination costs) for each Fossil Energy R&D Program/Subprogram/Project/Activity.

A62. The primary areas directly impacted by closeout include contracts, personnel, site remediation, and site closedown. The following estimates are conservative and do not reflect the potentially high costs of litigation:

Fossil Energy R&D Closeout Costs
(Expressed in \$ Thousands)

COST	METC	PETC	BPO
Contract Closeout/Termination	176,000	145,000	63,000
Personnel Costs	15,000	15,000	2,000
Site Remediation	4,200	55,100	6,000
Site Closedown	5,000	10,600	4,000
Total Estimated Costs	200,200	225,700	75,000

Grand Total: \$500,900

The estimates assume that close out of the programs begins immediately at the start of FY 1997, and that no programmatic work is performed. These estimates do not include the sunk costs in the program, that is the funding already expended on projects which would be terminated before a logical conclusion could be reached. The loss of scientific results which can help industry in the development and utilization of the Nation's fossil fuel resources will jeopardize U.S. global leadership in fossil energy technology; produce unacceptable environmental costs; lead to higher-cost fossil fuels; and increase energy security risks.

The promotion of public-private partnerships have been a successful mechanism for funding fossil fuel research projects. The investments made by both the industry partners and the government are tremendous, and if terminated, would provoke intense criticism of the government, the Administration, and the Congress. The goodwill generated by these partnerships would be lost and it would be difficult for the government to rebuild the thrust that would be destroyed.

Clean Coal Technology Program

Q63. Please provide a brief description of each of the 42 projects in the Clean Coal Technology Program, including information on the current status, funding to date (both DOE and non-DOE), what remains to be done and completion date, and remaining funding (both DOE and non-DOE).

A63. Attached is a complete listing of the 42 projects in the Clean Coal Technology Program.

PROJECT: Circulating Fluidized-Bed Cogeneration Project

PARTICIPANT: York County Energy Partners, L.P.

TECHNOLOGY: Foster Wheeler Energy Corporation's Atmospheric Circulating Fluidized-Bed (ACFB) Combustor technology

PROJECT DESCRIPTION: Project demonstrates a greenfield cogeneration facility using a 250-MWe Atmospheric Circulating Fluidized-Bed (ACFB) boiler to generate 227-MWe electric power and 400,000 pounds of steam per hour for industrial use.

STATUS: The project completed preliminary design, National Environmental Policy Act process and sufficient detail design for construction readiness. The Participant has withdrawn the project from the North Codorus Township site due to their inability to obtain the land use permit and changes to their power purchase agreement. The Participant is currently investigating siting alternatives. A date for project completion is uncertain.

COMPLETION: To be determined.

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$69,543,833	\$5,190,000	\$74,733,833
PARTICIPANT	\$329,354,981	\$32,304,000	\$361,658,981

PROJECT: Combustion Engineering IGCC Repowering Project

PARTICIPANT: ABB Combustion Engineering, Inc.

TECHNOLOGY: ABB Combustion Engineering's Integrated Gasification Combined-Cycle (IGCC) System

PROJECT DESCRIPTION: Demonstrate an advanced dry-feed, air-blown, two-stage, entrained-flow coal gasifier (65 MWe) with limestone injection and moving-bed zinc ferrite gas cleanup system to assess long-term reliability, maintainability, and availability for commercial applicability.

STATUS: The project completed preliminary design and economic tradeoff studies. The Participant is currently restructuring the project for another site and conducting project definition activities. Detail design, environmental permitting, construction and operation are activities that remain to be completed. Project completion is scheduled for March 2002.

COMPLETION: March 2002

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$7,800,000	\$121,557,204	\$129,357,204
PARTICIPANT	\$7,855,847	\$133,486,949	\$141,342,796

PROJECT: PFBC Utility Demonstration Project

PARTICIPANT: The Appalachian Power Company

TECHNOLOGY: ABB Carbon AB and Babcock & Wilcox (B&W) Bubbling Pressurized Fluidized-Bed Combustion (PFBC) system

PROJECT DESCRIPTION: Project demonstrates a 330-MWe Pressurized Fluidized-Bed Combustion (PFBC) Combustor/Gas Turbine Module in a "greenfield" plant.

STATUS: Preliminary design and economic tradeoff studies have been completed for the project. DOE is currently evaluating a proposal from the Participant to restructure and relocate the project. Detail design, environmental permitting, construction and plant operations are the activities that remain to be completed. Project completion is scheduled for October 2002.

COMPLETION: October 2002

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$9,088,000	\$175,712,000	\$184,800,000
PARTICIPANT	\$10,545,600	\$722,598,400	\$733,144,000

PROJECT: Commercial Demonstration of the NOXSO SO₂/NO_x Removal Flue Gas Cleanup System

PARTICIPANT: NOXSO Corporation

TECHNOLOGY: NOXSO Corporation's dry, regenerable flue gas cleanup process.

PROJECT DESCRIPTION: Project demonstrates SO₂ and NO_x removal from flue gas from a 144-MWe pulverized-coal wall-fired boiler using 3.3 percent sulfur coal.

STATUS: Project is currently in detailed engineering and construction has commenced. Operations are scheduled to commence in March 1997, and the project is scheduled to be completed in March 1999.

COMPLETION: March 1999

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$21,917,684	\$19,488,376	\$41,406,060
PARTICIPANT	\$21,917,684	\$19,488,376	\$41,406,060

PROJECT: Pressurized Circulating Fluidized Bed Demonstration Project

PARTICIPANT: DMEC-1 Limited Partnership (a partnership between Dairyland Power Cooperative and Midwest Power Systems, Inc. [previously Iowa Power, Inc.])

TECHNOLOGY: Ahlstrom Pyropower Corporation's PYROFLOW pressurized circulating fluidized-bed combustion (PCFB) combined-cycle system (advanced electric power generation/fluidized-bed combustion).

PROJECT DESCRIPTION: Project demonstrates PCFB at 80 MWe to evaluate environmental, cost, and plant performance in a commercial-scale greenfield operation.

STATUS: Project design and economic tradeoff studies have been completed. The Participant is preparing a proposal to restructure and relocate the project. Detail design, environmental permitting, construction, and plant operations are the activities that remain to be completed. Operations are scheduled to commence in March 1997, and the project is scheduled to be completed in March 2001.

COMPLETION: March 2001

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$5,958,000	\$87,295,000	\$93,253,000
PARTICIPANT	\$6,038,000	\$103,668,000	\$109,706,000

PROJECT: Micronized Coal Reburning Demonstration for NO_x Control

PARTICIPANT: New York State Electric and Gas Corporation

TECHNOLOGY: Coal Reburn

PROJECT DESCRIPTION: Demonstrate a 50-60 percent NO_x reduction through the retrofit of a 145 MWe tangentially-fired boiler and a 50 MWe cyclone boiler with advanced coal reburning technology.

STATUS: Project is in design stage. Construction and operations remain to be completed. Project is scheduled to be completed in May 1999.

COMPLETION: May 1999

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$2,701,011	\$0	\$2,701,011
PARTICIPANT	\$8,982,379	\$0	\$8,982,379

PROJECT: Coal Diesel Combined-Cycle Project

PARTICIPANT: Arthur D. Little, Inc.

TECHNOLOGY: Copper-Bessemer's coal-fueled diesel engine combined-cycle system

PROJECT DESCRIPTION: The project is centered around two Copper-Bessemer medium-speed (400 rpm) diesel engines (6.3 MWe each) modified to operate on coal-water fuel. The clean coal is ground and slurried with water and then injected into each of the engine's 20 cylinders. The exhaust gases from the engine pass through an integrated emission-control system capable of reducing pollutants while protecting the engine's turbocharger and maintaining high engine and overall system efficiency.

STATUS: The project is currently conducting project definition activities. Detailed design, construction, and operations remain to be completed. Project completion is scheduled for September 1998.

COMPLETION: September 1988

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$2,137,350	\$17,017,408	\$19,154,758
PARTICIPANT	\$2,137,350	\$17,017,408	\$19,154,758

PROJECT: Four Rivers Energy Modernization Project

PARTICIPANT: Four Rivers Energy Partners, L.P..

TECHNOLOGY: Foster Wheeler Energy Corporation's fully integrated second-generation Pressurized Circulating Fluidized-Bed System (PCFB) Combined Cycle Cogeneration

PROJECT DESCRIPTION: Coal is fed to a pressurized carbonizer that produces a low-Btu fuel gas and char. After the fuel gas is cleaned of particulates and alkali vapors by a cyclone, ceramic filter, and alkali removal system, it is burned in a topping combustor to drive a gas turbine. The gas turbine drives a generator and a compressor that delivers air to the carbonizer and to a PCFB combustor. Additional coal and the carbonizer char are burned in the PCFB combustor, and the flue gas is used to combust the fuel gas in the topping combustor.

STATUS: Project definition and preliminary design are currently being conducted. The Participant is preparing a proposal to restructure and relocate the project. Detailed design, environmental permitting, construction, and plant operations are the activities that remain to be completed. Project completion is scheduled for September 2001.

COMPLETION: September 2001

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$13,936,600	\$128,523,400	\$142,460,000
PARTICIPANT	\$14,334,000	\$293,913,500	\$218,247,500

PROJECT: Warren Station Externally Fired Combined-Cycle Demonstration Project

PARTICIPANT: Pennsylvania Electric Company

TECHNOLOGY: Hauge International's Externally Fired Combined-Cycle (EFCC) system using a novel, high temperature, ceramic gas-to-air heat exchanger.

PROJECT DESCRIPTION: An existing coal-fueled steam plant will be repowered by adding an externally fired gas turbine to form a combined-cycle system. The central features are a ceramic air heater or heat exchanger and an atmospheric combustor, which together will replace a conventional combustion system in a open-cycle gas turbine.

STATUS: The project is currently in the project definition stage. The Participant is investigating site alternatives for a restructured project. Project completion is scheduled for November 1999.

COMPLETION: November 1999

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$2,200,000	\$71,216,000	\$73,416,000
PARTICIPANT	\$2,200,000	\$71,216,000	\$73,416,000

PROJECT: Clean Energy Demonstration Project

PARTICIPANT: Clean Energy Partner's Limited Partnership

TECHNOLOGY: Integrated gasification combined-cycle (IGCC) using British Gas/Lurgi slagging fixed-bed gasification system coupled with Fuel Cell Engineering's 1.25 MWe Molten Carbonate Fuel Cell (MCFC).

PROJECT DESCRIPTION: Coal fines are formed into briquettes and fed to the gasifier along with screened coal. The coal and briquettes are gasified in an oxygen-blown, pressurized, slagging, fixed-bed gasifier. The raw product gas is quenched to reduce the temperature and remove tars, oils, ammonia, and particulates. The particulates and condensed tars and oils are recycled to the gasifier to ensure high cold-gas efficiency. The cooled product gas is routed to a conventional cold-gas cleanup system to remove sulfur compounds. The clean, medium-Btu gas is reheated and burned in an advanced 192-MWe gas turbine. A small slipstream of clean product gas is diverted to a gas-polishing and moisturization step and used to fuel a 2.5 MWe MCFC.

STATUS: The project is currently conducting project definition activities. Preliminary design, detailed design, environmental permitting, construction and operation are project activities that remain to be completed. Project completion is scheduled for June 2001.

COMPLETION: June 2001

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$3,866,482	\$179,433,518	\$183,300,000
PARTICIPANT	\$12,330,026	\$645,466,163	\$657,796,189

PROJECT: Tampa Electric Integrated Gasification Combined-Cycle Project

PARTICIPANT: Tampa Electric Company

TECHNOLOGY: Oxygen-Blown/Integrated Gasification Combined-Cycle system (IGCC)

PROJECT DESCRIPTION: Project demonstrates the integrated performance of a 260-MWe pressurized oxygen-blown, entrained-flow coal gasifier island, coupled with a combustion and steam turbine power island. The project is part of a larger Tampa Electric generation expansion project.

STATUS: The project is currently in construction. Construction is approximately 70% complete with operations scheduled to commence in late 1996. Project completion is scheduled for October 1998.

COMPLETION: October 1998

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$110,253,223	\$32,741,000	\$142,994,223

PROJECT: Healy Clean Coal Project

PARTICIPANT: Alaska Industrial Development and Export Authority (AIDEA)

TECHNOLOGY: TRW's advanced entrained (slagging) combustor; Joy Technologies' spray dryer absorber with sorbent recycle.

PROJECT DESCRIPTION: Project demonstrates, in a greenfield 50 MWe coal-fired power plant, the integration of the advanced TRW slagging combustor with a Joy Technologies dry scrubber for both high- and low-temperature emission control of NO_x, SO₂ and particulates.

STATUS: The project is currently in construction. Operations is 20% complete. Project completion is scheduled for February 2001.

COMPLETION: February 2001

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>

PROJECT: Commercial-Scale Demonstration of the Liquid-Phase Methanol (LPMEHO™) Process

PARTICIPANT: Air Products and Chemicals, Inc.

TECHNOLOGY: Air Products' liquid-phase methanol (LPMEHO™)

PROJECT DESCRIPTION: Project demonstrates, on a commercial scale (nominal 260 ton/day), the production of methanol and coproduction of methanol and dimethyl ether from coal-derived synthesis gas as an alternative fuel for boiler, turbine, and transportation applications.

STATUS: The project is currently in construction. Operations are scheduled to commence in December 1996. Final reporting and project completion are scheduled for December 2001.

COMPLETION: December 2001

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>
DOE	\$25,569,912	\$67,138,458	\$92,708,370

PROJECT: Self-Scrubbing Coal™: An Integrated Approach to Clean Air

PARTICIPANT: Custom Coals International (a joint venture between Genesis Coal Limited Partnership and Genesis Research Corporation).

TECHNOLOGY: Coal preparation using advanced physical coal cleaning, fine magnetite separation technology and sorbent addition technology

PROJECT DESCRIPTION: Project demonstrates the production of Self-Scrubbing and Carefree Coal at the 500-tph scale using advanced physical coal cleaning and coal/sorbent reconstitution techniques during pelletization.

STATUS: Project is currently in operations. Completion of operations and final reporting remain. Project completion is scheduled for November 1996.

COMPLETION: November 1996

PROJECT: Advanced Coal Conversion Process Demonstration

PARTICIPANT: Rosebud SynCoal Partnership (a partnership between Western Energy Company, a subsidiary of Montana Power Company, and the NRG Group, a nonregulated subsidiary of the Northern States Power Company)

TECHNOLOGY: Rosebud SynCoal Partnership's advanced coal conversion process for upgrading low-rank subbituminous and lignite coals

PROJECT DESCRIPTION: The project will demonstrate the application of an advanced thermal coal drying processes with physical coal cleaning to reduce moisture and sulfur content, enhancing the thermal and environmental characteristics of low-rank subbituminous and lignite coals. The plant will have a product capacity of 45 tons per hour (300,000 tons/year).

STATUS: The project is in operations. Completion of operations and final reporting remain. Project completion is scheduled for November 1997.

PROJECT: Integrated Dry NO_x/SO₂ Emissions Control System

PARTICIPANT: Public Service Company of Colorado

TECHNOLOGY: Babcock & Wilcox (B&W) Low-NO_x burners, NO_x ports, in-duct sorbent injection, and furnace (urea) injection

PROJECT DESCRIPTION: Project demonstrates, at 100 MWe, that the combination of down-fired low-NO_x burners, NO_x ports, in-furnace urea injection, and sodium- or calcium-based reagent injection removes NO_x and SO₂ from utility boiler flue gas.

STATUS: The project is currently in construction. Operations and final report remain to be completed. Project completion is scheduled for July 1996.

COMPLETION: July 1996

PROJECT: ENCOAL Mild Coal Gasification Project

PARTICIPANT: ENCOAL Corporation (a subsidiary of Zeigler Mining Company)

TECHNOLOGY: SGI International's Liquids From Coal (LFC) process

PROJECT DESCRIPTION: Project demonstrates mild gasification of low-rank coals to produce two higher value fuel forms. The demonstration plant will process 1,000 tons of Powder River Basin subbituminous coal per day.

STATUS: The project is in operations. Completion of operations and final reporting is scheduled for September 1996.

COMPLETION: September 1996

PROJECT: Innovative Coke Oven Gas Cleaning System for Retrofit Applications

PARTICIPANT: Bethlehem Steel Corporation

TECHNOLOGY: Thyssen Still/Otto's process for precombustion cleaning of coke oven gas (COG)

PROJECT DESCRIPTION: Demonstration of simultaneous removal of hydrogen sulfide and ammonia from COG to reduce SO₂ emissions by at least 80 percent, reduce emissions of volatile organic compounds, and discharge of ammonia to wastewater treatment.

STATUS: Coke-making operations were suspended on December 5, 1991, and the project was mutually terminated on April 10, 1995.

COMPLETION: April 1995

PROJECT: Wabash River Coal Gasification Repowering Project

PARTICIPANT: Wabash River Coal Gasification Repowering Project Joint Venture (a joint venture of Destec Energy, Inc. and PSI Energy, Inc.)

TECHNOLOGY: Destec two-stage, oxygen-blown, entrained-flow coal gasifier.

PROJECT DESCRIPTION: Demonstrate the commercial scale (265 MWe) use of the IGCC process through retrofit of one of six existing units at the site.

STATUS: The project is currently in operations. Project completion is scheduled for June 1999.

COMPLETION: June 1999

	<u>FUNDING TO DATE</u>	<u>REMAINING FUNDING</u>	<u>TOTAL</u>

PROJECT: Enhancing the Use of Coals by Gas Reburning and Sorbent Injection

PARTICIPANT: Energy and Environmental Research Corporation (EER)

TECHNOLOGY: Energy and Environmental Research Corporation's gas reburning and sorbent injection process

PROJECT DESCRIPTION: Project demonstrates gas reburning for NO_x control with sorbent injection for SO₂ control (GR/SI) on two different boiler configurations: cyclone 40-MWe Springfield site, and tangentially-fired 80 MWe Hennepin site).

STATUS: Project operations have been completed, and the final report is in review. Project completion is scheduled for March 1996.

COMPLETION: March 1996

PROJECT: SNOX™ Flue Gas Cleaning Demonstration Project

PARTICIPANT: ABB Environmental Systems

TECHNOLOGY: Haldor Topsoe's SNOX catalytic advanced flue gas cleanup system

PROJECT DESCRIPTION: Project demonstrates post-combustion flue gas cleanup for combined removal of SO₂ and NO_x, with production of salable sulfuric acid by-product on a 35-MWe boiler.

STATUS: Project operations have been completed, and the final report is in review. Project completion is scheduled for April 1996.

COMPLETION: April 1996

PROJECT: Demonstration of Innovative Applications of Technology for the CT-121 Flue Gas Desulfurization (FGD) Process

PARTICIPANT: Southern Company Services, Inc. (SCS)

TECHNOLOGY: Chiyoda Corporation's Thoroughbread-121 (CT-121) advanced flue gas desulfurization (FGD) process

PROJECT DESCRIPTION: Project demonstrates the CT-121 process at 100-MWe scale, using fiberglass reinforced plastic absorber, ducts, silos and chimney.

STATUS: Project operations have been completed. Gypsum investigations and preparation of the final report are on-going. Project completion is scheduled for January 1997.

COMPLETION: January 1997

PROJECT: Advanced Flue Gas Desulfurization Demonstration Project

PARTICIPANT: Pure Air on the Lake, L.P.

TECHNOLOGY: Pure Air's Advanced Flue Gas Desulfurization (AFGD) process

PROJECT DESCRIPTION: Project demonstrates an advanced wet limestone scrubber concept at 528 MWe, reducing SO₂ by half the cost of conventional scrubber technology, and by producing wallboard-grade gypsum as a byproduct.

STATUS: Project operations were completed in June 1995. Final report is in review and scheduled for completion in June 1996. Northern Indiana Public Service Company has retained the project and continued operations.

COMPLETION: June 1996

PROJECT: Nucla CFB Demonstration Project

PARTICIPANT: Tri-State Generation and Transmission Association, Inc.

TECHNOLOGY: Pyropower's Atmospheric Circulating Fluidized-Bed (ACFB) Combustion System.

PROJECT DESCRIPTION: Project demonstrates the economic, environmental and technical feasibility of ACFB technology at utility scale (110 MWe) for repowering and life extension of existing units.

STATUS: The project is over and DOE has received the final report. The two-year operation period was successfully completed with over 15,700 hours of operations and demonstrated NO_x and SO₂ control levels well within the New Source Performance Standards. The project completion was scheduled in April 1992.

PROJECT: Tidd PFBC Demonstration Project

PARTICIPANT: The Ohio Power Company

TECHNOLOGY: ABB Carbon AB and Babcock & Wilcox (B&W) pressurized fluidized-bed combustion (PFBC) system

PROJECT DESCRIPTION: Project demonstrates PFBC technology at 70-MWe capacity in a combined cycle made by repowering Unit 1 boiler at the Tidd Plant with a PBC system and the addition of a gas cycle. The objective is to verify economic, environmental, and technical performance in a combined cycle repowering application.

STATUS: The project is over and DOE has received the final report. The project completed 95 parametric tests and more than 11,400 hours of coal-fired operations with continuous runs of up to 45 days. Over 5,800 hours of operation were achieved on tests for the advanced hot gas cleanup ceramic-candle filters. The project was completed in March 1995.

COMPLETION: March 1995

PROJECT: Clean Power From Integrated Coal/Ore Reduction (COREX®)

PARTICIPANT: Centurion Energy Corporation

TECHNOLOGY: Integration of Deutsche Voest-Alpine Industrieanlagenbau's COREX® iron-making process with a combined-cycle power generation system

PROJECT DESCRIPTION: COREX® is a novel iron-making technology which eliminates the need for coke production. The key innovative features of the COREX® process include the reduction shaft furnace to reduce the iron ore to iron, and the melter-gasifier that gasifies the coal and melts the iron. The gasification process generates the reducing gas for use in the reduction furnace as well as sufficient heat to melt the resulting iron in the melter-gasifier. Excess reducing gas exiting the reduction furnace is cooled, cleaned, compressed, mixed with air and nitrogen, and burned in a gas turbine generator system capable of combusting low-Btu fuel gas.

STATUS: The project was selected May 4, 1993. Negotiation towards a cooperative agreement were completed September 1994. DOE is evaluating the project for award. Project completion date is to be determined.

COMPLETION: To be determined

Q64. How much funding will DOE need to complete the Clean Coal Technology Program and in what year will those funds be needed?

A64. The current amount appropriated through FY 1996 is \$2,409,716,000. An additional \$137,879,000 in budget authority is scheduled for appropriation in FY 1997 for a total amount of \$2,547,595,000 for the Clean Coal Technology Demonstration Program. By the end of FY 1996 total obligations are expected to be \$1,467,000,000. The Department's FY 1997 budget proposes that \$137,879,000 appropriated in current law is allowed to become available at the start of FY 1997, while rescinding \$325,000,000 in FY 1997, and deferring the availability of \$312,879,000 in unobligated balances until the start of FY 1998. The estimated obligations for the remaining projects and program direction activities for FY 1997 to FY 2001 are as follows:

<u>1997</u>	<u>1998</u>	<u>1999-2001</u>	<u>TOTAL</u>
\$217	\$420	\$118	\$755

Q65. What is the current level of:

Q65a. CCTP unobligated balances; and

A65a. As of January 31, 1996, the Clean Coal Technology Demonstration Program had \$974,098,141 in budget authority available for obligation. This figure includes the \$150,000,000 appropriation for FY 1996 as specified in P.L. 103-332. It does not include the \$137,879,000 of Advanced Appropriations for FY 1997.

Q65b. CCTP uncosted balances.

A65a. As of January 31, 1996, the Clean Coal Technology Demonstration Program had \$349,752,693 in obligations that had not been outlaid.

Energy Conservation R&D Program

Q66. Assuming zero funding for Energy Conservation R&D in FY 1998, please provide the funding required in FY 1997 to provide for closeout costs (including contract termination costs) for each Energy Conservation R&D Program/Subprogram/Project/Activity.

A66. Following is a summary table of Energy Conservation R&D closeout costs. Supporting documentation is attached.

Energy Conservation R&D Closeout Costs
(In Millions of \$)

SECTOR	CLOSEOUT COSTS
Transportation Technologies	\$153.4
Industrial Technologies	\$33.0
Building Technologies	\$38.0
Federal Energy Management Program (FEMP)	\$1.0
Total, Energy Conservation Closeout	\$225.4

The following tables provide funds required in FY 1997 to closeout Energy Efficiency activities, assuming zero funding in FY 1998.

Federal Energy Management Program

Closeout costs should be budgeted at \$1 million per year through 2008. In addition, closeout costs for new technology demonstration projects over the next few years should be budgeted at about \$1.5 million. If these cost savings contracts are completely closed out in 1998 there would likely be termination costs for work started that would amount to \$30 to \$50 million. In addition, future budget savings of \$60 to \$100 million over the life of the projects would be lost.

The Honorable Dr. Robert J. Huggett
Assistant Administrator for Research and Development
U.S. Environmental Protection Agency

FY 1997 Request for DOE, NOAA, EPA and Safe Drinking Water R&D

Thursday, March 21, 1996
2318 Rayburn House Office Building

Prehearing Questions Submitted to

Hon. Dr. Robert J. Huggett
Assistant Administrator for Research and Development
U.S. Environmental Protection Agency

EPA ORD/Contractor Personnel

- Q1. By location (city and state), please identify every EPA ORD office located in the United States. For each office for fiscal years 1995, 1996, and 1997, please provide the number of employees, the funding to maintain the office staff and office space, and the program element funding administered by each office.
- Q2. Please provide a table showing fiscal year 1995 yearend and fiscal years 1996 and 1997 planned yearend personnel strengths for each EPA ORD organization, including all operations, field, area, support and site offices, each laboratory and other GOGO/GOCO activities.
- Q3. Please provide a listing of the number of EPA ORD-contractor employees detailed to EPA headquarters and to each EPA operations, field, area, site or support office outside of Washington for each of fiscal years 1995, 1996 and 1997.

A1,A2, A3. The attached tables provide the resource information requested for the years this information is available.

Employees

Information on ORD employees includes:

- End of year (FY 95) onboard levels;
- Current (FY 96) on-board levels.

The total FY 97 President's Budget Request is 1,930 work-years. Work-year levels at the specific organization level are formally developed as part of the operating plan process and are not available at this time.

Resources

Information has been provided based on FY 95 actual obligations of new obligational authority (NOA). At this time, the Agency does not have a FY 96 final appropriation so this information cannot be provided. The FY96 current estimate reflects the annualized amount provided under continuing resolutions. ORD's FY 97 President's Budget Request total request is \$537M. FY97 resources at the specific organization level are formally developed as part of the Agency operating plan process and are not available at this time.

The attached tables contain the information requested regarding contractor employees at ORD sites. At this time we can provide this information for FY 95 and a current estimate for FY 96. At this time, we have not actual information available at this level of detail regarding the FY 97 President's Budget.

Summary—March 1996
Office of Research and Development (ORD)

Q4. Please provide the size of the public affairs offices maintained by EPA ORD Headquarters and by each EPA ORD operations, field, area, site or support office outside of Washington for each of fiscal years 1995, 1996 and 1997.

A4. Public Affairs Offices for the Office of Research and Development were located in the two offices of the Senior ORD Officials located in Cincinnati, Ohio, and Research Triangle Park, NC. These offices were abolished during Phase I of a two part ORD-wide reorganization implemented in April 1995. Functions were absorbed into the newly established National Risk Management Research Laboratory in Cincinnati and the National Exposure Research Laboratory in Research Triangle Park. There is one Federal employee with public affairs responsibilities located at each of these offices in Cincinnati and Research Triangle Park with no separate budget established.

Q5. Please provide the number of Schedule C and non-career SES employees by EPA ORD organization for each of fiscal years 1994, 1995 and 1996.

A5. ORD currently has no Schedule C or non-career SES employees on board and none for fiscal years 1994 and 1995.

Q6. How many employees, by organization, were hired by EPA ORD under the authority of the Ramspeck Act in fiscal years 1994, 1995 and 1996?

A6. The Office of Research and Development did not hire any employees under the authority of the Ramspeck Act in fiscal years 1994, 1995, or 1996 at any location.

Support Service Contracts

Q7. For each headquarters and field organization, please provide a list of all support service contracts including the cost of each contract and the program activity that funds each contract, the associated full-time employees, and the purpose for each contract. For each support service contract, please provide the average cost per employee.

A7. The information requested is listed below. The information specifically entails active contracts currently in place. In preparing our response to this question, we made the assumption that an  associated full-time employee is equal to a full-time equivalent (FTE) and one FTE equals 2,800 person hours.

For purposes of consistency, we used the Federal Acquisition Regulations Subpart 37.101 service contract definition as the definition for support service contracts. The definition is as follows:

"Service contract means a contract that directly engages the time and effort of a contractor whose primary purpose is to perform an identifiable task rather than to furnish an end item of supply. A service contract may be either a nonpersonal or personal contract. It can also cover services performed by either professional or nonprofessional personnel whether on

an individual or organizational basis. Some of the areas in which service contracts are found included the following:

- (a) Maintenance, overhaul, repair, servicing, rehabilitation, salvage, modernization, or modification of supplies, systems, or equipment;
- (b) Routine recurring maintenance of real property;
- (c) Housekeeping and base services;
- (d) Advisory and assistance services;
- (e) Operation of Government-owned equipment, facilities, and systems;
- (f) Communication services;
- (g) Architect-Engineering;
- (h) Transportation and related services;
- (i) Research and development."

The average cost per contractor employee is inclusive of all costs associated with the performance of the work. This includes direct labor, overhead, fringe benefits, travel, other direct costs, and contractor profit.

Support Service Contract 1

ORD Headquarters or Field Organization: Office of Science Policy

Contractor Name: Eastern Research Group, Inc.

Contract Number: 68D50028

Purpose of Contract: Technical Support for Peer Review Meetings, Workshops, Document Development, and Risk Assessment Guidelines Training

Total \$ Amount of Contract: \$3,147,072 (Base Period + 2 Option Periods)

Program Element(s):	FY 95 BGQ	\$15,000
	FY95 CC9	\$430,461
	FY96 JGQ	\$13,400

Number of Contract Full-Time Equivalents: 19.7

Average Cost Per Contractor Employee: \$159,851

Support Service Contract 2**ORD Headquarters or Field Organization:** Contract Project Officer

ORD/ORMA/MISS

Contract provides services for all ORD Offices

Contractor Name: OAO Corporation**Contract Number:** 68-W5-0065

Purpose of Contract: The ORD Facilities Administration and Information Resources (FAIR) contract provides on-site operations and maintenance support in the areas of technology transfer, applications and analysis support, visual information services, and operational/technical services. This is an Indefinite Delivery Indefinite Quantity (ID/IQ) contract, with an estimated maximum value and estimated number of labor hours. It includes a one-year base period of performance and four additional option years.

Total \$ Amount of Contract: \$71,107,726.00**Program Element(s):** CA-7, CA3, CC9 (as of 3/20/96)**Number of Contract Full-Time Equivalents:** 1,173 (5-year total); 235 per Year**Average Cost Per Contractor Employee:** \$60,611.00

Support Service Contract 3

ORD Headquarters or Field Organization: Contract Project Officer ORD/ORMA/MISS. Contract provides services for all ORD Offices

Contractor Name: ALM, Inc.

Contract Number: 68-W5-0011

Purpose of Contract: ADP Information Resource Management Services (AIRMS) primarily provides systems development and scientific support services, inclusive of: Application/systems development, including scientific and statistical applications, laboratory automation/administration systems, and graphics, imaging and visual systems; and scientific and statistical analysis and support of scientific platforms including high performance computer (HPC) systems, remote sensing, geographic information systems (GIS), and modeling systems.

Total \$ Amount of Contract: \$49,455,517.00

Program Element(s): TD1, CC1, CC2, CC3, CC6, CC7, CC9 and CA3

Number of Contract Full-Time Equivalents: 133 Contract FTE (FY 1996)

Average Cost Per Contractor Employee: \$74,000.00/year

Support Service Contract 4**ORD Headquarters or Field Organization:** All ORD Offices**Contractor Name:** E.H. Pechan & Associates**Contract Number:** 68-04-0125**Purpose of Contract:** To provide organizational/Systems Analysis Support to Improve Structure and processes essential for effective operation and administrative management control functions within ORD. This is a cost reimbursement level of effort contract with an estimated maximum value and estimated number of hours. It includes a one-year base period of performance and two option years.**Total \$ Amount of Contract:** \$3,707,663**Program Element(s):** CA3, TLX**Number of Contract Full-Time Equivalents:** 29 (3 years; 9.7 per year)**Average Cost Per Contractor Employee:** \$127,850**Support Service Contract 5****ORD Headquarters or Field Organization:** Office of Research and Science Integration**Contractor Name:** Environmental Management Support, Inc.**Contract Number:** 68D50132**Purpose of Contract:** Technical Support Services for science and research planning: To provide meeting, document, graphics support to ORD Planning activities. To provide LAN/PC operations and maintenance support.**Total \$ Amount of Contract:** \$2,974,916 (Base + 4 Option Periods)**Program Element(s):** CA3=\$65,000/FY95

CC9=\$245,000/FY95

CC1=\$24,000/FY96

Number of Contract Full-Time Equivalents: 4.81**Average Cost Per Contractor Employee:** \$123,760

Support Service Contract 6**ORD Headquarters or Field Organization:** NCERQA**Contractor Name:** Scientific Consulting Group, Inc.**Contract Number:** 68D40014**Purpose of Contract:** Technical Support to the Engineering Program.**Total \$ Amount of Contract:** \$2,469,431**Program Element(s):** CC9–Multimedia**Number of Contract Full-Time Equivalents:** 6.5**Average Cost Per Contractor Employee:** \$45.21 per hour x 2,080 hours = \$94,036**Support Service Contract 7****ORD Headquarters or Field Organization:** NCERQA**Contractor Name:** Research Triangle Institute**Contract Number:** 68D40091**Purpose of Contract:** Data Quality Assessment and Data Quality Objectives**Total \$ Amount of Contract:** \$9,325,800**Program Element(s):** CC9–Multimedia**Number of Contract Full-Time Equivalents:** 10.2**Average Cost Per Contractor Employee:** \$70.58 per hour x 2,080 hours = \$146,806

Support Service Contract 8**ORD Headquarters or Field Organization:** NCERQA**Contractor Name:** JWK International**Contract Number:** 68D30093**Purpose of Contract:** Support for the development and implementation of QAD's training strategy and program**Total \$ Amount of Contract:** \$1,071,821**Program Element(s):** CC9-Multimedia**Number of Contract Full-Time Equivalents:** 4.08**Average Cost Per Contractor Employee:** \$37.98 per hour x 2,080 hours = \$78,998**Support Service Contract 9****ORD Headquarters or Field Organization:** National Assessment for Environmental Assessment-Washington Division**Contractor Name:** Lockheed-Martin**Contract Number:** 68-W2-0025**Purpose of Contract:** PC and LAN Support**Total \$ Amount of Contract:** \$112,000 (for the delivery order)**Program Element(s):** CC9**Number of Contract Full-Time Equivalents:** 2**Average Cost Per Contractor Employee:** \$56,000

Support Service Contract 10

ORD Headquarters or Field Organization: National Assessment for Environmental Assessment—Washington Division

Contractor Name: National Academy of Sciences

Contract Number: 68-D5-0054

Purpose of Contract: Review of Federal Interagency Task Force Report

Total \$ Amount of Contract: \$150,000

Program Element(s): CC1

Number of Contract Full-Time Equivalents: 5

Average Cost Per Contractor Employee: \$30,000

Support Service Contract 11

ORD Headquarters or Field Organization: National Assessment for Environmental Assessment—Washington Division

Contractor Name: Versar, Inc.

Contract Number: 68-D5-0051

Purpose of Contract: Research and technical support for the exposure assessment group

Total \$ Amount of Contract: \$2,225,000

Program Element(s): CC9

Number of Contract Full-Time Equivalents: 77

Average Cost Per Contractor Employee: \$28,896

Support Service Contract 12**ORD Headquarters or Field Organization:** NCEA-Cincinnati**Contractor Name:** Armstrong Data Services, Inc.**Contract Number:** 68-W5-0024-Delivery Order #15**Purpose of Contract:** NCEA-Cincinnati Records Management**Total \$ Amount of Contract:** \$111,345 (Delivery Order Only)**Program Element(s):** CC4, CC9, TD1**Number of Contract Full-Time Equivalents:** 2**Average Cost Per Contractor Employee:** \$28.00 per hour**Contract Award Year:** FY 1996**Support Service Contract 13****ORD Headquarters or Field Organization:** NCEA-Cincinnati**Contractor Name:** Garcia, Inc.**Contract Number:** 68-W5-0016-Delivery Order #20**Purpose of Contract:** Support for the Superfund Technical Support Center Hotline and Risk Assessment Hotline**Total \$ Amount of Contract:** \$200,200 (Delivery Order Only)**Program Element(s):** TD1, CC9**Number of Contract Full-Time Equivalents:** 4**Average Cost Per Contractor Employee:** \$24.00 per hour**Contract Award Year:** FY 1995

Support Service Contract 14

ORD Headquarters or Field Organization: NCEA-Cincinnati

Contractor Name: Lockheed-Martin

Contract Number: 68-W2-0025

Purpose of Contract: PC and LAN Support

Total \$ Amount of Contract: \$50,000 for the delivery order

Program Element(s): CC9

Number of Contract Full-Time Equivalents: 1

Average Cost Per Contractor Employee: \$50,000

Support Service Contract 15

ORD Headquarters or Field Organization: NCEA-Cincinnati

Contractor Name: Syracuse Research Corporation

Contract Number: 68-C3-0369

Purpose of Contract: Technical Support for Health and Ecological Risk Assessment for NCEA

Total \$ Amount of Contract: \$3,082,019

Program Element(s): TD1, CC9, CC4, CC6, CC3, CC5, CC1

Number of Contract Full-Time Equivalents: 26

Average Cost Per Contractor Employee: \$72.00 per hour

Contract Award Year: FY 1994

Support Service Contract 16**ORD Headquarters or Field Organization:** NCEA-RTP**Contractor Name:** ALM Joint Venture**Contract Number:** 68-W5-0011-Delivery Order #0003**Purpose of Contract:** Benchmark Dose Software. Provide software to implement an improved method for evaluating health risks to the EPA to support health assessments and regulatory decisions concerning emissions to the air of hazardous chemicals**Total \$ Amount of Contract:** \$217,633**Program Element(s):** CC1A1E, CC9H1A**Number of Contract Full-Time Equivalents:** 2.6**Average Cost Per Contractor Employee:** \$82,681**Support Service Contract 17****ORD Headquarters or Field Organization:** NCEA-RTP**Contractor Name:** Information Organizers**Contract Number:** 68-D2-0133**Purpose of Contract:** Reference Support For the NCEA Criteria and Assessment Documents. Provide bibliographic support such as reference retrieval and reference verification.**Total \$ Amount of Contract:** \$982,552**Program Element(s):** CC1A1E, CC9H1A**Number of Contract Full-Time Equivalents:** 12.4**Average Cost Per Contractor Employee:** \$79,060

Support Service Contract 18**ORD Headquarters or Field Organization:** NCEA-RTP**Contractor Name:** Clement International Corp.**Contract Number:** 68-D2-0129**Purpose of Contract:** Development of Acute and Chronic Inhalation Concentrations and Research Needs Documents. Provide assistance with the development of inhalation reference concentrations.**Total \$ Amount of Contract:** \$3,735,851**Program Element(s):** CC1A1E**Number of Contract Full-Time Equivalents:** 36.3**Average Cost Per Contractor Employee:** \$102,853**Support Service Contract 19****ORD Headquarters or Field Organization:** NCEA-RTP**Contractor Name:** ManTech Environmental**Contract Number:** 68-D3-0139**Purpose of Contract:** Technical Support to NCEA Activities. Provides ADP, word processing, editing, graphics, technical reference, and records management support.**Total \$ Amount of Contract:** \$1,813,154**Program Element(s):** CC1A1E, CC9H1A**Number of Contract Full-Time Equivalents:** 37**Average Cost Per Contractor Employee:** \$48,915

Noncompetitive Awards

- Q8. For each of FY 1993 through FY 1996 (to date), please provide a listing by fiscal year, of all EPA ORD noncompetitive awards of financial assistance and contracts. For each such noncompetitive award, please provide the following information:
- Identity, including address and contact, of each awardee;
 - Description of work performed under the award;
 - Rationale for the noncompetitive award; and
- d. Funding, including the source of funding.
- A8. The information requested is attached. The information entails active financial assistance agreements and contracts currently in place.

<u>Noncompetitive Awards of Financial Assistance and Contracts: 1</u>													
<u>ORD Headquarters or Field Organization:</u> Office of Research and Science Integration													
<u>Type of Instrument:</u> Contract													
<u>Number:</u> 68-W4-0044													
<u>Name of Awardee:</u> National Academy of Sciences, National Research Council													
<u>Address:</u>	2010 Constitution Avenue, NW Washington, DC 20418												
<u>Contact:</u> James J. Reisa													
<u>Fiscal Year Awarded:</u> 1994													
<u>Description of Work:</u> In September, 1994, ORD entered into a two-year contract with the National Academy of Sciences, National Research Council to perform an independent evaluation of ORD's research program. In September, 1995, EPA modified the contract, asking the NRC to expand its focus from research management and peer review, to include a thorough evaluation of research priorities, emerging issues, and strategic opportunities.													
<u>Rationale for the Noncompetitive Award:</u> EPA was directed by Congress to obtain assessment of its R&D activities. Reference: Senate Report 103-311.													
<u>Total \$ Amount:</u> \$1,313,321													
<u>Name of Program Element(s):</u>	<table> <tr> <td>CC9</td> <td>FY94 = \$252,000</td> </tr> <tr> <td>TLX</td> <td>FY94 = \$ 48,000</td> </tr> <tr> <td>CC9</td> <td>FY95 = \$250,261</td> </tr> <tr> <td>TD7</td> <td>FY95 = \$ 48,000</td> </tr> <tr> <td>CC9</td> <td>FY95 = \$ 35,060</td> </tr> <tr> <td>CC9</td> <td>FY95 = \$680,000</td> </tr> </table>	CC9	FY94 = \$252,000	TLX	FY94 = \$ 48,000	CC9	FY95 = \$250,261	TD7	FY95 = \$ 48,000	CC9	FY95 = \$ 35,060	CC9	FY95 = \$680,000

Noncompetitive Awards of Financial Assistance and Contracts: 18

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Type of Instrument: Grant

Name of Awardee: Arkansas Children's Hospital

Address: 4302 W Markam St.
Little Rock, AK 72205

Contact: Joan Cranmer

Fiscal Year Awarded: 1995

Description of Work: Support 13th International Neurotoxicity Conference: Developmental Neurotox of Endocrine Disruptors.

Rationale for the Noncompetitive Award: Awarded from funds from congressional add-on for Narrates Research based on unique capability (specific conference and subject area).

Total \$ Amount: \$19,500

Name of Program Element(s): TD1

Noncompetitive Awards of Financial Assistance and Contracts: 19

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Type of Instrument: Grant

Name of Awardee: Case Western Reserve University

Address: 10900 Euclid Ave.
Cleveland, OH 44106

Contact: Hsan Mukhtac

Fiscal Year Awarded: 1995

Description of Work: International Symposium on Photo carcinogenesis mechanisms, models and human health implications.

Rationale for the Noncompetitive Award: Unique capability; presentation of information that EPA wishes to provide support and stimulation.

Total \$ Amount: \$10,000

Name of Program Element(s): CC9, CC1

Noncompetitive Awards of Financial Assistance and Contracts: 20

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Type of Instrument: Grant

Name of Awardee: Dutch National Research Program

Address: POB1 3720 BA Biltzoven
Netherlands

Contact: Tony Schneider

Fiscal Year Awarded: 1995

Description of Work: Enhancing the effectiveness of research to assist international climate change policy development.

Rationale for the Noncompetitive Award: Dutch were hosting the global change international meeting. The EPA provided partial funding for meeting: unique capability.

Total \$ Amount: \$120,000

Name of Program Element(s): CNR

Noncompetitive Awards of Financial Assistance and Contracts: 21

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Name of Awardee: Gulf Coast Research Laboratory

Address: POB 7000
703 East Beach Drive
Ocean Springs, MS 39564

Contact: Dr. Walker

Fiscal Year Awarded: 1990

Description of Work: Dose Response Relationships at Low Carcinogen Concentrations.

Rationale for the Noncompetitive Award: Original award made on unique combination of research skills in science areas relevant to small fish models.

Total \$ Amount: \$887,000

Name of Program Element(s): CC3

Noncompetitive Awards of Financial Assistance and Contracts: 22

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Type of Instrument: Cooperative Agreement

Name of Awardee: Michigan State University

Address: C-231 Holden Hall
East Lansing, MI 48624

Contact: William Cooper

Fiscal Year Awarded: 1994

Description of Work: Tropic Affiliation of Plantivourus in Lake Victoria.

Rationale for the Noncompetitive Award: Scientific merit of proposal, expertise and skill; experience in working with African governments.

Total \$ Amount: \$106,516

Name of Program Element(s): CC9

Noncompetitive Awards of Financial Assistance and Contracts: 23

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Type of Instrument: Grant

Name of Awardee: Society of Environmental Toxicology & Chemistry

Address: 1010 North 12th Ave.
Pensacola, FL 32501-3370

Contact: Robert Parnish

Fiscal Year Awarded: 1996

Description of Work: Partial support to SETAC meeting.

Rationale for the Noncompetitive Award: SETAC is a non-profit professional society establish to promote a multidisciplinary approach to solving problems related to various chemicals. Awarded on unique capabilities.

Total \$ Amount: \$75,000

Name of Program Element(s): CC9

Noncompetitive Awards of Financial Assistance and Contracts: 24

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Name of Awardee: University of Wisconsin

Address: Harlow Primate Laboratory
22 North Charter St.
Madison, WI 53715

Contact: Dr. Laughlin

Fiscal Year Awarded: 1990

Description of Work: Alterations of lead bio-markers during pregnancy, infancy and aging.

Rationale for the Noncompetitive Award: Unique exposure levels of lead by Rhesus monkeys over time and excellent unique animal model.

Total \$ Amount: \$265,455

Name of Program Element(s): CC9

Noncompetitive Awards of Financial Assistance and Contracts: 25

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Type of Instrument: Cooperative Agreement

Name of Awardee: World Health Organization-Programme for Environmental Health

Address: CH-1211
Geneva 27, Switzerland

Contact: Judy Stober

Fiscal Year Awarded: 1993

Description of Work: Joint projects between the WHO and EPA re: Environmental Health.

Rationale for the Noncompetitive Award: By agreement with WHO, ORD is the lead EPA office for work with WHO. WHO is a unique political and science entity that has entree to foreign countries.

Total \$ Amount: \$7,500,000

Name of Program Element(s): CC9, L6Q, BD2, BLV

Noncompetitive Awards of Financial Assistance and Contracts: 26

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Washington Division

Type of Instrument: Cooperative Agreement

Name of Awardee: World Health Organization-Programme for Chemical Safety

Address: CH-1211
Geneva 27, Switzerland

Contact: Judy Stober

Fiscal Year Awarded: 1994

Description of Work: Joint projects involving chemical safety.

Rationale for the Noncompetitive Award: By agreement with WHO, ORD is the lead EPA office for work with WHO. WHO is a unique political and science entity that has entree to foreign countries.

Total \$ Amount: \$1,500,000

Name of Program Element(s): CC6, BJK, B63, CC9, CC1, BH3, BPS, BJP, J3H

Noncompetitive Awards of Financial Assistance and Contracts: 27

ORD Headquarters or Field Organization: National Center for Environmental Assessment-Cin

Name of Awardee: American Waterworks Association Research Foundation

Address: 6666 W Quincy Ave.
Denver, CO 80235

Contact: Martin Allen

Fiscal Year Awarded: 1993

Description of Work: To provide both the water supply community and EPA with information on the best ways to implement and integrate water treatment process changes to comply with current and anticipated regulations.

Rationale for the Noncompetitive Award: Chap. 4.4#2. Congress directs expenditure of funds.

Total \$ Amount: \$1,029,521

Name of Program Element(s): CC4

Noncompetitive Awards of Financial Assistance and Contracts: 28**ORD Headquarters or Field Organization:** National Center for Environmental Assessment-Cin**Name of Awardee:** American Waterworks Association Research Foundation**Address:** 6666 W Quincy Ave.
Denver, CO 80235**Contact:** Martin Allen**Fiscal Year Awarded:** 1995**Description of Work:** The purpose of this project is to provide both the water supply community and EPA with information on the best ways to implement and integrate water treatment process changes to comply with current and anticipated regulations.**Rationale for the Noncompetitive Award:** Chap. 4.4#2. Congress directs expenditure of funds.**Total \$ Amount:** \$2,323,903**Name of Program Element(s):** CC4**Noncompetitive Awards of Financial Assistance and Contracts: 29****ORD Headquarters or Field Organization:** National Center for Environmental Assessment-Cin**Name of Awardee:** Black Technology Corporation**Address:** 4130 Linden Ave.
Suite 305
Dayton, OH 45432**Contact:** Alexander Black**Fiscal Year Awarded:** 1994**Description of Work:** Word Processing and Graphics Support for NCEA-Cin.**Rationale for the Noncompetitive Award:** Noncompetitive FAR Exception 6.302-5. Authorized or required by Statute 8a.**Total \$ Amount:** \$269,258**Name of Program Element(s):** CC3, CC4, CC5, CC6, CC9, TD1

*Noncompetitive Awards of Financial Assistance and Contracts: 30***ORD Headquarters or Field Organization:** National Center for Environmental Assessment-Cin**Name of Awardee:** Mississippi State University**Address:** Sponsored Programs Administration
P.O. Box 6156
Mississippi State, MS 39762**Contact:** Janice Chambers**Fiscal Year Awarded:** 1993**Description of Work:** Aquatic ecosystem and health assessment research.**Rationale for the Noncompetitive Award:** Sec. 4.4#1. One institution has unique capabilities.**Total \$ Amount:** \$126,114**Name of Program Element(s):** CC3, CC4, CC6, CC9*Noncompetitive Awards of Financial Assistance and Contracts: 31***ORD Headquarters or Field Organization:** National Center for Environmental Assessment-Cin**Name of Awardee:** Colorado State University**Address:** Office of Contracts and Grants
Fort Collins, CO 80523**Contact:** Raymond S.H. Yang**Fiscal Year Awarded:** 1993**Description of Work:** To develop an innovative approach for the risk assessment of chemical mixtures of polycyclic aromatic hydrocarbons (PAHs) by utilizing Ph-PK/PD and computer modeling.**Rationale for the Noncompetitive Award:** Chap. 4.4#4. The award totals \$50,000 or less.**Total \$ Amount:** \$50,000. ORD policy allows for noncompetitive awards below \$50,000.**Name of Program Element(s):** TD1

*Noncompetitive Awards of Financial Assistance and Contracts: 32***ORD Headquarters or Field Organization:** National Center for Environmental Assessment-Cin**Name of Awardee:** National Water Research Institute**Address:** 10500 Ellis Ave.
P.O. Box 20865
Fountain Valley, CA 92728-0865**Contact:** Ronald Linsky**Fiscal Year Awarded:** 1993**Description of Work:** To establish a jointly supported research program aimed at investigating the technical demands of the Safe Drinking Water Act Amendments.**Rationale for the Noncompetitive Award:** Sec. 4.4#1. One institution has unique capabilities.**Total \$ Amount:** \$200,000**Name of Program Element(s):** CC4*Noncompetitive Awards of Financial Assistance and Contracts: 33***ORD Headquarters or Field Organization:** National Center for Environmental Assessment-RTP**Type of Instrument:** Cooperative Agreement**Name of Awardee:** Duke University Medical Center**Address:** P.O. Box 3210
Durham NC 27710**Contact:** Dr. Robert Mercer**Fiscal Year Awarded:** 1993**Description of Work:** Extrapolation Models for Predicting Dose of Inhaled Pollutants. To develop an anatomically correct, multispecies model for predicting lung cell dose of inhaled chemicals.**Rationale for the Noncompetitive Award:** The cooperative agreement with Duke University was in the class of a "partnership agreement" according to a draft policy (April 1, 1992) which defines such agreements and does not require competition. Even if the draft policy had not existed, the sole source was needed to take advantage of the proximity of EPA scientists in risk assessment and CIIT scientists working on the upper respiratory tract with Duke scientists working on the lower respiratory tract, all to effect a more advanced mathematical model of respiratory tract deposition of pollutants.**Total \$ Amount:** \$737,137**Name of Program Element(s):** CC1A1E

Noncompetitive Awards of Financial Assistance and Contracts: 34**ORD Headquarters or Field Organization:** National Center for Environmental Assessment-RTP**Type of Instrument:** Cooperative Agreement**Name of Awardee:** Chemical Industry Institute of Technology**Address:** P.O. Box 12137
Research Triangle Park, NC 27709**Contact:** Dr. Julia Kimball**Fiscal Year Awarded:** 1993

Description of Work: Application of Computational Fluid Dynamics to Upper Respiratory Tract Dosimetry and Human Risk Assessment for Inhaled Gases and Vapors. To develop a quantitative model for upper respiratory tract dosimetry in the rhesus monkey to permit an understanding of the relative importance of factors governing transport of inhaled gases and vapors.

Rationale for the Noncompetitive Award: The sole source cooperative agreement with CIIT was invoked because the CIIT scientists possess unique expertise and have pre-existing information/material that substantially lowers the cost of the project. Furthermore, the originating discussions for this cooperative agreement occurred September 1991, before development of the ORD guidelines. Though EPA provided broad goals, CIIT provided the intellectual investment of the specific research approach to meet the goal of nasopharyngeal extrapolation. Thus, CIIT's ideas could not be ethically advertised.

Total \$ Amount: \$758,380**Name of Program Element(s):** CC1A1E

Noncompetitive Awards of Financial Assistance and Contracts: 35**ORD Headquarters or Field Organization:** National Center for Environmental Assessment-RTP**Type of Instrument:** Cooperative Agreement**Name of Awardee:** Pan American Health Organization**Address:** 525 23rd Street, NW
Washington, DC 20037-2895**Contact:** Dr. Rob McConnell**Fiscal Year Awarded:** 1993**Description of Work:** Technical Assistance on Health Risk Assessment for Latin America and the Caribbean. To conduct a regional program on environmental epidemiology, provide exchange of information on environmental health risk assessment, organize international conferences and workshops related to environmental health problems.**Rationale for the Noncompetitive Award:** This cooperative agreement with PAHO allows the Agency to implement the UNCED Agenda 21, Chapter 19 on environmental health through the specific goal of developing and conducting technical assistance workshops on environmental health risk assessment for the regions in the Western Hemisphere. The Pan American Health Organization is uniquely positioned with staff, infrastructure, and North-South collaborations to carry out technical assistance in South America and Caribbean countries through training and epidemiological research which directly affect environmental health risk assessment in the region.**Total \$ Amount:** \$800,000**Name of Program Element(s):** CC1A1E, B3HS5A, L6QS50, CC5D1A, CC9H1A***Noncompetitive Awards of Financial Assistance and Contracts: 36*****ORD Headquarters or Field Organization:** National Center for Environmental Assessment-RTP**Name of Awardee:** Personal Communications Service**Address:** 1910 Sedwick Rd.
Suite 200-D
Durham, NC 27713**Contact:** Diana Phillips**Fiscal Year Awarded:** 1996**Description of Work:** Workshop and Conference Support Services. Provides logistical support for workshops and conferences.**Rationale for the Noncompetitive Award:** The functions of this contract have been set aside for 8(a) firms since 1987. The previous contract expired September 30, 1995. The Small/Minority Business Specialist in the RTP Contracts Management Division recommended this contractor based on qualifications and experience.**Total \$ Amount:** \$469,971**Name of Program Element(s):** CC1A1E, CC9H1A

*Noncompetitive Awards of Financial Assistance and Contracts: 37***ORD Headquarters or Field Organization:** NERL-AERD-RTP**Type of Instrument:** Cooperative Agreement**Number:** CR818311**Name of Awardee:** Social Institute of Mathematical Sciences**Address:** 97 Parish Rd. South
New Canaan, CT 06840**Contact:** Donald L. Thomsen**Fiscal Year Awarded:** 1992**Description of Work:** The research includes several projects which are all related to improved interpretation, measurement and modeling of human exposure to environmental pollutants. Mathematical and statistical techniques are being developed and refined to provide a clearer understanding of microenvironmental and personal exposures, time-activity patterns and their implications.**Rationale for the Noncompetitive Award:** Only consortium research institute at the time capable and with a record of achievement in environmental statistics and exposure monitoring.**Total \$ Amount:** \$590,000**Name of Program Element(s):** CC7/Pesticides*Noncompetitive Awards of Financial Assistance and Contracts: 38***ORD Headquarters or Field Organization:** NERL-AERD-RTP**Type of Instrument:** Cooperative Agreement**Number:** CR819638**Name of Awardee:** National Institute of Statistical Sciences**Address:** P.O. Box 14162
Research Triangle Park, NC 27709-4162**Contact:** Jerry Sacks**Fiscal Year Awarded:** 1993**Description of Work:** Support Research in Environmental Statistics.**Rationale for the Noncompetitive Award:** At the time of this coop, all coops were non-competitive--no justification necessary.**Total \$ Amount:** \$1,900,000**Name of Program Element(s):** CC9-Multimedia, CC1-Air Quality, CC5-Hazardous Waste

*Noncompetitive Awards of Financial Assistance and Contracts: 39***ORD Headquarters or Field Organization:** NERL-AERD-RTP**Type of Instrument:** Cooperative Agreement**Number:** CR820235**Name of Awardee:** Robert Woods Johnson Medical School**Address:** 675 Hoes Lane
Piscataway, NJ 08854-6535**Contact:** Paul J. Lioy**Fiscal Year Awarded:** 1993

Description of Work: Three research projects are contained within the proposed agreement. The first, the Childhood Lead Exposure Assessment Reduction Study (CLEARs), investigates the effectiveness of an exposure strategy in reducing the blood lead concentration of inner city children. This project is co-funded through and inter-agency agreement with National Institute of Child Health and Human Development and by the Robert Wood Johnson Foundation. The second, entitled "Microenvironmental Exposure to Mobile Source Evaporative and Combustion Emissions," investigates human microenvironmental and in-cabin exposure to emissions from gasoline and alternatively fueled vehicles. The third research effort involves human exposure modeling. University modelers will work collaboratively with AREAL investigators within EPA facilities to assess existing EPA exposure models and data bases.

Rationale for the Noncompetitive Award: The research being conducted through this agreement was developed and initiated early in FY93 and was defined to be accomplished over a three-year period. Therefore, the investigators are now in the midst of the data collection stage of their projects. Considerable front-end resources have been expended in designing and planning the research, developing and validating methods, preparing QAQ documentation, and acquiring equipment. CLEARs has undergone an extensive and favorable peer review involving prominent EPA and extramural scientists. To discontinue the research would mean that these important front-end efforts and costs would have been expended without having reaped the primary research benefits.

Total \$ Amount: \$1,929,000**Name of Program Element(s):** CC6-Toxic Substances, CC1-Air Quality

Noncompetitive Awards of Financial Assistance and Contracts: 40**ORD Headquarters or Field Organization:** NERL-AERD-RTP**Type of Instrument:** Cooperative Agreement**Number:** CR821584**Name of Awardee:** North Carolina State University**Address:** 4700 Hillsborough St.
Raleigh, NC 27606**Contact:** Linda F. Jackson**Fiscal Year Awarded:** 1994

Description of Work: The objectives of this coop are to assess the pathbiological criteria defining the Atlantic Blue Crab's Health. Through this coop, the principle investigator will be studying the feasibility of using various measures of crustacean health as indicators of environmental stress. Most of the techniques proposed are based upon a unique approach/method to identify antimicrobial activity and other immunological criteria in blue crabs.

Rationale for the Noncompetitive Award: Dr. Noga and his group are pioneers in the concept of studying the feasibility of using various measures of crustacean health as indicators of environmental stress. Most of the techniques proposed in this agreement will be based upon a unique approach/method to identify antimicrobial activity and soft-shell disease in blue crabs that was developed by Dr. Noga's group. As part of Dr. Noga's participation in the APE study, NCSU acquired facilities and equipment, including holding tanks, that are necessary for the proposed crustacean projects. Thus, it would be in the best interest of the government not to expend additional funds to supply the cooperator with the necessities.

Total \$ Amount: \$183,618**Name of Program Element(s):** CC9-Multimedia

*Noncompetitive Awards of Financial Assistance and Contracts: 41***ORD Headquarters or Field Organization:** AMRD/NERL**Type of Instrument:** Cooperative Agreement**Number:** CR821463**Name of Awardee:** Colorado State University**Address:** Natural Resource Ecology Lab
Fort Collins, CO 80523**Contact:** David S. Bigelow**Fiscal Year Awarded:** 1993**Description of Work:** To provide on-going support for the National Atmospheric Deposition Program/National Trends Network monitoring network, a high quality, modeling monitoring effort for determining both spatial and temporal information about atmospheric deposition.**Rationale for the Noncompetitive Award:** CSU has been conducting research into atmospheric deposition since 1980 and has unique expertise in the area of quality assurance on acid deposition programs.**Total \$ Amount:** \$415,206**Name of Program Element(s):** CC1-Air Quality*Noncompetitive Awards of Financial Assistance and Contracts: 42***ORD Headquarters or Field Organization:** NERL-RTP, NC**Name of Awardee:** Environmental Specialties, Inc.**Address:** 4412 Tryon Road
Raleigh, NC 27606**Contact:** Robert E. Rehkop, Jr.**Fiscal Year Awarded:** 1996**Description of Work:** Replace burned out compressor used to cool down enclosed dynamometer in EPA Annex Building. Work Assignment 2A would have been stopped since the compressor is necessary to perform tests at temperatures below 75 degrees.**Rationale for the Noncompetitive Award:** The installation of this compressor has unique requirements since this dynamometer enclosure was a prototype installation. Environmental Specialties was the original installer of this and a second compressor; therefore, this company is uniquely qualified to perform the installation of this compressor in a timely manner.**Total \$ Amount:** \$7,000**Name of Program Element(s):** CA2-R&D Expense

Noncompetitive Awards of Financial Assistance and Contracts: 43**ORD Headquarters or Field Organization:** NERL-RTP**Name of Awardee:** Tennessee Valley Authority**Address:** Water Resources
524 Union Ave.
Evans Bldg 1A
Knoxville, TN**Contact:** Romualdas Simonaitis**Fiscal Year Awarded:** 1993**Description of Work:** Smog chamber studies of low concentration of VOC and NOx mixtures.**Rationale for the Noncompetitive Award:** This is the only source in the U.S. that possesses an ultra-clean, well-characterized indoor smog chamber that can be run at low concentrations of VOCs and NOx.**Total \$ Amount:** \$618,955**Name of Program Element(s):** CC1-Air QualityNoncompetitive Awards of Financial Assistance and Contracts: 44**ORD Headquarters or Field Organization:** NERL-RTP**Name of Awardee:** UNC School of Public Health**Address:** CB 7400 Rosenau
Chapel Hill, NC**Contact:** Harvey Jeffries**Fiscal Year Awarded:** 1993**Description of Work:** Smog chamber data for testing chemical mechanisms at low VOC-to-NOx ratio conditions.**Rationale for the Noncompetitive Award:** This is the only institution with experience in all areas required for this task: mechanism development, mechanism testing, and smog chamber experimentation.**Total \$ Amount:** \$600,000**Name of Program Element(s):** CC1-Air Quality

*Noncompetitive Awards of Financial Assistance and Contracts: 45***ORD Headquarters or Field Organization:** NERL-RTP**Name of Awardee:** UNC School of Public Health**Address:** CB 4700 Rosenau
Chapel Hill, NC**Contact:** Sarah W. Thompson**Fiscal Year Awarded:** 1995**Description of Work:** Development and evaluation of an innovation chemical reaction mechanism for use in air quality simulation modeling.**Rationale for the Noncompetitive Award:** UNC is the only institution that can apply the innovative morphecules chemical mechanism (developed under CR820425) to air quality models in time for use in the ozone SIP revisions.**Total \$ Amount:** \$713,984**Name of Program Element(s):** CC1-Air Quality*Noncompetitive Awards of Financial Assistance and Contracts: 46***ORD Headquarters or Field Organization:** NERL-RTP**Name of Awardee:** University of Georgia**Address:** Dept. of Physics and Astronomy
Athens, GA**Contact:** John Rives**Fiscal Year Awarded:** 1993**Description of Work:** Research and development of improved UV monitor and operation of EPA UV network.**Rationale for the Noncompetitive Award:** In congressional record to set up and National UV Monitoring Center.**Total \$ Amount:** \$1,371,327**Name of Program Element(s):** CNR-Global Change

Noncompetitive Awards of Financial Assistance and Contracts: 47

ORD Headquarters or Field Organization: NERL-Cincinnati

Name of Awardee: University of Nevada

Address: Reno, Nevada

Contact: Stetzenbach

Fiscal Year Awarded: 1993

Description of Work: Sampling and analysis of indoor environments for airborne contaminants.

Rationale for the Noncompetitive Award: Add-on to an ORIA coop. The coop set up by ORIA utilized the same types of sampling sites in the same climate as a study we intended to support. We were able to save the government to cost of duplicating sampling sites and possibly paying overhead to two organizations by adding funds to an existing study.

Total \$ Amount: \$346,000

Name of Program Element(s): CC1-Air Quality

Noncompetitive Awards of Financial Assistance and Contracts: 48

ORD Headquarters or Field Organization: NERL-Cincinnati

Name of Awardee: University of Maryland

Address: College Park, MD

Contact: Levin

Fiscal Year Awarded: 1992

Description of Work: Development of recovery media for airborne bacteria.

Rationale for the Noncompetitive Award: Represents a unique proprietary approach developed through a series of informal discussions between ORD and the principal investigator.

Total \$ Amount: \$586,007

Name of Program Element(s): CC1-Air Quality

*Noncompetitive Awards of Financial Assistance and Contracts: 49***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** University of California - Los Angeles**Address:** Los Angeles, California**Contact:** Glover or Hoftzman**Fiscal Year Awarded:** 1991**Description of Work:** A comparative study of strains of mycobacterium avium complex from water and from AIDS and non-AIDS patients in Los Angeles.**Rationale for the Noncompetitive Award:** Coop was set up to utilize a unique combination of capabilities, a research group with expertise in working with nontuberculosis mycobacteria and a community with a large indigenous population of AIDS patients and a known occurrence of nontuberculosis mycobacteria in the potable water system.**Total \$ Amount:** \$543,224**Name of Program Element(s):** CC1-Air Quality*Noncompetitive Awards of Financial Assistance and Contracts: 50***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** Dartmouth College**Address:** Hanover, New Hampshire**Contact:** Sternberger**Fiscal Year Awarded:** 1992**Description of Work:** Development and evaluation of zooplankton indicator for EMAP.**Rationale for the Noncompetitive Award:** Dartmouth College has one of the top zooplankton experts in North America. This coop supports a water quality program element because it is related to the development of a zooplankton indicator for the purpose of establishing the quality of biological resources in lakes.**Total \$ Amount:** \$500,000**Name of Program Element:** CC9-Multimedia

*Noncompetitive Awards of Financial Assistance and Contracts: 51***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** Lovelace Medical Foundation**Address:** Texas**Contact:** Frost**Fiscal Year Awarded:** 1995**Description of Work:** Determine feasibility of monitoring anti-diarrheal drug sales to identify waterborne disease outbreaks.**Rationale for the Noncompetitive Award:** \$50,000 or less.**Total \$ Amount:** \$49,683**Name of Program Element(s):** CC4-Drinking Water*Noncompetitive Awards of Financial Assistance and Contracts: 52***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** University of South Florida**Address:** Tampa, Florida**Contact:** Rose**Fiscal Year Awarded:** 1995**Description of Work:** Evaluate sensitivity of cell culture and rapid identification techniques for oocysts.**Rationale for Noncompetitive Award:** \$50,000 or less.**Total \$ Amount:** \$50,000**Name of Program Element(s):** CC4-Drinking Water

Noncompetitive Awards of Financial Assistance and Contracts: 53**ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** University of Texas - Houston**Address:** Houston, Texas**Contact:** Dupont**Fiscal Year Awarded:** 1992**Description of Work:** Infectivity of cryptosporidium parvum for adult humans.**Rationale for the Noncompetitive Award:** No other institution and investigators having the interest and capabilities for conducting human volunteer studies with the target infectious agent (Cryptosporidium) were identified through extensive contacts in the professional community.**Total \$ Amount:** \$661,509**Name of Program Element(s):** CC4-Drinking Water**Noncompetitive Awards of Financial Assistance and Contracts: 54****ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** University of Cincinnati**Address:** 2624 Clifton
Cincinnati, OH**Contact:** Bingham**Fiscal Year Awarded:** 1993**Description of Work:** Research and methods development for health risk assessments.**Rationale for the Noncompetitive Award:** Co-op was sole-sourced to the University of Cincinnati under the long term memorandum of understanding called the "Linking Pins" program. (Note: Coop was originally awarded by NCEA (ECAO) but was transferred to NERL in FY95 for management.)**Total \$ Amount:** \$97,000**Name of Program Element(s):** CC9-Multimedia

*Noncompetitive Awards of Financial Assistance and Contracts: 55***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** American Society for Microbiology**Address:** Washington, DC**Contact:** Colgan**Fiscal Year Awarded:** 1993**Description of Work:** Colloquium on global issues in microbiological water quality for the next century.**Rationale for the Noncompetitive Award:** Unique capabilities residing in experts who participate.**Total \$ Amount:** \$178,409**Name of Program Element(s):** CC3-Water Quality*Noncompetitive Awards of Financial Assistance and Contracts: 56***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** Nebraska Department of Environment**Address:** Lincoln, Nebraska**Contact:** Walker**Fiscal Year Awarded:** 1993**Description of Work:** Measuring health of fisheries in Region 7.**Rationale for the Noncompetitive Award:** Survey required access to land areas which only state could secure.**Total \$ Amount:** \$162,470**Name of Program Element(s):** CC9-Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 57**ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** Kansas Department of Wildlife and Parks**Address:** Topeka, Kansas**Contact:** Mammoliti**Fiscal Year Awarded:** 1993**Description of Work:** Measuring Health of Fisheries in EPA Region 7.**Rationale for the Noncompetitive Award:** Survey required to access to land areas which only state could secure.**Total \$ Amount:** \$166,394**Name of Program Element(s):** CC9-Multimedia**Noncompetitive Awards of Financial Assistance and Contracts: 58****ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** Missouri Department of Natural Resources**Address:** Jefferson, Missouri**Contact:** Ford**Fiscal Year Awarded:** 1993**Description of Work:** Measuring Health of Fisheries in EPA Region 7.**Rationale for the Noncompetitive Award:** Survey required access to land areas that only state could secure.**Total \$ Amount:** \$172,000**Name of Program Element(s):** CC9 - Multimedia

*Noncompetitive Awards of Financial Assistance and Contracts: 59***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** Ohio State University Research Foundation**Address:** Columbus, Ohio**Contact:** Dabrowski**Fiscal Year Awarded:** 1994**Description of Work:** Provide basic reproductive science background and aquatic model system for male biomarker evaluation.**Rationale for the Noncompetitive Award:** \$50,000 or less.**Total \$ Amount:** \$45,000**Name of Program Element(s):** RWX - SERDP*Noncompetitive Awards of Financial Assistance and Contracts: 60***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** University of Hawaii**Address:** Honolulu, Hawaii**Contact:** Fujioka**Fiscal Year Awarded:** 1995**Description of Work:** Determine if indicator bacteria multiply in the soil environment of Hawaii.**Rationale for the Noncompetitive Award:** \$50,000 or less.**Total \$ Amount:** \$30,000**Name of Program Element(s):** RARE Program

*Noncompetitive Awards of Financial Assistance and Contracts: 61***ORD Headquarters or Field Organization:** NERL-Cincinnati**Name of Awardee:** Integrated Laboratory Systems**Address:** Research Triangle Park, NC**Contact:** Mayasiah**Fiscal Year Awarded:** 1994**Description of Work:** Processing of EMAP macroinvertebrate samples.**Rationale for the Noncompetitive Award:** 41 U.S.C. 253(c)(5)-8(a).**Total \$ Amount:** \$1,104,000 .**Name of Program Element(s):** CC9 - Multimedia*Noncompetitive Awards of Financial Assistance and Contracts: 62***ORD Headquarters or Field Organization:** National Exposure Research Laboratory; Characterization Research Division**Type of Instrument:** Cooperative Agreement**Number:** CNG902745**Name of Awardee:** University of Nevada, Las Vegas**Address:** Environmental Studies Program, CE-2
505 Maryland Parkway
Las Vegas, NV 89154-4030**Contact:** E. Paul Richitt Jr.**Fiscal Year Awarded:** 1993**Description of Work:** Cooperative Program In Environmental Monitoring And Measurement. Stimulate education of environmental professionals; attract minorities into the environmental sciences; integrate job; and establish continuing UNLV student internships with the Characterization Research Division, Las Vegas.**Rationale for the Noncompetitive Award:** Unique educational opportunities provided by collocation on the UNLV campus.**Total \$ Amount:** \$271,000**Name of Program Element(s):** Air Quality, Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 63

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR818220

Name of Awardee: Texas Southern University

Address: 3100 Cleburne Avenue
Houston, TX 77004

Contact: Mahmoud A. Saleh

Fiscal Year Awarded: 1991

Description of Work: Receptor-Bound Toxicants As Biomarker For Human Exposure To Environmental Pollutants. Develop state-of-art biomonitoring techniques to assess exposure to a variety of compounds including several widely used pesticides.

Rationale for the Noncompetitive Award: Unsolicited proposal contained unique elements for assessing exposure to this class of compounds.

Total \$ Amount: \$1,497,345

Name of Program Element(s): Superfund, Multimedia, Toxic Substances, Pesticides

Noncompetitive Awards of Financial Assistance and Contracts: 64

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR819555

Name of Awardee: Research Triangle Institute

Address: Analytical and Chemical Sciences
Research Triangle Park, NC 27709-2194

Contact: Robert D. Voyksner

Fiscal Year Awarded: 1992

Description of Work: Development And Evaluation Of New Mass Spectrometry Techniques For Monitoring Dyes And Other Environmental Contaminants. Evaluate and develop analytical procedures involving new and state-of-art mass spectrometry techniques for dyes and other compounds of environmental interest.

Rationale for the Noncompetitive Award: Unique capabilities (as highlighted in peer reviewed, unsolicited proposal).

Total \$ Amount: \$342,842

Name of Program Element(s): Hazardous Waste, Toxic Substances, Pesticides, Superfund, Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 65

ORD Headquarters or Field Organization: National Exposure Research Laboratory, Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR820460

Name of Awardee: University of Maryland at Baltimore

Address: 655 W. Baltimore St., Rm. 4-029 BRB
Baltimore, MD 21201

Contact: Mohyee E. Elderfrawi

Fiscal Year Awarded: 1992

Description of Work: A Generic Fiber-Optic Biosensor For Detection Of Compounds Of Environmental Concerns. Demonstrate environmental applications for fiber optic biosensor to detect low molecular weight compounds of environmental concern (a fast, reversible, portable, and sensitive biosensor for detection of environmental pollutants in matrices such as blood, urine, soil extracts, and groundwater).

Rationale for the Noncompetitive Award: Unsolicited proposals contained unique concepts.

Total \$ Amount: \$144,609

Name of Program Element(s): Toxic Substances, Pesticides, Superfund

Noncompetitive Awards of Financial Assistance and Contracts: 66

ORD Headquarters or Field Organization: National Exposure Research Laboratory, Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR820540

Name of Awardee: University of Nevada, Las Vegas

Address: 4505 Maryland Parkway Box 454028
Las Vegas, NV 89154-4028

Contact: David Earl James

Fiscal Year Awarded: 1992

Description of Work: Remote Sensing Global Change Research. Remote sensing supercomputing support/ Geographic Information System technology transfer.

Rationale for the Noncompetitive Award: Unique staffing, facilities, and capabilities.

Total \$ Amount: \$817,613

Name of Program Element(s): Air Quality, Toxic Substances

Noncompetitive Awards of Financial Assistance and Contracts: 67

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR820625

Name of Awardee: Carnegie Mellon University

Address: Carnegie Mellon Research Institute
4400 Fifth Avenue
Pittsburgh, PA 15213-2683

Contact: Marc Portnoff

Fiscal Year Awarded: 1992

Description of Work: Instrument For Remediation Monitoring And Site Assessment. The development of a simple instrument to be used in site assessment and remediation operations. The project will develop a low-cost, hand-held, instrument for mapping contamination around leaking storage tanks.

Rationale for the Noncompetitive Award: Unique test facilities.

Total \$ Amount: \$252,611

Name of Program Element(s): Hazardous Waste

Noncompetitive Awards of Financial Assistance and Contracts: 68

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR820712

Name of Awardee: Desert Research Institute

Address: P.O. BOX 19040
Las Vegas, NV 89132-0040

Contact: Roko Andricevic

Fiscal Year Awarded: 1992

Description of Work: Approved Methods For Aquifer Characterization And Well Head Protection Area (WHPA) Delineation In Complex Hydrogeologic Settings. Develop improved methods for aquifer heterogeneity characterization and flow path prediction in complete hydrogeologic settings.

Rationale for the Noncompetitive Award: Unique capability (technology transfer related to monitoring and assessment of groundwater contamination).

Total \$ Amount: \$664,647

Name of Program Element(s): Drinking Water, Hazardous Waste

Noncompetitive Awards of Financial Assistance and Contracts: 69

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of instrument: Cooperative Agreement

Number: CR820738

Name of Awardee: American Society for Testing and Materials

Address: Philadelphia, PA 19103

Contact: Robert J. Morgan

Fiscal Year Awarded: 1992

Description of Work: Develop Draft Standards In The Area Of Groundwater Monitoring And Environmental Assessment. Accelerate drafting the standards in the area of groundwater monitoring. These standards are being written in the areas of vadose zone monitoring, saturated zone monitoring, geophysics, drilling technology, and groundwater data analysis and interpretation.

Rationale for the Noncompetitive Award: No other standard writing organization is actively involved in the groundwater field. It would be cost prohibitive to train and establish any other organization to do work, if any other organization could be found to continue this effort.

Total \$ Amount: \$770,000

Name of Program Element(s): Hazardous Waste, Reimbursable

Noncompetitive Awards of Financial Assistance and Contracts: 70

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR821849

Name of Awardee: National Autonomous University of Mexico

Address: CD. Universitaria, Coyoacan
CP04510; MEX.DF MEXICO

Contact: Roman Alvarez Bejar

Fiscal Year Awarded: 1993

Description of Work: Landscape Characterization Of Mexico. Remote sensing change detection research.

Rationale for the Noncompetitive Award: Unique capabilities and experience, and international requirements of North American Landscape Characterization (NALC) program.

Total \$ Amount: \$1,055,608

Name of Program Element(s): Air Quality

Noncompetitive Awards of Financial Assistance and Contracts: 71

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CR821961

Name of Awardee: University of Nevada, Las Vegas

Address: Harry Reid Center for Environmental Studies
4505 Maryland Parkway
Las Vegas, NV 89154-4009

Contact: Muhilan D. Pandian

Fiscal Year Awarded: 1993

Description of Work: Exposure Modeling And Validation Program. Research and development into multimedia, total human exposure models, and their application to exposure assessment

Rationale for the Noncompetitive Award: Unique capabilities/facilities; follow-on effort involving intellectual property rights.

Total \$ Amount: \$1,554,536

Name of Program Element(s): Toxic Substances, Pesticides, Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 72

ORD Headquarters or Field Organization: National Exposure Research Laboratory; Characterization Research Division

Type of Instrument: Cooperative Agreement

Number: CT902683

Name of Awardee: University of Nevada, Las Vegas

Address: H.R. Hughes College of Engineering
4505 Maryland Parkway
Las Vegas, NV 89154-4025

Contact: Eugene E. McGaugh

Fiscal Year Awarded: 1993

Description of Work: Culturally Diverse Traineeship Program. Provide training of UNLV culturally-diverse engineering students through a program of academic study at UNLV and training tasks at the Characterization Research Division facility, providing the students with professional contacts and experiences to enhance their abilities to work in environmental engineering and science areas.

Rationale for the Noncompetitive Award: Unique educational opportunities provided by the collocation on the UNLV campus.

Total \$ Amount: \$88,206

Name of Program Element(s): Hazardous Waste, Reimbursable

Noncompetitive Awards of Financial Assistance and Contracts: 73**ORD Headquarters or Field Organization:** NERL/Athens**Type of Instrument:** Cooperative Agreement**Number:** CR821822**Name of Awardee:** University of New Hampshire, International Geosphere Biosphere Programme (IGBP)**Address:** Institute for the Study of Earth, Oceans, and Space
University of New Hampshire
Durham, NH 03824**Contact:** Bergen Moore**Fiscal Year Awarded:** 1994**Description of Work:** Global Analysis, Interpretation And Modeling (GAIM). To develop a strategy for the rapid development, evaluation, and application of comprehensive prognostic models of the global biogeochemical subsystem which could eventually be linked with models of the physical-climate subsystem.**Rationale for the noncompetitive Award:** The decision for the award was made by ORD/OEPER Headquarters. GAIM is a task force formed by the international Council of Scientific Unions with the objective of describing and understanding the interactive physical, chemical and biological processes that regulate the total Earth System. No mechanism exists for the EPA or any other government agency to competitively solicit research proposals to support specific IGBP Project Offices or Task Forces within IGBP.**Total \$ Amount:** \$855,000**Name of Program Element(s):** CNR-Climate Change

Noncompetitive Awards of Financial Assistance and Contracts: 74**ORD Headquarters or Field Organization:** NERL/Athens**Type of Instrument:** Cooperative Agreement**Number:** CR819569**Name of Awardee:** University of Tennessee**Address:** Office of Research Administration
404 Andy Holt Tower
Knoxville, TN 37996**Contact:** Thomas Hallam**Fiscal Year Awarded:** 1993**Description of Work:** A Risk Assessment Protocol For Prediction Of Effects Of Toxicants On Aquatic Populations And Communications. To provide complete research on prototype population risk assessment models to be used in conjunction with Athens Environmental Research Laboratory (now NERL/Athens) decision systems.**Rationale for the Noncompetitive Award:** The University of Tennessee ecological modeling research group has pioneered a form of individual-based modeling of natural populations (fish and invertebrates). This approach has been demonstrated to work well with many of the NERL/Athens developed models. At the time of the award, they were the only group pursuing this approach, and as such, there is no other entity that could use the funds for the stated purpose.**Total \$ Amount:** \$547,711**Name of Program Element(s):** CC6 - Toxic Substances, CC9 - Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 75

ORD Headquarters or Field Organization: NERL/Athens

Type of Instrument: Cooperative Agreement

Number: CR824038

Name of Awardee: University of Delaware

Address: Department of Civil Engineering
Office of Sponsored Programs
Newark, DE 19716

Contact: Herb Allen

Fiscal Year Awarded: 1995

Description of Work: Workshop: Metal Speciation And Contamination Of Surface Waters. The workshop is designed to provide a mechanism for exchange of information among scientists from academia, industry, research institutions, state and federal agencies, and foreign institutions about recent advances in the chemistry of metals in aquatic environments.

Rationale for the Noncompetitive Award: This workshop is unique among scientific conferences as there is no other forum for specific discussion of toxic metal chemistry in the environment. There is no other entity that could use these funds for the stated purpose.

Total \$ Amount: \$47,940

Name of Program Element(s): CC9 - Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 76

ORD Headquarters or Field Organization: NERL/Athens

Type of Instrument: Cooperative Agreement

Number: CX824294

Name of Awardee: Athens-Clarke County School District

Address: 500 College Avenue
Athens, GA 30601

Contact: Dr. Sherri Gibney-Sherman

Fiscal Year Awarded: 1995

Description of Work: Schoolyard Environmental Education For The Whole School Community. To enhance the opportunity for young students (K-5) and parents to be exposed to environmental topics within the realm of the elementary science curriculum via teacher training and cluster work areas of a community school yard classroom.

Rationale for the Noncompetitive Award: The location of a protected wetland area adjacent to the school's nature trail, which is used by the entire school district, and the fact that the population of the schools is largely minority led the Office of Civil Rights to target \$15,000 for a sole-source award to expand the nature trail to include the wetlands and to enhance and expand the environmental education program in this location. Because of these unique characteristics there was no other entity that could have used the funds for the stated purpose.

Total \$ Amount: \$15,000

Name of Program Element(s): N/A - OCR Money

Noncompetitive Awards of Financial Assistance and Contracts: 77

ORD Headquarters or Field Organization: NERL/Athens

Type of Instrument: Cooperative Agreement

Number: CR824497

Name of Awardee: International Science Foundation

Address: 1054 31st Street NW
Suite 110
Washington, DC 20007

Contact: David Lindeman

Fiscal Year Awarded: 1995

Description of Work: Improve The Scientific Basis For Ecological Risk Assessment Through Collaborative Research With Environmental & Biochemical Institutes In Russia, Ukraine, & Lithuania. To expand the scientific exchange & training of international scientists with the goal of better understanding environmental processes, ecosystems, water quality, fate & transport of organic & inorganic chemicals in surface & groundwater, soils, & sediments.

Rationale for the Noncompetitive Award: The ISF was established for the primary purpose of aiding and assisting scholarly research and education of the Former Soviet Union and Baltic countries and is the only organization capable of assistance directly to institutes, academies, and research scientists in the pursuit of research and training. Because of this unique capacity and the fact that the ISF waived its standard 10% overhead charge, there is no other entity that could use the funds for the stated purpose with substantially larger financial support.

Total \$ Amount: \$152,560

Name of Program Element(s): CC3 - Water Quality, CC6 - Toxic Substances, CC9 - Multimedia

*Noncompetitive Awards of Financial Assistance and Contracts: 78***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-818724**Name of Awardee:** Tennessee Technological University**Address:** Campus Box 5012
Cookeville, TN 38505**Contact:** Dr. Dennis B. George**Fiscal Year Awarded:** 1993**Description of Work:** Development of design equations and guidelines for subsurface flow wetlands treating municipal wastewater.**Rationale for the Noncompetitive Award:** TTU has some unique monitoring methods for biological sample collection and for electrode sensor measurements. Also, TTU has temperatures below freezing during the winter months which is critical to obtaining temperature dependent BOD and nitrogen kinetics data.**Total \$ Amount:** \$387,770**Name of Program Element(s):** C9*Noncompetitive Awards of Financial Assistance and Contracts: 79***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-818178**Name of Awardee:** Rutgers University**Address:** P.O. Box 1089
Piscataway, NJ 08855**Contact:** David Kosson**Fiscal Year Awarded:** 1993**Description of Work:** Management of municipal waste combustion residues.**Rationale for the Noncompetitive Award:** The recipient has reached an advanced state of knowledge in the area of MWC residues. This significant base of data and experience represents a potential savings in time and cost to EPA over award to another organization.**Total \$ Amount:** \$833,706**Name of Program Element(s):** C5

*Noncompetitive Awards of Financial Assistance and Contracts: 80***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-820348**Name of Awardee:** University of Florida**Address:** 219 Grinter Hall
Gainesville, FL 32611**Contact:** Lamar Miller**Fiscal Year Awarded:** 1993**Description of Work:** Engineering control and augmentation of biological decomposition at municipal solid waste landfills.**Rationale for the Noncompetitive Award:** The University has immediate access to a landfill readily expandable to perform enhanced landfill specifically designed as a leachate recirculating bioreactor. The facilities were not available through other sources.**Total \$ Amount:** \$406,529**Name of Program Element(s):** C5*Noncompetitive Awards of Financial Assistance and Contracts: 81***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-821421**Name of Awardee:** Government of Canada - Environment**Address:** 241 Cite Des Jenues
Hull/Quebec/KIAOH3/Canada**Contact:** George Hill**Fiscal Year Awarded:** 1993**Description of Work:** Continued development and validation of protocol for solidified waste evaluation and delisting.**Rationale for the Noncompetitive Award:** The proposed project is the only project of its type under which comparison between laboratory test data and actual field performance can be determined. Environment Canada has overcome the usual obstacles of industrial cooperation and regulatory approval.**Total \$ Amount:** \$200,000**Name of Program Element(s):** C5

*Noncompetitive Awards of Financial Assistance and Contracts: 82***ORD Headquarters or Field Organization:** NRMRL**Type of instrument:** Cooperative Agreement**Number:** CR-821878**Name of Awardee:** University of Cincinnati**Address:** 309 Braunstein
Cincinnati, OH 45221**Contact:** Dr. Stephen Vesper**Fiscal Year Awarded:** 1994**Description of Work:** Microbiological treatment of hazardous waste in soil.**Rationale for the Noncompetitive Award:** UC has unique experience with materials and procedures for in-situ bioremediation of soils; UC also as intellectual property relationships with EPA and third parties, and UC has access to field sites with long-term EPA research projects.**Total \$ Amount:** \$600,000**Name of Program Element(s):** D1*Noncompetitive Awards of Financial Assistance and Contracts: 83***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-822677**Name of Awardee:** University of Cincinnati**Address:** 309 Braunstein
Cincinnati, OH 45221**Contact:** Dr. Lawrence Murdoch**Fiscal Year Awarded:** 1994**Description of Work:** Electrokinetic Migration and in-situ degradation of contaminants using innovative subsurface techniques.**Rationale for the Noncompetitive Award:** UC has unique experience with materials and procedures for developing innovative delivery and recovery technologies.**Total \$ Amount:** \$900,000**Name of Program Element(s):** D1

Noncompetitive Awards of Financial Assistance and Contracts: 84**ORD Headquarters or Field Organization:** NMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-821891**Name of Awardee:** University of Cincinnati**Address:** 309 Braunstein
Cincinnati, OH 45221**Contact:** Dr. Scott Summers**Fiscal Year Awarded:** 1994**Description of Work:** Disinfection byproduct control through biology treatment.**Rationale for the Noncompetitive Award:** UC has developed or proposed new methods and approaches to better define biological filtration of drinking water. These capabilities and its close proximity to EPA for pilot-scale verification have placed the University's proposals in a unique position.**Total \$ Amount:** \$470,000**Name of Program Element(s):** C4**Noncompetitive Awards of Financial Assistance and Contracts: 85****ORD Headquarters or Field Organization:** NMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-823549**Name of Awardee:** University of Cincinnati**Address:** 309 Braunstein
Cincinnati, OH 45221**Contact:** Rakesh Govind**Fiscal Year Awarded:** 1994**Description of Work:** Further development and testing of Program for Assisting Replacement of Industrial Solvents (PARIS).**Rationale for the Noncompetitive Award:** UC, in cooperation with EPA, was the original developer of the PARIS program; thus, UC possessed unique knowledge of the program.**Total \$ Amount:** \$35,000**Name of Program Element(s):** C5, C9

*Noncompetitive Awards of Financial Assistance and Contracts: 86***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-821029**Name of Awardee:** University of Cincinnati**Address:** 309 Braunstein
Cincinnati, OH 45221**Contact:** Makram Suidan**Fiscal Year Awarded:** 1993**Description of Work:** Research on bioremediation of hazardous wastes and chemical spills.**Rationale for the Noncompetitive Award:** UC's proximity to the Andrew W. Breidenbach Research Center results in unique and cost-effective research capabilities through consolidation of equipment and facilities. Also, the UC proposal includes participation with several faculty who have unique qualifications, especially, Dr. Makram Suidan who is a world expert in biosorption and microbial biofilms.**Total \$ Amount:** \$7,500,000**Name of Program Element(s):** C5, D1*Noncompetitive Awards of Financial Assistance and Contracts: 87***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-901941**Name of Awardee:** University of Cincinnati**Address:** 309 Braunstein
Cincinnati, OH 45221**Contact:** James E. Wade**Fiscal Year Awarded:** 1993**Description of Work:** Minority research apprenticeship program.**Rationale for the Noncompetitive Award:** UC's proximity to the Andrew W. Breidenbach Research Center allows for students of UC to apprentice to EPA scientists. UC also has the only environmental engineering program within a 50 mile radius the EPA lab.**Total \$ Amount:** \$141,759**Name of Program Element(s):** C5, D1, C3, C4, UH

*Noncompetitive Awards of Financial Assistance and Contracts: 88***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-902852**Name of Awardee:** University of Cincinnati**Address:** 309 Braunstein
Cincinnati, OH 45221**Contact:** James E. Wade**Fiscal Year Awarded:** 1995**Description of Work:** Minority research apprenticeship program.**Rationale for the Noncompetitive Award:** UC's proximity to the Andrew W. Breidenbach Research Center allows for students of UC to apprentice to EPA scientists. UC also has the only environmental engineering program within a 50 mile radius of the EPA lab.**Total \$ Amount:** \$198,288**Name of Program Element(s):** C5, D1, C3, C4*Noncompetitive Awards of Financial Assistance and Contracts: 89***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-824433**Name of Awardee:** California Department of Toxic Substance Control**Address:** 301 Capital Mall
Sacramento, CA 95814**Contact:** Greg Williams**Fiscal Year Awarded:** 1995**Description of Work:** Develop national model to test, evaluate and verify technologies for pollution prevention, treatment, emission control and monitoring.**Rationale for the Noncompetitive Award:** California is the only state with the legislative authority for an environmental technology certification program. In addition, the program had been in operation for 2 years with five technologies certified.**Total \$ Amount:** \$1,740,000**Name of Program Element(s):** C5

*Noncompetitive Awards of Financial Assistance and Contracts: 90***ORD Headquarters or Field Organization:** NRMRL**Type of Agreement:** Cooperative Agreement**Number:** CR-821492**Name of Awardee:** University of Northern Iowa**Address:** 75 Biology Research Complex
Cedar Falls, IA 50614**Contact:** John L. Konefes**Fiscal Year Awarded:** 1993**Description of Work:** Small business pollution prevention center.**Rationale for the Noncompetitive Award:** Congressional earmark; H.R. 5679 directed EPA to fund the Iowa Waste Reduction Center.**Total \$ Amount:** \$994,000**Name of Program Element(s):** C5*Noncompetitive Awards of Financial Assistance and Contracts: 91***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-821955**Name of Awardee:** New Jersey Department of Health**Address:** CN360
210 S. Broad Street
Trenton, NJ 08625**Contact:** Donald Gerber**Fiscal Year Awarded:** 1993**Description of Work:** Evaluation of management and abatement techniques for environmental toxins in buildings.**Rationale for the Noncompetitive Award:** The New Jersey Department of Health had unique qualifications which included access to schools in which the Asbestos Hazard Emergency Act (AHERA) rules and regulations applied. Since EPA had performed sampling and analyses at the New Jersey schools previously, it was cost effective because EPA would not have to analyze a new set of buildings to establish a new baseline.**Total \$ Amount:** \$300,000**Name of Program Element(s):** C9

*Noncompetitive Awards of Financial Assistance and Contracts: 92***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-821824**Name of Awardee:** Southern Methodist University**Address:** Box 302
Dallas, TX 75275**Contact:** Edward Smith**Fiscal Year Awarded:** 1994**Description of Work:** Removal of heavy metals from aqueous-phase industrial and hazardous wastes using shot-blast fines.**Rationale for the noncompetitive Award:** SMU proposed a unique concept using waste-shot blast materials as an inexpensive adsorbent of metals. The proposal included a 43% cost share.**Total \$ Amount:** \$50,351**Name of Program Element(s):** C9*Noncompetitive Awards of Financial Assistance and Contracts: 93***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-822617**Name of Awardee:** University of Pittsburgh**Address:** 350 Thackeray Hall
Pittsburgh, PA 15260**Contact:** Radisav Vidic**Fiscal Year Awarded:** 1994**Description of Work:** Uptake of mercury vapor by activated carbon.**Rationale for the Noncompetitive Award:** This unsolicited proposal includes a unique concept testing the theory that sulfur impregnated activated carbons will surpass the commercially available virgin carbons in the chemisorption of mercury from waste incineration stack gas effluents.**Total \$ Amount:** \$49,824**Name of Program Element(s):** D1

*Noncompetitive Awards of Financial Assistance and Contracts: 94***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-824390**Name of Awardee:** Environment Canada**Address:** 425 St Joseph Blvd.
Hull, Quebec, K1A 0H3, FC 99999**Contact:** Raymond Klicius**Fiscal Year Awarded:** 1995**Description of Work:** Feasibility study on the development of a cooperative approach to environmental technology verification.**Rationale for the Noncompetitive Award:** The similarities between the Canadian and American environmental technology performance verification programs reduce duplicative activities and avoid reinventing the wheel. In addition, Canada's certification program is more advanced than EPA's, thus Canada has unique experience.**Total \$ Amount:** \$100,000**Name of Program Element(s):** C5*Noncompetitive Awards of Financial Assistance and Contracts: 95***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-821825**Name of Awardee:** University of Notre Dame**Address:** Dept Of Civil Engineering
Notre Dame, IN 46556**Contact:** Dr. Kimberly A. Gray**Fiscal Yea Awarded:** 1993**Description of Work:** Use of pyrolysis-GC-MS to evaluate drinking water treatment processes.**Rationale for the Noncompetitive Award:** Dr. Gray pioneered a unique method of defining fractions of natural organic matter.**Total \$ Amount:** \$166,231**Name of Program Element(s):** C4

Noncompetitive Awards of Financial Assistance and Contracts: 96**ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-824385**Name of Awardee:** University of Central Florida**Address:** P.O. Box 160150
Orlando, FL 32816**Contact:** Dr. James S. Taylor**Fiscal Year Awarded:** 1995**Description of Work:** Removal of Multi-contaminants from Drinking Water.**Rationale for the Noncompetitive Award:** The University is the only entity/investigator capable of performing the treatment studies concerning fourteen selected pesticides because of their access to unique equipment.**Total \$Amount:** \$193,600**Name of Program Element(s):** C9Noncompetitive Awards of Financial Assistance and Contracts: 97**ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-824258**Name of Awardee:** Des Moines Water Works**Address:** 2201 Valley Drive
Des Moines, IA 50321**Contact:** Randy Beavers**Fiscal Year Awarded:** 1995**Description of Work:** Aquifer storage and recovery demonstration.**Rationale for the Noncompetitive Award:** Congressional earmark.**Total \$ Amount:** \$441,000**Name of Program Element(s):** C4

*Noncompetitive Awards of Financial Assistance and Contracts: 98***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Cooperative Agreement**Number:** CR-820491**Name of Awardee:** University of Georgia Research Foundation, Inc.**Address:** 621 Boyd Graduate Studies Res. Ctr.
Athens, GA 30602-7411**Contact:** Dr. Emmett B. Shotts**Fiscal Year Awarded:** 1993**Description of Work:** Effects of cations on bacteria-protozoan interaction in mass culture and biofilm.**Rationale for the Noncompetitive Award:** The co-principal investigators are noted experts on Legionella and were pioneers in establishing causal relationships between protozoan and bacterial association, and the proliferation of the pathogen in water.**Total \$ Amount:** \$100,000**Name of Program Element(s):** BN*Noncompetitive Awards of Financial Assistance and Contracts: 99***ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Contract**Number:** 68-C5-0008**Name of Awardee:** TN & A Associates, Inc.**Address:** 2505 N. Mayfair Rd.
Milwaukee, WI 53226**Contact:** Nick Ni**Fiscal Year Awarded:** 1995**Description of Work:** Sample analyses and evaluation of sampling and analytical protocols and engineering evaluation of controls for asbestos, durable fibers and other toxics.**Rationale for the Noncompetitive Award:** TN & Associates, Inc. is an eligible small and disadvantaged contractor under Section 8(a) of the Small Business Act.**Total \$ Amount:** \$320,867**Name of Program Element(s):** C5

Noncompetitive Awards of Financial Assistance and Contracts: 100**ORD Headquarters or Field Organization:** NRMRL**Type of Instrument:** Contract**Number:** 68-C5-0067**Name of Awardee:** Par Enterprises, Inc..**Address:** 12601 Clifton Hunt Lande
Clifton, VA 22024**Contact:** Wilfred Rebello**Fiscal Yea Awarded:** 1995**Description of Work:** National/International Technology Characterization Assessment Project for the Environmental Technology Initiative.**Rationale for the Noncompetitive Award:** Par Enterprises, Inc. is an eligible small and disadvantaged contractor under Section 8(a) of the Small Business Act.**Total \$ Amount:** \$143,094**Name of Program Element(s):** C5***Noncompetitive Awards of Financial Assistance and Contracts: 101*****ORD Headquarters or Field Organization:** APPCD, NRMRL, RTP, NC**Number:** CR1819695**Name of Awardee:** Richard Delay, D & A Computer Technology, Inc.**Address:** 1101 Commercial Ave.
Charlotte, NC 28205**Description of Work:** Computer Support Services.**Rationale for the Noncompetitive Award:** Minority-owned Business Set-Aside.**Total \$ Amount:** \$1,001,034**Name of Program Element(s):** Air

*Noncompetitive Awards of Financial Assistance and Contracts: 102***ORD Headquarters or Field Organization:** APPCD, NRMRL, RTP, NC**Name of Awardee:** Gregory Roche, South Coast Air Quality Management District**Address:** 21365 Copley
Diamond Bar, CA 91765**Description of Work:** Demonstrate Low VOC Finishes.**Rationale for the Noncompetitive Award:** Recipient was uniquely qualified because of prior work in this same area.**Total \$ Amount:** \$281,000**Name of Program Element(s):** Air*Noncompetitive Awards of Financial Assistance and Contracts: 103***ORD Headquarters or Field Organization:** APPCD, NRMRL, RTP, NC**Name of Awardee:** Lars Molnave, University of Aarhus**Address:** Institute of Environmental and Occupational Medicine
Building 180
DK-8000, Aarhus, Denmark**Description of Work:** Demonstrate and Develop Methods for Measuring Biological Responses to Mixtures of vapor phase organics.**Rationale for the Noncompetitive Award:** Uniquely qualified because of prior research.**Total \$ Amount:** \$366,000**Name of Program Element(s):** Air*Noncompetitive Awards of Financial Assistance and Contracts: 104***ORD Headquarters or Field Organization:** APPCD, NRMEL, RTP, NC**Name of Awardee:** Ms. Lorna Hicks, Duke University**Address:** P.O. Noncompetitive Awards of Financial Assistance and Contracts: 125**ORD Headquarters or Field Organization:** NHEERL-Western Ecology Division**Number:** CT902848**Name of Awardee:** Oregon Graduate Institute**Address:** P.O. Box 91000
Portland, OR 97291-1000**Contact:** Ellen Ford**Fiscal Year Awarded:** 1995**Description of Work:** Stimulate student interest in environmental research and promote interaction between EPA scientists and students by exposing students to environmental research technologies and methodologies.**Rationale for the Noncompetitive Award:** Award less than \$50,000.**Total \$ Amount:** \$34,290**Name of Program Element(s):** Clean Air

*Noncompetitive Awards of Financial Assistance and Contracts: 126***ORD Headquarters or Field Organization:** NHEERL - Western Ecology Division**Number:** CT902843**Name of Awardee:** Oregon State University**Address:** Weniger Hall
Corvallis, OR 97331**Contact:** Michael Unsworth**Fiscal Year Awarded:** 1995**Description of Work:** Development of a training agreement between NHEERL-WED and OSU to train postdoctoral, predoctoral and undergraduate scientists in which research is applicable to both EPA and the colleges and universities in the Pacific Northwest.**Rationale for the Noncompetitive Award:** Unique qualifications of recipient—ability to train students in various colleges and universities in the Pacific Northwest via one cooperative agreement with the Center for the Analysis of Environmental Change.**Total \$ Amount:** \$725,678**Name of Program Element(s):** Multimedia*Noncompetitive Awards of Financial Assistance and Contracts: 127***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR817543**Name of Awardee:** University of Minnesota**Contact:** Vincent F. Garry**Fiscal Year Awarded:** 1991**Description of Work:** Pesticide Applicators, Chromosome Rearrangements: Exploration of the Possible Relationship to Non-Hodgkin's Lymphoma. This project deals with detection and verification of the localization of chromosome rearrangements in pesticide applicators with particular reference to the fumigant phosphine. The design of this project includes a combined in vivo and in vitro approach. State of Minnesota concerns for agricultural workers, and their support of this effort, has allowed us to develop a population base to conduct the in vivo segments of this study. Preliminary data regarding the population base provided. These populations studies focused on laboratory parameters in combination with ongoing large-scale epidemiologic studies (M. Alavanja, NCI) will give EPA a more complete view of pesticide exposure and the development of hematopoietic conditions.**Rationale for the Noncompetitive Award:** One institute has unique capabilities.**Total \$ Amount:** \$324,910

Name of Program Element(s):	'93:	Toxic Substances Research = \$27,418; Superfund = \$47,500
	'94:	Toxic Substances Research = \$74,753
	'95:	Pesticide Research = \$50,247

*Noncompetitive Awards of Financial Assistance and Contracts: 128***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR821576**Name of Awardee:** University of Southern California**Address:** CA**Contact:** Russell P. Sherman**Fiscal Year Awarded:** 1994

Description of Work: Chronic Effects of Oxidant Air Pollution on Lung Tissues of Humans. To increase our understandings of the biological effects and potential health risks resulting from human exposure to oxidant air pollutants.

Rationale for the Noncompetitive Award: The USC Principal Investigator developed much of the foundation and methods used in the study. Non-competitive award was based on the fact that he proposed pursuing the study jointly with EPA and has provided us with methods and data, and the fact that his group has unique qualifications and research capabilities based on long-standing collaborations with the Coroner's offices required to obtain specimens needed for the study.

Total \$ Amount: \$549,473

Name of Program Element(s): '94: Air Quality = \$120,000
'95: Air Quality = \$120,000

*Noncompetitive Awards of Financial Assistance and Contracts: 129***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR824102**Name of Awardee:** Kaiser Foundation Research Institute**Address:** California**Contact:** Stephen K. Van Der Eeden**Fiscal Year Awarded:** 1995

Description of Work: Air Pollution and Morbidity and Mortality Among Kaiser Permanente Members. The primary objective of the study is to assess the relationship between ambient air pollution and the occurrence of acute respiratory and chronic cardiovascular morbidity and mortality. This will be done by studying health data from the Northern and Southern California Kaiser Permanente Medical Care Program membership. Subcontracts will be let to ascertain and consult on air quality and meteorological data.

Rationale for the Noncompetitive Award: One institute has unique capabilities.

Total \$ Amount: \$965,171

Name of Program Element(s): '95: Air Quality Research = \$278,973

*Noncompetitive Awards of Financial Assistance and Contracts: 130***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR822107**Name of Awardee:** Colorado State University**Address:** Colorado**Contact:** John Nuckols**Fiscal Year Awarded:** 1993**Description of Work:** Pilot Study to Evaluate the Relationship Between Birth Weight and Exposure to Byproducts of Disinfection. To evaluate the feasibility of using Geographic Information Systems as a way to improve drinking water and chlorination epidemiologic studies.**Rationale for the Noncompetitive Award:** One institute has unique capabilities.**Total \$ Amount:** \$290,505

Name of Program Element(s):	'93:	Drinking Water Research = \$49,971
	'94:	Drinking Water Research = \$45,910
	'95:	Drinking Water Research = \$99,992

*Noncompetitive Awards of Financial Assistance and Contracts: 131***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR821762**Name of Awardee:** Brigham and Women's Hospital**Address:** Massachusetts**Contact:** Diane Gold**Fiscal Year Awarded:** 1994**Description of Work:** Epidemiologic Studies of Criteria Pollutant Particles and Gases. To identify and quantify effects of ambient air pollutants on the health of humans in natural settings.**Rationale for the Noncompetitive Award:** One institute has unique capabilities.**Total \$ Amount:** \$1,925,546

Name of Program Element(s):	'94:	Air Quality Research = \$465,569
	'95:	Air Quality Research = \$477,134

*Noncompetitive Awards of Financial Assistance and Contracts: 132***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR822685**Name of Awardee:** State of California Air Resources Board**Address:** California**Contact:** Helene Margolis**Fiscal Year Awarded:** 1994

Description of Work: Epidemiologic Investigation to Identify Chronic Health Effects of Ambient Air Pollutants in Southern California. Primary activity is an epidemiologic investigation to identify a chronic health effects of ambient air pollutants in southern California. Second activity is formation of advisory group for providing guidance on matters related to this project. Third activity: sponsorship of conference "Colloquium on Particulate Air Pollution and Human Mortality and Morbidity."

Rationale for the Noncompetitive Award: One institute has unique capabilities.

Total \$ Amount: \$483,000**Name of Program Element(s):** '94: Air Quality Research = \$253,000*Noncompetitive Awards of Financial Assistance and Contracts: 133***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR824034**Name of Awardee:** University of Southern California**Address:** California**Contact:** Edward Avol**Fiscal Year Awarded:** 1995

Description of Work: Short-Term and Long-Term Exposure to Ozone and Particulate Air Pollution and Respiratory Health in Southern California Children: To identify and quantify the effects of both short- and long-term exposure to ambient ozone, particulate matter, and acidic air pollution on the health of children living in natural settings.

Rationale for the Noncompetitive Award: One Institute has unique capabilities—uniquely cost effective as this study is co-funded by the California Air Resources Board in the amount of \$413,899. This is also a unique collaborative opportunity as there is no other ongoing or planned study which includes many areas with appropriate exposure contrasts for study and well-characterized populations, and for which such complete exposure assessment is being carried out.

Total \$ Amount: \$1,299,431**Name of Program Element(s):** '95: Air Quality Research = \$208,757

*Noncompetitive Awards of Financial Assistance and Contracts: 134***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR823760**Name of Awardee:** California Public Health Foundation**Address:** California**Contact:** Kirsten Waller**Fiscal Year Awarded:** 1994

Description of Work: Trihalomethanes in Drinking Water and Adverse Pregnancy Outcomes. To conduct an epidemiologic study on the association between levels of individual and total trihalomethanes in residential drinking water and adverse pregnancy outcomes, including spontaneous abortion, low birth weight, pre-term delivery and intrauterine retardation.

Rationale for the Noncompetitive Award: The award totals \$50,000 or less.

Total \$ Amount: \$49,991**Name of Program Element(s):** '94 Drinking Water = \$49,991*Noncompetitive Awards of Financial Assistance and Contracts: 135***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR824167**Name of Awardee:** Lovelace Institutes**Address:** New Mexico**Contact:** Floyd Frost**Fiscal Year Awarded:** 1995

Description of Work: Field Survey of Cryptosporidiosis Risks from Contaminated Drinking Water. To determine if Cryptosporidia antibody prevalence varies by drinking water source and type of drinking water treatment.

Rationale for the Noncompetitive Award: One institute has unique capabilities. Lovelace has developed a unique capability to conduct these serological studies. In addition the American Water Works Association Research Foundation agreed to fund an additional \$200,000 through sole-source funding to Lovelace Institutes to collaborate with EPA in this effort and expand the scope of effort.

Total \$ Amount: \$369,553**Name of Program Element(s):** '95: Drinking Water Research = \$59,559

Noncompetitive Awards of Financial Assistance and Contracts: 136**ORD Headquarters or Field Organization:** NHEERL/RTP**Type of Instrument:** Assistance**Number:** CR820811**Name of Awardee:** University of California-Davis**Address:** California**Contact:** Dr. Carl Keen**Fiscal Year Awarded:** 1992

Description of Work: Influence of Folate and Zinc Nutriture on Methanol Tertatogenicity. To characterize the effects of maternal folate status on the developmental toxicity of methanol in a murine model using the mouse strain sensitive to the developmental toxicity of methanol.

Rationale for the Noncompetitive Award: An unsolicited proposal was submitted by Dr. Carl Keen to assess the role of folate in methanol metabolism and developmental toxicity using the mouse strain sensitive to the developmental toxicity of methanol. This project will directly benefit the academic community and the general public.

Total \$ Amount: \$375,000**Name of Program Element(s):** '94 Air Quality Research = \$125,000***Noncompetitive Awards of Financial Assistance and Contracts: 137*****ORD Headquarters or Field Organization:** NHEERL/RTP**Type of Instrument:** Assistance**Number:** CR820335**Name of Awardee:** Research Triangle Institute**Address:** North Carolina**Contact:** Patricia Fail**Fiscal Year Awarded:** 1992

Description of Work: Extramural Validation of A Multigenerational Reproductive Screening Protocol. To validate the use of the ART protocol for reproductive toxicity testing.

Rationale for the Noncompetitive Award: RTI was selected because 1) it is located near the EPA in RTP which was essential because of the degree of interaction that was expected to take place, and 2) early phases of the project required RTP employees to work directly with EPA scientists to show how novel data are collected while SOPs were written.

Total \$ Amount: \$733,359

Name of Program Element(s): '93: Pesticides Research = \$225,000; Multimedia Research = \$451
 '94: Pesticides Research = \$212,800

*Noncompetitive Awards of Financial Assistance and Contracts: 138***ORD Headquarters or Field Organization:** NHEERL/RTP**Type of Instrument:** Assistance**Number:** CR816851**Name of Awardee:** University of Missouri-Columbia**Address:** Missouri**Contact:** Dr. Ramareddy V. Guntaka**Fiscal Year Awarded:** 1991

Description of Work: Mechanism of Action of Non-Genotoxic Carcinogens Found in Drinking Water. To molecularly clone novel genes which are activated or suppressed in tumors induced in rats and mice by non-genotoxic carcinogens found in drinking water.

Rationale for the Noncompetitive Award: Dr. Guntaka submitted an unsolicited proposal that is unique in both concept and approach and to advertise for applicants to use his research ideas would be unethical.

Total \$ Amount: \$410,516

Name of Program Element(s): '93: Air Quality Research = \$36,790; Toxic Substances = \$186,666
'94: DW Research = \$22,000; Toxic Substances = \$23,335

*Noncompetitive Awards of Financial Assistance and Contracts: 139***ORD Headquarters or Field Organization:** NHEERL/RTP**Type of Instrument:** Assistance**Number:** CR819048**Name of Awardee:** The George Washington University**Address:** District of Columbia**Contact:** Dr. Carlton Garrett**Fiscal Year Awarded:** 1992

Description of Work: Oncogene Activation and Tumor Suppressor Gene Inactivation During Carcinogenesis By Dichloro-Acetic Acid. To examine DNA from preneoplastic and neoplastic hepatic lesions of B6C3F1 mice chronically exposed to the chlorinated compound dichloroacetic acid, for mutations of the ras proto-oncogenes and the P53 tumor suppressor gene.

Rationale for the Noncompetitive Award: Dr. Garrett submitted an unsolicited proposal for this project and was selected because of his extensive research experience in experimental liver carcinogenesis and for his unique techniques for studying changes at the DNA level in proto-oncogenes and tumor suppressor genes.

Total \$ Amount: \$346,526

Name of Program Element(s): '93: Multimedia Research = \$105,000
'94: Multimedia Research = \$64,949

Noncompetitive Awards of Financial Assistance and Contracts: 140**ORD Headquarters or Field Organization:** NHEERL/RTP**Type of Instrument:** Assistance**Number:** CR819562/CR824470**Name of Awardee:** Washington State University/Battelle Pacific NW Labs**Address:** Washington**Contact:** Dr. Richard Bull**Fiscal Year Awarded:** 1992-1995

Description of Work: Hepatocarcinogenic Effects of Haloacetates Commonly Found As By-Products of Drinking Water Disinfection. To determine the extent to which three brominated analogs of dichloroacetic acid and trichloroacetic acid possess the capability to induce liver tumors in male B6C3F1 mice.

Rationale for the Noncompetitive Award: Dr. Richard Bull submitted an unsolicited proposal to investigate the carcinogenicity of brominated acetic acids in the B6C3F1 mice. He is recognized as an international expert in the evaluation of the toxic and carcinogenic effects of disinfectants and disinfectant by-products.

Total \$ Amount: \$339,996

Portland, OR 97291-1000**Contact:** Ellen Ford**Fiscal Year Awarded:** 1995**Description of Work:** Stimulate student interest in environmental research and promote interaction between EPA scientists and students by exposing students to environmental research technologies and methodologies.**Rationale for the Noncompetitive Award:** Less than \$50,000.**Total \$ Amount:** \$34,290**Name of Program Element(s):** Clean Air

Noncompetitive Awards of Financial Assistance and Contracts: 167

ORD Headquarters or Field Organization: NHEERL-Western Ecology Division

Type of Instrument: Cooperative Agreement

Number: CT902843

Name of Awardee: Oregon State University

Address: Weniger Hall
Corvallis, OR 97331

Contact: Michael Unsworth

Fiscal Year Awarded: 1995

Description of Work: Development of a training agreement between NHEERL-WED and OSU to train postdoctoral, predoctoral and undergraduate scientists in which research is applicable to both EPA and the colleges and universities in the Pacific Northwest.

Rationale for the Noncompetitive Award: Unique qualifications of the recipient—ability to train students in various colleges and universities in the Pacific Northwest via one cooperative agreement with the Center for the Analysis of Environmental Change.

Total \$ Amount: \$725,678

Name of Program Element(s): Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 168

ORD Headquarters or Field Organization: NHEERL-Western Ecology Division

Number: CR821014

Name of Awardee: University of Maine

Address: 5715 Coburn Hall
Orono, ME 04469

Contact: Stephen Norton

Fiscal Year Awarded: 1993

Description of Work: Research on the effects of sulfur and nitrogen deposition on the soils and surface waters of forested ecosystems.

Rationale for the Noncompetitive Award: Unique qualifications of recipient—unique research capability based on prior work done by recipient in a unique field site; recipient also has developed a unique database to be used in the project.

Total \$ Amount: \$549,958

Name of Program Element(s): Acid Deposition

*Noncompetitive Awards of Financial Assistance and Contracts: 169***ORD Headquarters or Field Organization:** NHEERL-Western Ecology Division**Number:** CR824472**Name of Awardee:** Washington Department of Ecology**Address:** P.O. Box 47600
Olympia, WA 98504-7600**Contact:** Jan Newton**Fiscal Year Awarded:** 1995**Description of Work:** System-wide study of water column parameters such as nutrients, temperature and phytoplankton composition in the Willapa Bay Estuary, and the associated watershed.**Rationale for the Noncompetitive Award:** Unique qualifications of recipient—past history of recipient's research and monitoring program in Willapa Bay area (program begun by recipient in 1967).**Total \$ Amount:** \$872,059**Name of Program Element(s):** Multimedia*Noncompetitive Awards of Financial Assistance and Contracts: 170***ORD Headquarters or Field Organization:** NHEERL-Western Ecology Division**Number:** CR824229**Name of Awardee:** Oregon Department of Fish and Wildlife**Address:** P.O. Box 59
Portland, OR 97207**Contact:** Thomas O'Neill**Fiscal Year Awarded:** 1995**Description of Work:** Research to develop and demonstrate a process to identify and analyze priorities for conserving biodiversity at the state level, in this instance, Oregon.**Rationale for the Noncompetitive Award:** Unique qualifications of recipient—lead organization in a consortium of state, federal, and private organizations to perform biodiversity conservation research in the state of Oregon.**Total \$ Amount:** \$550,000**Name of Program Element(s):** Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 171**ORD Headquarters or Field Organization:** NHEERL-Western Ecology Division**Number:** CR824178**Name of Awardee:** University of Oregon**Address:** Oregon Institute of Marine Biology
4619 Boat Basin Drive
Charleston, OR 97240**Contact:** Lynda Shapiro**Fiscal Year Awarded:** 1995**Description of Work:** Study larval species in the Coos Bay Estuary for use as possible indicators of ecosystem health and viability.**Rationale for the Noncompetitive Award:** Congressionally-directed project.**Total \$ Amount:** \$490,000**Name of Program Element(s):** Multimedia**Noncompetitive Awards of Financial Assistance and Contracts: 172****ORD Headquarters or Field Organization:** NHEERL-Western Ecology Division**Number:** CR824154**Name of Awardee:** Oregon State University**Address:** Weniger Hall
Corvallis, OR 97331**Contact:** Michael Unsworth**Fiscal Year Awarded:** 1995**Description of Work:** Prepare an assessment of ecosystem management in the Pacific Northwest and present options for streamlining the management of that research.**Rationale for the Noncompetitive Award:** Congressionally directed project.**Total \$ Amount:** \$225,000**Name of Program Element(s):** Multimedia

Noncompetitive Awards of Financial Assistance and Contracts: 194

ORD Headquarters or Field Organization: NHEERL-Gulf Ecology Division

Type of Instrument: Cooperative Agreement

Number: CR821872

Name of Awardee: University of Florida

Address: 2169 McCarty Hall
Gainesville, FL 32611

Contact: Dr. P.S.C. Rao

Fiscal Year Awarded: 1994

Description of Work: This project studies the desorption of PCBs from historically-contaminated soils and sediments and examines the influence of cosolvents and surfactants on PCB desorption and biodegradation kinetics.

Rationale for the Noncompetitive Award: Dr. Rao at the University of Florida is a recognized international expert on PCB chemodynamics in the soil environment. Most notable have been his ideas regarding the effects of cosolvency, a concept that is not only unique but also very relevant to the bioremediation of complex mixtures of wastes.

Total \$ Amount: \$74,961

Name of Program Element(s): TD1-Superfund Research

Noncompetitive Awards of Financial Assistance and Contracts: 195

ORD Headquarters or Field Organization: NHEERL-Gulf Ecology Division

Type of Instrument: Cooperative Agreement

Number: CR822923

Name of Awardee: SETAC foundation for Environmental Education

Address: 1010 N 12 Ave.
Pensacola, FL 32501

Contact: Rod Parrish

Fiscal Year Awarded: 1994

Description of Work: Provide support for wetlands workshops and public education.

Rationale for the Noncompetitive Award: The Society has the unique experience and track record of successfully managing scientific meetings.

Total \$ Amount: \$20,000

Name of Program Element(s): CC7-Pesticide Research

Noncompetitive Awards of Financial Assistance and Contracts: 196**ORD Headquarters or Field Organization:** NHEERL-Gulf Ecology Division**Type of Instrument:** Cooperative Agreement**Number:** CR823280**Name of Awardee:** California State Water Resources Board**Address:** 901 P Street
Sacramento, CA 95812-0100**Contact:** Walt Pettit**Fiscal Year Awarded:** 1994**Description of Work:** This project applies EMAP assessment approaches to provide synoptic information about the ecological condition of point and non-point discharges on the mainland shelf. These approaches will be evaluated as alternatives for current compliance monitoring programs.**Rationale for the Noncompetitive Award:** Summarized as follows: (1) the unique combination of participants in California government involved in the proposed research, (2) the research experience in the geographic region by the proposing organization and its partners is extensive (>100 person-years) making it unique combination of researchers, and (3) the existing cost-share mechanism places 80% of the costs with the State of California.**Total \$ Amount:** \$150,000**Name of Program Element(s):** CC9-Multimedia Research**Noncompetitive Awards of Financial Assistance and Contracts: 197****ORD Headquarters or Field Organization:** NHEERL-Gulf Ecology Division**Type of Instrument:** Cooperative Agreement**Number:** CR823245**Name of Awardee:** California State Water Resources Control Board**Address:** 7171 Fenwick Lane
Westminster, CA 92683-5218**Contact:** Christopher Francisco**Fiscal Year Awarded:** 1994**Description of Work:** Examines the utility of EMAP assessment approaches to provide synoptic information about the ecological conditions of estuaries in Southern California, and as an alternative for estuary monitoring programs.**Rationale for the Noncompetitive Award:** The SCCWRPA has unique capabilities to conduct research by combining the talents, expertise and funding of many government entities in Southern California.**Total \$ Amount:** \$500,000**Name of Program Element(s):** CC9-Multimedia Research

Noncompetitive Awards of Financial Assistance and Contracts: 198**ORD Headquarters or Field Organization:** AED-NHEERL**Number:** CQ822770**Name of Awardee:** National Council of Senior Citizens**Address:** 1331 F Street NW

Noncompetitive Awards of Financial Assistance and Contracts: 202**ORD Headquarters or Field Organization:** Mid-Continent Ecology Division (MED-Duluth)**Type of Instrument:** Cooperative Agreement**Number:** CR820586**Name of Awardee:** University of Minnesota**Address:** 1100 Washington Ave. South-#201
Minneapolis, MN 55415-1226**Contact:** Michael C. Swift**Fiscal Year Awarded:** 1993**Description of Work:** The objectives of this project are to quantify relationships between sediment (suspended and settled) and critical stream ecosystem processes using the stream mesocosms located at the Monticello Ecological Research Station.**Rationale for the Noncompetitive Award:** One institution has unique capabilities to perform the work on unique equipment.**Total \$ Amount:** \$681,800**Name of Program Element(s):** R&D, Water Quality**Noncompetitive Awards of Financial Assistance and Contracts: 203****ORD Headquarters or Field Organization:** MED-Duluth**Type of Instrument:** Cooperative Agreement**Number:** CR819065**Name of Awardee:** University of Wisconsin-Madison**Address:** Research Administration-Financial
750 University Ave.
Madison, WI 53706-1490**Contact:** Richard E. Peterson**Fiscal Year Awarded:** 1992**Description of Work:** This project seeks to understand the risk which low levels of polychlorinated dibenzo-p-dioxins, dibenzofurans and biphenyls in eggs of fetal fish species pose to early life stage mortality.**Rationale for the Noncompetitive Award:** Administrator's request in the best interest of the EPA.**Total \$ Amount:** \$235,733**Name of Program Element(s):** R&D, Water Quality

*Noncompetitive Awards of Financial Assistance and Contracts: 204***ORD Headquarters or Field Organization:** National Health and Environmental Effects Lab (NHEERL)**Type of Instrument:** Assistance**Number:** CR824334**Name of Awardee:** Case Western Reserve University**Address:** OH**Contact:** Kevin Cooper**Fiscal Year Awarded:** 1995

Description of Work: The Effect of UV Light on the Induction of Immune Response in the Skin. Identify types and magnitudes of effects of UV light on skin and immune system; establish whether immunization to an antigen at a distant site from the UV exposure is affected by variations in the UV spectrum; and test sunscreens to determine level of protection they provide.

Rationale for the Noncompetitive Award: One institution has unique capabilities—The project manager moved to this university and this award allows him to wrap up a six year research effort.

Total \$ Amount: \$167,480**Name of Program Element(s):** Air Quality Research*Noncompetitive Awards of Financial Assistance and Contracts: 205***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR817863**Name of Awardee:** Baylor College of Medicine**Address:** TX**Contact:** Kurt Randerath**Fiscal Year Awarded:** 1992

Description of Work: Monitoring Human DNA Adducts by 32P-Postlabeling. The objective of project is to characterize the ability of 32P-postlabeling to detect environmentally induced DNA adducts in human tissues by applying it to the determination of background levels of adducts in individuals with different demographic characteristics and in model studies of precisely characterized human exposures.

Rationale for the Noncompetitive Award: One institute has unique capabilities—the project manager developed this assay and modified it for optimal detection and separation of low levels of adducts found in human specimens.

Total \$ Amount: \$303,740

Noncompetitive Awards of Financial Assistance and Contracts: 208**ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR820406**Name of Awardee:** University of Southern California-Los Angeles**Address:** CA**Contact:** Donald Tiemey**Fiscal Year Awarded:** 1992**Description of Work:** Bronchoalveolar Responses to Natural Acute/Chronic Oxidant Air Pollution. To Determine whether seasonal oxidant air pollution results in damage to the lung which can be assessed by bronchoalveolar lavage (BAL).**Rationale for the Noncompetitive Award:** One institute has unique capabilities—geographic location key to population exposure—UCLA is the only institution in the LA area with experience in conducting bronchoalveolar lavage (BAL).**Total \$ Amount:** \$253,359**Name of Program Element(s):** '93 Air Quality Research = \$85,700***Noncompetitive Awards of Financial Assistance and Contracts: 209*****ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR820510**Name of Awardee:** University of Michigan**Address:** Michigan**Contact:** Kevin Cooper**Fiscal Year Awarded:** 1993**Description of Work:** Does Pigmentation or Sunscreen Effectively Protect Human Beings from Immunosuppression Caused by Exposure to Solar Radiation Containing Increased Amounts of UV Wavelengths. To address the effect of two very important potential modulators of UV-B suppression, natural pigmentation and topically-applied sunscreen.**Rationale for the Noncompetitive Award:** Unique capabilities of the university.**Total \$ Amount:** \$383,351

Name of Program Element(s):	'93	*	Global Change = \$101,271
	'94		Global Change = \$167,480

*Noncompetitive Awards of Financial Assistance and Contracts: 210***ORD Headquarters or Field Organization:** NHEERL**Type of Instrument:** Assistance**Number:** CR817643**Name of Awardee:** University of North Carolina-Chapel Hill**Address:** NC**Contact:** Phillip Bromberg**Fiscal Year Awarded:** 1991

Description of Work: Collaborative Clinical Research on Health Effects of Exposure to Air Pollutants. To focus talents and resources of both UNC Center for Environmental Medicine and Lung Biology and EPA to address mutual environmentally-related research goals, including developing more accurate or sensitive measurement techniques, developing long-range research programs to address evolving issues, and to provide training opportunities in environmental medicine and environmental research at predoctoral and postdoctoral levels.

Rationale for the Noncompetitive Award: One institute has unique capabilities—The EPA Human Studies Facility is located on the UNC campus where UNC-CEMLB possess the unique capabilities required for the conduct of human health research in the form of a confluence of highly trained medical researchers, environmental scientists, students of environmental medicine and sciences, hospital labs and clinics, and medical equipment. The use of human subjects in our studies requires the immediate proximity of a hospital emergency room. While other universities may have adequate research and medical staffs, our location on the UNC Campus precludes their effective interactions with us for human exposures.

Description of Work: Research to Advance Environmental Epidemiology: Improving the Use of Human Data in Risk Assessment. This is an aggressive effort to advance the field of environmental epidemiology and in doing so to increase the application and relevance of human data and methods in the risk assessment process. There are two components. The first, Core, reflects long-term research activities that will improve the state-of-the-art of environmental epidemiology. The second, project-specific activities involves short-term, often media-specific studies (1-2 years) of an exploratory or feasibility nature needed for making a decision on whether more substantial epidemiologic investigations should be funded.

Rationale for the Noncompetitive Award: One institute has unique capabilities—close geographical location that will allow integration of toxicology (laboratory) and clinical research with epidemiologic investigations.

Total \$ Amount: \$4,512,544

	'93	Drinking Water = \$43,527
	'93	Multimedia = \$50,000
	'93	Toxic Substances = \$249,334
	'94	Air Quality = \$318,474
	'94	Drinking Water = \$92,527
	'94	Toxic Substances = \$45,000
	'94	Toxic Pesticides = \$15,481

Consultants

Q9. For each of FY 1993 through FY 1996 (to date), please provide a listing by fiscal year, of all EPA ORD consultants. For each such consultant, provide the following information:

Q9a. Identity;

Q9b. Description of work to be performed by the consultant;

Q9c. Rationale for using the consultant rather than relying on in-house or other existing contractor expertise; and

Q9d. Funding, including the source of funding.

A9. The following identifies the consultants that ORD has funded with R&D appropriated resources in fiscal years 1993) through 1996:

1. November 1993 - August 1994 (intermittent employment totaling 42 days).

- a. Victoria A. Cochran-Arroyo.
- b. Provide expert advice and critical advice on scientific issues related to reducing air pollution.
- c. Prior work experience with EPA that included development and review of Agency air pollution policies from the program office perspective. This experience, in combination with her academic training, was not available in-house nor did we have existing contractor expertise readily available.
- d. \$11,500 - R&D appropriated resources.

2. May 1994 - August 1994 (70 days).

- a. Dr. Robert J. Huggett.
- b. Provide expert advice to advisory committees of the Science Advisory Board regarding issues and policies related to the scientific and technical problems associated with the effects of hydrocarbon and organo chloride chemical residues on marine organisms.
- c. Dr. Huggett is an internationally renowned environmental chemist. His credentials and expertise were critical to many reviews and dealt with the fate of chemicals in the environment. These capabilities were not available in-house nor did we have existing contractor expertise readily available.
- d. \$31,000 - R&D appropriated resources.

Trade Associations, Professional and Environmental Organizations

Q10. Please provide the EPA ORD funding (including funding source) for each of FY 1993 through FY 1996 (to date) of trade associations and professional, environmental or other organizations. For each such trade association/professional, environmental or other organization, provide the following information:

Q10a. Identity;

Q10b. Description of work performed by the trade association/professional, environmental or other organization;

Q10c. Whether or not the funds were awarded on a competitive basis; and if not, the rationale for a noncompetitive award.

A10. The information requested is attached. The information entails active financial assistance agreements and contracts that are currently in place.

<i>Trade Association/Professional, Environmental or Other Organization: 1</i>	
Institution	National Association of Counties
Address	440 First Street, NW Washington, DC 20001
Type of Instrument	Cooperative Agreement
Number of Instrument	CX822097
Fiscal Year Awarded	1994
Description of Work	Local governments' access to pollution research and solid waste management research needs. Build local government capacity for pollution prevention and participation in life cycle analysis of municipal solid waste research at NRMRL.
Competitive	☐ (Check, if Yes)
Noncompetitive	☒ (Check, if No. Also, give rationale below.)
Rationale for Noncompetitive	Not required by Agency policies.
Total \$ Amount	\$370,000
Program Element(s)	
CC9	FY93 = \$130,000
CC9	FY94 = \$110,000
CC9	FY95 = \$130,000

Trade Association/Professional, Environmental or Other Organization: 2**Institution:** Council of State Governments**Address:** 3560 Iron Works Road

Research Triangle Park, NC 27709**Type of Instrument****Number of Instrument** CR820429**Fiscal Year Awarded** 1993

Description of Work: Application of Computational Fluid Dynamics to Upper Respiratory Tract Dosimetry and human Risk Assessment for Inhaled Gases and Vapors. To develop and quantitative model for upper respiratory track dosimetry in the rhesus monkey to permit an understanding of the relative importance of factors governing transport of inhaled gases and vapors.

Competitive: _____ (Check, if Yes)**Noncompetitive:** ☒ (Check, if No. Also, give rationale below.)

Rationale for Noncompetitive: The sole source cooperative agreement with CIIT was invoked because the CIIT scientists possess a unique expertise and have pre-existing information/material that substantially lowers the cost of the project. Furthermore, the originating discussion for this cooperative agreement occurred around September 1991, before development of draft ORD guidelines. Though EPA provided broad goals, CIIT provided the intellectual investment of the specific research approach to meet the goal of nasopharyngeal extrapolation. Thus, CIIT's ideas could not ethically be advertised.

Total \$ Amount \$758,380**Program Element(s)** CC1A1E

*Trade Association/Professional, Environmental or Other Organization: 34***Institution:** American Society for Microbiology**Address:** Washington, DC**Type of Instrument****Number of Instrument:** CR8922173**Fiscal Year Awarded:** 1993**Description of Work:** Colloquium on global issues in microbiological water quality for the next century.**Competitive:** _____ (Check, if Yes)**Noncompetitive:** ☒ (Check, if No. Also, give rationale below.)**Rationale for Noncompetitive:** Unique capabilities residing in experts who participate.**Total \$ Amount:** \$178,409**Program Element(s):** CC3 (Water Quality)*Trade Association/Professional, Environmental or Other Organization: 35***Institution:** Center for Process Analytical Chemistry**Address:** Seattle, WA**Type of Instrument****Number of Instrument:** DW49935215 (Funding to CPAC goes through IAG with National Science Foundation)**Fiscal Year Awarded:** 1991**Description of Work:** CPAC leverages annual contributions from 50 sponsors to fund peer review research projects related to analytical chemistry.**Competitive:** _____ (Check, if Yes)**Noncompetitive:** ☒ (Check, if No. Also, give rationale below.)**Rationale for Noncompetitive:** Use of IAG precluded competition.**Total \$ Amount:** \$333,220**Program Element(s):** CC4 (Drinking Water)

Trade Association/Professional, Environmental or Other Organization: 36**Institution** American Society for Testing Materials**Address** Pennsylvania**Type of Instrument** Cooperative Agreement**Number of Instrument** CR820738**Fiscal Year Awarded** 1992

Description of Work: Develop Draft Standards in the Area of Groundwater Monitoring and Environmental Assessment. The objective of this agreement is to accelerate the drafting of standards in the area of groundwater monitoring. These standards are being written in the areas of vadose zone monitoring, saturated zone monitoring, geophysics, drilling technology, and groundwater analysis and interpretation.

Competitive: _____ (Check, if Yes)**Noncompetitive:** x (Check, if No. Also, give rationale below.)

Rationale for Noncompetitive: No other standard writing organization is actively involved in the groundwater field. It would be cost-prohibitive to train and establish any other organization to do this work, if any other organization could be found to continue this effort.

Q11. Please provide a list of all publications which receive financial assistance from EPA. The list should include the name, subject matter and total EPA contribution to the publication.

A11. Based on our review, ORD does not provide direct financial assistance to specifically fund a publication. However, publications are often a product of grants and cooperative agreements with outside organizations, (e.g., a report on research results by a university grantee).

Advisory Committees

Q12. Please provide a list of advisory committees, a description of each, and the amount budgeted for each in fiscal years 1995, 1996 and 1997, the source of the funding for each, and the work product or products of each.

A12. ORD has established a Board of Scientific Counselors (BOSC). OMB approved this FACA in April 1995 and the charter is currently at GSA for consultation. This is the only advisory committee funded by ORD. The objective of BOSC is to counsel the Assistant Administrator for Research and Development (AA/ORD) on the operation of ORD'S research program. BOSC's primary functions are to:

(a) evaluate science and engineering research programs, laboratories, and research-management practices of ORD and recommend actions to improve their quality and/or strengthen their relevance to the mission of the EPA; and

(b) evaluate and provide advice concerning the utilization of peer review within ORD to sustain and enhance the quality of science in EPA.

Included within the scope of BOSC is review of ORD's program development and progress, and research program balance, including ongoing implementation of the ORD Strategic Plan. BOSC's peer review function includes evaluation of ORD's peer review policies, and reviewing ORD laboratories. Additionally, BOSC provides advice on human resources planning, such as scientist career development and rotational assignment-programs, and the appropriate scope and design of training programs for environmental research professionals. Funding for the BOSC in FY96 is approximately \$200,000 and in FY97, \$300,000.

Technology Transfer/Industrial Partnerships

Q13. Please describe all the instruments used by the EPA ORD to share the cost of programs with industry, including contracts, cooperative agreements, Cooperative Research and Development Agreements (CRADAs), cost-shared contracts, personnel exchanges, Small Business Innovation Research (SBIR) and Small Business Technology Transfer Pilot (STTR) Program grants, technical assistance, user facilities, etc. Please provide the funding, by program, for fiscal years 1995 through 1997 for each funding mechanism.

Cooperative Research and Development Agreements
In-House Funding for ORD

In implementing the Federal Technology Transfer Act of 1986 (FTTA) and Executive Order 12591, ORD enhances relationships with industry, universities, and state and local governments to conduct cooperative research and development and commercialize environmental technologies. ORD's activities under the FTFTA involve the development and implementation of cooperative research and development agreements (CRADAs) (Section 11 of FTFTA) and development and oversight of the implementation of licensing agreements (Section 11 and 13 of FTFTA). Specific activities include identifying appropriate technologies for CRADAs and licensing agreements, negotiating specific terms of such agreements, reviewing such agreements to ensure their conformance with the requirements of FTFTA and EO 12591, fulfilling EPA's responsibilities under such agreements and monitoring the activities of outside cooperators and licenses under these agreements. ORD in-kind services contributions to CRADAs are as follows:

<u>FY95</u>	<u>FY96</u>	<u>FY97</u>
\$130,000	\$140,000	\$150,000

In-kind services are in-house resources such as technical assistance, equipment, supplies, and facilities.

Small Business Innovation Research Program (SBIR)

The SBIR program builds on the technical and entrepreneurial expertise of small businesses to advance the development of new technologies for preventing or reducing types of pollution that pose significant concerns for human health or detrimental effects to natural resources. EPA has awarded some \$8.8 million to 71 small technology businesses to develop and demonstrate innovative technologies for effective, economical environmental protection. The competitive awards were made from Fiscal Year 1995 EPA funds under the government-wide SBIR program. Funding in FY96 is 2.0% and in FY97 2.5% of the R&D appropriations extramural resources.

Q14. Please provide a complete listing of all EPA ORD-funded CRADAs including, for each, current-year (FY 1996) funding and out-year funding requirements to complete the projects.

A14. ORD-funded CRADAs are as follows:

(In Thousands of \$)

No.	CRADA Partner	CRADA #	FY96	FY97	FY98	FY99	FY2000
1	Bioremediation Consortium	112	100	100	100	100	100

Use of Prior Year Balances

Q15. What are the FY 1997 levels of prior year balances, by EPA ORD appropriation account, that EPA proposes to be used as offsets to the FY 1997 budget request?

A15. At this time, the Agency does not have an FY 1996 appropriation, making it difficult to project what carryover will be available in FY 1997 and where that carryover is likely to occur programmatically.

Q16. For those prior year balances identified in the response to question 15 above, please identify the source of those prior year balances by program/project/ activity.

A16. At this time the Agency does not have an FY1996 appropriation, making it difficult to project what carryover will be available in FYI 997 and where that carryover is likely to occur programmatically.

OMB Passback Process

Q17. In the EPA ORD's formal FY 1997 budget request to Congress, please identify all FY 1997 funding increases and decreases to the EPA ORD's initial FY 1997 budget request submitted to OMB.

- A17. The FY1997 President's Budget request provides the necessary resources to support the President's research priorities at EPA.

Global Change Research Program/Climate Change Action Plan

- Q18. Please provide a complete listing of all EPA programs/projects included in the U.S. Global Change Research Program, coordinated by the National Science and Technology Council's Committee on Environment and Natural Resources, including, for each:

Q18a. A brief description; and

Q18b. FY 1995, FY 1996, and FY 1997 funding levels.

- A18a. The Agency's Global Change Research Program is a part of the comprehensive government-wide U.S. Global Change Program coordinated through the CENR. The EPA program will help to provide the scientific basis to assess the consequences of global change, including the feedback these systems have on climate change. The major components of the program follow the risk assessment paradigm and are intended to reduce uncertainties associated with:

1. Developing Predictive Models—estimating global climate change under alternative future emissions (exposure);
2. Regional Vulnerabilities and Impact Assessment—characterizing the vulnerability of regional scale ecosystems to climate change (risk assessment);
3. Biomass Utilization—mitigating greenhouse gas emissions (risk management);
4. Stratospheric Ozone Depletion—monitoring UV-B radiation, determining human and ecosystem risks associated with-stratospheric ozone depletion, and evaluating alternatives to ozone-depleting substances (exposure, effects, reduce/management risk).

A18b. Funding Levels.

Global Climate Change Research
(Resources in Millions of \$)

	FY 1995	FY 1996	FY 1997
Work Years	84.7	68.7	49.1
Resources*	25.3**	22.5**	12.2**

* Totals include salaries and extramural funds.

**Does not include the \$6.2 million for the Climate Change Action Plan. In addition, EPA is working to refocus other Agency research to make it better complement global change research.

Q19. Please provide all EPA funding for each of FY 1995, FY 1996, and FY 1997 used to support the activities of the United Nations Intergovernmental Panel on Climate Change (IPCC) and/or the Intergovernmental Negotiating Committee for a Framework Convention on Climate Change.

A19. ORD has not directly participated in the activities of the Intergovernmental Negotiating Committee (INC). Since the first Conference of the Parties to the FCCC meeting in Berlin last March (COP1), activities that will support future negotiations under the FCCC are conducted within other intragovernmental bodies, including the Subsidiary Body for Scientific and Technological Advice (SBSTA), Subsidiary Body for Implementation (SBI), and the Ad Hoc Group on the Berlin Mandate (AGBM). One ORD senior level scientist has been involved with the revision of procedures and accompanying manuals for countries to use in estimating the emissions of greenhouse gases. This work is being done under the auspices of the OECD, but eventually the work product will likely be reported to, and possibly adopted by, the SBSTA. The magnitude of this effort is within the \$30,000 to \$50,000 range, and began in early FY 95. It will likely continue for 12-18 months.

ORD has provided no direct financial support to the IPCC coordination office, located in Geneva. As an Agency of the US GCRP, financial support has been provided to the IPCC Working Group 2 (WG2) Technical Support Unit. The USG chairs WG2 (Bob Watson), and administration for its TSU is coordinated out of the USGCRP Program Office. ORD's contribution out of USGCRP distributed funds in FY 95 for this purpose is on the order of \$10K. ORD provided extramural support to three IPCC WG2 chapter lead authors. This support was in the range of \$200,000 to \$250,000 in FY 95. Three ORD senior scientists devoted substantial parts of their time to being IPCC chapter lead authors, and coordinating and reviewing activities in FY 95. This work in aggregate amounted to an estimated 2 FTE's and entailed travel in the range of \$20,000 to \$30,000.

Substantially more than half of the ORD's Global Change Research Program in FY 95 was aimed at producing results of use to the IPCC assessment activities, but was not directly, nor formally, connected with IPCC. No funds are planned for direct IPCC support in FY 96 and FY 97.

Q20. Please provide a complete listing of all EPA programs/projects included as part the Administration's Climate Change Action Plan, including, for each:

Q20a. a brief description.

A20a. Brief description. This work is implemented by the Office of Air and Radiation to investigate a variety of new technologies with the goal of reducing emissions of greenhouse gases including:

- Technologies for methane recovery from coal mines;
- Technologies for methane recovery from landfills;
- Technologies for methane recovery from natural gas systems;

- Technologies for per-fluorocarbon reduction from aluminum smelting; and
- New building HVAC, insulation, and refrigeration technologies.

Q20b. FY 1995, FY 1996, and FY 1997 funding levels.

A20b. Funding Levels. The total EPA/ORD budget contributed to CCAP is:

CCAP (In Millions of \$)			
	FY 1995	FY 1996	FY 1997
Funding	8.5	6.2	6.2

Out-Year Funding Projections

Q21. What are the estimated FY 1998 through FY 2002 funding requirements, by EPA ORD program/subprogram for ORD?

A21. The FY 1997 President's Budget, as part of the appendix, includes out year resource projections covering a five year time frame. This information is provided at the Agency account level and is not available at any lower level of detail. For the S&T(**which includes resources for Agency Program Laboratories**), and the Superfund appropriation, the information is provided in the table below:

(In Millions of \$)					
	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002
S&T	595.5	612.2	629.3	646.9	665.1
SFBA	42.5	42.5	42.5	42.5	42.5
Total	638.0	654.7	671.8	689.4	707.6

APPENDIX 3-FOLLOWUP QUESTIONS AND ANSWERS FOR THE RECORD

The Honorable Dr. D James Baker
Under Secretary for Oceans and Atmosphere
and
Administrator, National Oceanic and Atmospheric Administration
U.S. Department of Commerce

Answers to Followup Questions

HEARING OF THE SUBCOMMITTEE ON ENERGY AND ENVIRONMENT
COMMITTEE ON SCIENCE
U.S. HOUSE OF REPRESENTATIVES

on

FY 1997 Request for DOE, NOAA, EPA and Safe Drinking Water R&D

Thursday, March 21, 1996

Followup Questions Submitted to

**The Honorable Dr. D. James Baker
Under Secretary for Oceans and Atmosphere
U.S. Department of Commerce and Administrator
National Oceanic and Atmospheric Administration**

QUESTIONS FROM CONGRESSMAN ROHRABACHER

FY 1997 NPOESS Funding

- Q1.** During your testimony you stated that the National Polar-orbiting Operation Environmental Satellite System (NPOESS) program had been delayed and that the \$78 million requested in the President's fiscal year (FY) 1997 budget for NOAA does not reflect this delay. Please provide the Subcommittee with a detailed breakdown of all funding required in FY 1997 for NPOESS and related activities.
- A1.** The newly optimized convergence program will focus on high risk, critical sensors and algorithms and early mods to POES and DMSP, if approved by the Executive Committee in FY 1997. A total of \$58.0 million is required. The funding should be split equally by NOAA and DoD, with each providing \$29 million.

The FY 1997 breakdown is as follows:

NPOESS (Dollars in Millions)	
Sensors, Algorithms, C3 Risk Reduction	
Advanced Technology Support Program	\$4.5
NPOESS Sensors/Algorithms	15.1
DMSP Mods	4.3
POES Mods	3.1
Fairbanks Antenna Upgrade	<u>1.0</u>
Subtotal	28.0
 Program Support	 15.6
Government-led Studies	<u>14.4</u>
Total	\$58.0

Funds Spent on NPOESS

- Q2.** Please provide the Subcommittee with the dollar figures and detailed explanation for all money spent to date on NPOESS and related activities including a list of all remaining unobligated balances associated with the program.
- A2.** The FY 1996 obligations through March, 1996, for the NPOESS program are \$26 million. Funds obligated to date for NPOESS are shown below. Funding is in millions of dollars:

Program Task	FY 1995 Actuals	FY 1996 Obligations
Phase O Contracts	9.1	0.0
Systems Engineering Contracts	4.5	7.5
Command, Control & Comm.	0.0	9.3
Internal Concept Studies	3.7	0.0
Government-led Studies	2.2	4.2
IPO Administration	1.7	2.3
Agency Shared Support	2.4	2.7
Total Obligated to Date	23.6	26.0
Appropriation	23.6	58.4
Unobligated Balances as of 3/31/96	N/A	32.4

Run-Out of NPOESS Program

- Q3.** Please provide a complete run-out of the expected costs of the NPOESS program broken down by fiscal year and NOAA/Department of Defense contribution.
- A3.** The total life cycle costs of the program are being developed and will be available after the July 30, 1996 program review with the Executive Committee. We expect to save in excess of \$300 million through FY 2002 over the baseline NPOESS program and through the life cycle. Total funding will be split evenly by NOAA and the Department of Defense. The rebaselined program for FY 1996 was adjusted to make the cumulative contribution by DOC and DoD equal. It is important that the sharing ratios remain 50/50.

Contracting Out Mapping and Charting

- Q5.** During your testimony you indicated that "at least 50%" of NOAA's mapping and charting could be contracted out. How much does NOAA estimate it will spend (including personnel and ship maintenance costs) on mapping and charting in FY 1997? What percent of this total will be contracted out?
- A5.** NOAA's stated goal is private sector collection of at least 50% of hydrographic data.
- Funding for collection of mapping and charting data is under two accounts: National Ocean Service (Mapping and Charting—\$12.5 million requested in FY 1997) and Program Services (\$13.5 million requested under Marine Services and \$1.6 million requested under Aircraft Services for a total of \$15.1 million). These are collected under the "Update Nautical Surveys" objective supporting Promote Safe

Navigation for which the total request for FY 1997 is \$27.6 million. Contracts for hydrographic data are expected to total between \$4.5 million and \$5.0 million, 16 to 18 percent of the total.

- As part of this effort to expand private sector hydrographic data acquisition support, two ships have been deactivated within the past year and replaced by contracts for data. NOAA has awarded a contract for hydrographic data collection in Long Island Sound, used a Corps of Engineers (COE) contract for data collection in Florida, and has begun using an airborne laser system in a cooperative effort with the COE and the private sector. NOAA is continuing to modify the mix of approaches to at-sea data collection and expand the use of outsourcing where effective and efficient.

Oceanographic and Fisheries Research

Q5. Please provide the Subcommittee with a detailed breakdown of the totals NOAA expects to spend in FY 1997 (including personnel and ship maintenance costs) for oceanographic research and fisheries research. What percentage of this total will be contracted out?

A5. In FY 1997, NOAA expects to spend a total of \$194 million for fisheries and oceanographic research. Of this amount, NOAA expects to contract out approximately 18%. A breakdown between the two research categories is provided, below:

Fisheries Research: NOAA expects to spend approximately \$183 million in FY 1997 on fisheries research. Projects supported include fisheries stock assessment and related research used for developing fishery management plans and protected species assessment. Approximately \$33 million will be spent for fisheries research related to ship operations, ship maintenance, and personnel. This figure includes \$4.2 million for chartering out of NMFS ORF.

Under Build Sustainable Fisheries, NOAA expects to spend \$154 million. This figure includes personnel costs, and the aforementioned \$4.2 million for chartering. Of the \$154 million, approximately 20% will be contracted out.

Oceanographic Research: NOAA expects to spend \$11 million in FY 1997 for ship operations, including personnel and maintenance, in support of oceanographic research. Of this amount, approximately 24% (\$2.6 million) will be used for outsourcing. Projects supported include Equatorial Pacific Ocean Climate Study (investigates the role of the ocean in global climate through research on the dominant mechanisms that produce variations in sea surface temperature); Tropical Oceans/Global Atmosphere (investigates the influence of large-scale atmospheric and oceanic changes in tropical ocean basins); Atlantic Climate Change Program (investigates the oceanic transport of heat); and World Ocean Circulation Experiment (international/interagency program to define the world ocean circulation as part of the climate and global change program).

NOAA also performs oceanographic research in OAR's Environmental Research Laboratories (ERLs). The following chart shows the proposed FY 1997 ERL budgets for pertinent laboratories and the amount each expects to use to perform oceanographic research.

ERL	FY 1997 Proposed Lab Budget	Oceanographic Research
Atlantic Oceanographic Meteorological Lab (AOML) - Miami, FL	\$7,336,000	\$2,567,000
Pacific Marine Environmental Research Lab (PMEL) - Seattle, WA	\$7,791,000	\$6,467,000
Total	\$15,127,000	\$9,034,000

AOML estimates that 2.3% of its oceanographic budget is contracted out while PMEL projects 8.3% of its oceanographic budget as being contracted out. These percentages exclude funds awarded to Joint Institutes (JI).

Termination of NOAA Corps

- Q6. How many former NOAA Corps Officers will be terminated under NOAA's plan to eliminate the NOAA Corps? If NOAA's fleet is eliminated or substantially downsized, how many former Corps Officers will NOAA need to keep?**
- A6.** NOAA is developing a plan to implement the decision to eliminate the NOAA Corps. The plan will take into account the need to preserve NOAA's ability to continue to perform its essential missions, and to treat the officers fairly.

The plan is in the final stages of completion, and should provide a more specific answer to this question. We will provide a copy of the plan as soon as it is approved by the Administration.

NOAA Corps vs. Civilian Employees

- Q7. Will former NOAA Corps Officers compete with civilian scientists for their new NOAA civilian jobs? Will the automatic retention of NOAA Corps Officers force NOAA to downsize its civilian workforce?**
- A7.** The plan referred to in the answer to question 16 will address the question of retention of NOAA Corps officers. Since the plan has not yet been adopted by the Administration, we cannot provide a more detailed answer to question #7 at this time.

IG Report on NWS Headquarters Staffing

Q8. The Inspector General has indicated that at least 258 FTEs can be eliminated from National Weather service headquarters. How many NWS headquarters FTEs does NOAA intend on eliminating in FY 1997?

A8. Included in both the Strategic Plan for the NWS Modernization and Associated Restructuring (MAR) and the NWS Streamlining Plan are significant reductions in positions associated with NWS headquarters activities. Between FY 1995 through FY 1999, the NWS plans to reduce headquarters staffing levels by over 150 FTEs. This includes an accelerated reduction in FY 1997 of 51 headquarters FTE. These reductions are consistent with a phased draw-down of headquarters activities designed to provide support for NWS field office operations and centralized operations during the Modernization. In addition, NWS is currently reviewing the feasibility of further accelerating these streamlining efforts, and making cuts beyond those already targeted.

With respect to the Inspector General's (IG) Report, NOAA disagrees with the recommendations to eliminate hundreds of NWS headquarters positions. The IG report calls for elimination of the positions through redistribution of the functions to other parts of the NWS and to contractors. However, the report fails to recognize the FTEs and costs associated with this redistribution of resources as offsets to the proposed savings. Further, many of the tasks suggested for contracting already have been studied for such privatization (under OMB Circular A-76) and were found to be more expensive under a contract operation. NOAA and the IG continue to discuss ways to come to agreement on the recommendations in the IG report.

Privatization of Specialized Weather Services

Q9. What specialized weather services will the National Weather Service (NWS) privatize in FY 1997?

A9. The National Weather Service (NWS) continues to work closely with the private sector to identify opportunities for enhancing the public-private partnership. While no specific weather services are planned for direct conversion to the private sector in FY 1997, the FY 1997 President's Budget does include two specific programmatic reductions that will provide greater opportunities for the private sector to expand its role in the provision of value added weather services.

First, in the FY 1997 President's Budget, the NWS is proposing to eliminate the Regional Climate Centers program for a reduction of \$2.0 million. This is a grant program which provides six regional areas around the country the ability to produce region-specific climate forecasts. The specialized climate forecasts produced through this program can be better provided by the private sector. Universities, state climatologists, and private weather vendors at the State and local level will be required to assume this region-specific climate forecast role.

Second, the NWS will eliminate any miscellaneous activities associated with the provision of special event forecast services such as those for balloon races, air shows, and outdoor sporting events. The NWS will continue its fundamental weather services and flood warnings for these events for the protection of life and property. The FY 1997 President's budget, includes \$2.6 million in savings associated with these miscellaneous activities.

Closure of Weather Offices in FY 1997

Q10. How many weather service offices will NOAA close in FY 1997?

- A10. NOAA expects to be ready for the Secretary of Commerce to certify "no degradation of service" and automate and close over 100 weather service offices (WSOs) in FY 1997. Closure is the final step in the spin-down process for WSOs that are not needed in the modernized and restructured National Weather Service (NWS). Each step in this spin-down process is integrally linked to modernization activities at weather offices that will become Weather Forecast Offices (WFOs). This linkage ensures that at all times the highest quality weather services will be provided to the public by utilizing new technological capabilities as soon as they have been proven operationally. Deployment of the last major technological component of the modernization, the Advanced Weather Interactive Processing System, is scheduled to begin in FY 1997. The AWIPS will provide the necessary capabilities to allow WFOs to provide the improved warning and forecast services promised by the NWS modernization program.

Two key steps preceding closure in the spin-down process are consolidation and automation. NOAA is already proposing consolidation certifications for about 40% of the spin-down WSOs. During the remainder of FY 1996, NOAA intends to put in place the required modernization criteria for automation and closure certifications. These criteria will be made available for public comment in proposed form, and finalized only after consultation with both the National Research Council's Modernization Committee and the Modernization Transition Committee as mandated by Public Law 102-567. However, these certification plans are contingent upon successful coordination with the Federal Aviation Administration (FAA). The FAA must approve a programmatic air safety appraisal for closure certifications and provide aviation service standards for the required automation criteria. The current certification schedules are shown below.

Planned Certifications

	1994	1995	1996	1997	1998	1999	2000
Consolidation							
Number			66	52	10	6	14
Cumulative			66	118	128	134	148
Automation							
Number				110	22	5	6
Cumulative				110	132	137	143
Closure							
Number				133	21	7	9
Cumulative				133	154	161	170

Planned Closure Not Requiring Certification (WSCMO/WSMO)

	1994	1995	1996	1997	1998	1999	2000
Number	1	3	20	10	0	2	
Cumulative	1	4	24	34	34	36	

Out-Year Changes

Q11. A comparison of the estimated out-year costs for NOAA's systems acquisitions with the out-year funding figures provided for NOAA by the Department of Commerce in the Commerce *Budget in Brief* for FY 1997 yields a \$50 million decrease in non-systems acquisition spending from FY 1997 to FY 1998. What low priority items will NOAA terminate from its FY 1997 budget request in order to meet this \$50 million reduction in spending?

A11. We have not yet determined the source of these reductions.

NRC Recommendations

Q12. During your testimony you indicated that NWS intends to follow the recommendations of the National Research Council in establishing additional Next Generation Weather Radar (NEXRAD) sites. Can such sites be established without violating section 411(C) of H.R. 2405, the Omnibus Civilian Science Authorization Act of 1995, as passed by the House of Representatives on October 12, 1995?

A12. The three additional NEXRAD sites recommended by the National Research Council and the Secretary of Commerce can be established without violating section 411(C) of H.R. 2405, the Omnibus Civilian Science Authorization Act of 1995. The Secretary could certify that such installations can be acquired within the NEXRAD authorization contained in section 102(b) of the NOAA Authorization Act of 1992, P.L. 102-567. This certification would assume the costs associated with NEXRAD operations and maintenance and product improvement are not included in the P.L. 102-567 authorization ceiling beginning in FY 1998.

NEXRAD for Evansville, Indiana

Q13. Will NWS establish a NEXRAD site in Evansville, Indiana? If not, what steps is NWS taking to ensure there will be no degradation in service for Evansville and its surroundings following closure of the Evansville Weather Service Office (WSO). Has NWS received complaints from the Evansville Airport of degradation of service following the WSO closure? If so, what steps have been taken to address these concerns?

A13. NWS has no plans to establish a NEXRAD (also called WSR-88D) site in Evansville, Indiana. Evansville was one of 32 areas of concern examined by the National Research Council (NRC) last year for possible degradation of radar coverage and weather services. Using the criteria and methodology recommended by the NRC, a team of experts from the

Department of Commerce concluded, "that low-altitude radar information over a small northwest portion of the Evansville area of concern will be degraded in the modernized system, particularly for macro bursts and stratiform snow. However, the Team finds that information from composite system sources, including WSR-88D data from mid- and upper-altitude returns and data on storms as they approach the area, high-resolution satellite data and lightning data, central and local forecast guidance, denser surface observations and spotter information, sufficiently addresses the ability to provide adequate information to detect these phenomena."

Although its service responsibility was transferred to Paducah, Kentucky in February 1996, the Evansville WSO has not been closed. Closure represents the final step in the spin-down process (see answer to question 10), and would occur only after the Secretary of Commerce certifies "no degradation of service" as required by Public Law 102-567.

NWS is aware of a March 22, 1996 article entitled, "Paducah Forecasts Fall Short" that appeared in the Evansville Courier, in which the Evansville Airport Manager advanced a number of complaints about the quality of weather services being provided to the Evansville area. The Meteorologist-in-Charge of the Paducah Weather Service office responded to these complaints in a March 25, 1996 letter to the Editor of the Evansville Courier. A copy of this letter to the editor is enclosed. NWS is also aware of a March 27, 1996 letter from the Evansville Airport Manager to Senator Richard Lugar with a number of similar complaints. Upon receipt, NWS will respond to each of the concerns expressed.

Vice-Presidential Support for Evansville, Indiana

- Q14. Vice President Gore in 1994 stated his intention to work for a NEXRAD for Evansville. What role if any has he (or his office) played in the effort to secure a radar site for Evansville? Has the Vice President (or any of his staff) indicated his support (verbally or in writing) for locating a NEXRAD in Evansville or at any other site?**
- A14.** During a trip to Evansville in 1994, the Vice President stated that Evansville needed Doppler radar coverage. He has also been supportive of the process established by the Secretary of Commerce to evaluate independently Next Generation Radar (NEXRAD) coverage and associated weather services. This process began with the Secretary's request to the National Research Council's (NRC) National Weather Service Modernization Committee to conduct a study on the adequacy of NEXRAD coverage with respect to "no degradation of service" as mandated by P.L. 102-567. In response to the NRC Study, the Secretary of Commerce assembled a team of experts to review the NRC findings and other areas of concern around the country and prepare a report to Congress. The Secretary's Report to Congress found no degradation of service to the Evansville Area as a result of the NWS Modernization.

With respect to the Vice President, the Administration has fully supported the process and the recommendations included in the Secretary's Report to Congress. The report summary for Evansville is listed in question 13.

March 25, 1996

To the Editor
The Courier
300 East Walnut
Evansville, IN 47702

To the Editor:

I want to thank the Courier for providing me the opportunity to correct some misperceptions in the March 22 edition article headlined "Paducah forecasts fall short." I also want to thank Evansville Regional Airport Manager Robert Working for stating that our forecasters do their best to provide accurate weather information.

On February 1, 1996, our office took over responsibility for severe weather warning, hydrologic service, and aviation forecasting for Evansville and other areas of southern Indiana. While it is true that Evansville no longer houses a functioning National Weather Service office, the staff here in Paducah is dedicated to serving the public in all our area of responsibility, including Evansville and southern Indiana.

Public weather forecasting for Evansville is currently done at the forecast office in Indianapolis. The Paducah staff will gradually acquire that forecast responsibility. Our staff meteorologists currently issue NOWcasts, which cover the immediate six hours from time of issue. Responsibility for the entire public forecast by our office may not occur until 1998. That is dependant on implementation of additional technology.

Mr. Working stated that he is concerned about airport operations and the ability of inbound pilots to obtain current weather data at Evansville Regional Airport. Current weather data at the airport is provided to the control tower by the Automated Surface Observing System (ASOS), which records temperature, humidity, barometric pressure, wind speed and direction, precipitation and cloud cover to 12,000 feet. This information is updated every minute around the clock, and the system is augmented by a contract observer 24 hours a day. The observer is certified to provide full surface observations in the unlikely event the ASOS has a total failure.

When the FAA's air traffic control tower at Evansville Regional is closed, augmented ASOS data is provided to the FAA's Air Route Traffic Control Center (ARTCC) in Indianapolis. There has been no change in the method of distribution of this observational data from the days when the observations were taken completely by human observers.

Since its inception in the 1980s, ASOS has been a joint project of the Weather Service, the FAA, and the Department of Defense. As part of the joint operating agreement, beginning in August FAA personnel will take over the responsibility of monitoring and augmenting ASOS observations when the Evansville tower is open. The FAA will contract for an observer during hours when the tower is not open. Weather data at Evansville Regional is now, and will continue to be, available to pilots 24 hours a day.

Pilots approaching Evansville Regional Airport can obtain weather information now from the local tower or the Indianapolis ARTCC. In the future, pilots will be able to access ASOS' computer generated voice on designated aircraft frequencies via the ATIS system currently in use. The FAA is currently developing that interface.

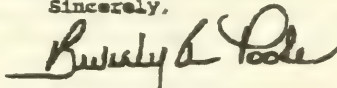

Given the complexities and vagaries of weather in the United States, no Weather Service office will ever claim to have 100 percent accuracy in forecasts - the variables are simply too numerous and technology too limited to realize that goal. For the same reasons, we will never predict every incidence of severe weather. But thanks to such technologies as ASOS and the WSR-88D Doppler weather radar, the Weather Service has greatly improved warning accuracy and lead times for the public.

There is often uncertainty and trepidation in the transition from long-standing methods of operation to new ways. The modernization of the National Weather Service has been no exception. My staff and I have worked diligently to develop programs that will protect lives and property. We have spent countless hours coordinating with aviation officials, local emergency management, severe weather spotters, and the media over the past two years. We have received numerous expressions of thanks and support from individuals and groups within those entities.

Our goal, now, is to continue strengthening those relationships and provide the best service and protection from severe weather possible to the public.

My apologies for the length of this letter, but I feel this is important information and deserved precise clarification.

Sincerely,

Beverly A. Poole
Meteorologist in Charge
National Weather Service Office

Paducah, KY

QUESTIONS FROM CONGRESSMAN BAKER

San Francisco Bay Demonstration Project

- Q1.** Given the instruction NOAA has received from President Clinton's National Performance Review, could you explain how NOAA is, as you stated in your written testimony before our subcommittee, "working with the private sector to revolutionize... navigation, mapping and surveying" specifically in the San Francisco Bay Demonstration Project
- A1.** NOAA is working with the private sector in a variety of ways in San Francisco—providing services needed by the private sector, helping to develop business opportunities for new products and services to be supplied by the private sector, contracting with the private sector, and developing techniques which can be adopted by the private sector to improve competitiveness.

PORTS

- Q2.** In your testimony, you mentioned that last year NOAA installed a real-time oceanographic monitoring system in San Francisco Bay. I have been told by NOAA officials that this was equipment needed to do a hydrological analysis of the Bay to construct a computer model for use in developing new advanced charting technology. Was the NOS's current CRADA partner on the demonstration project the only private company contracted on this analysis? If not, which other firms were involved and how much were their contracts worth?
- A2.** The Physical Oceanographic Real Time System (PORTS) is a series of NOS water level gauges, current meters, and meteorological sensors to provide real time information to mariners and others with a need to know water levels, currents, and weather conditions. All but one of the sensors has been installed in the Bay. We are working with the local community to install the system at the request of the San Francisco Bar Pilots Association, the Port of Oakland, the San Francisco Marine Exchange, the San Francisco Harbor Safety Committee, and others. As noted, responsibility for maintaining and operating the system will fall to the local community after October 1997.

Two elements of your question require clarification. First, the system will support navigation and will have other applications, such as responding to oil spills. In addition, we expect the system to support various modeling efforts which will, we hope, allow the system to provide nowcasts and forecasts for water levels and currents. It is not "to do a hydrological analysis of the Bay to construct a computer model for use in developing advanced charting technology."

Second, while NOS has worked with various CRADA partners, there is no such partner involved in the San Francisco PORTS or any other element of the San Francisco Demonstration Project at this time. Because we are working directly with the local community to operate and maintain the system after October 1997, there is no need to do

so. However, as noted above, we are using the San Francisco effort to commercialize the technology. Commercialization may well involve the CRADA process, although the vehicle for commercialization has not been determined at this time.

Private Sector Involvement in San Francisco Bay Project

Q3. NOAA officials have told me that the NOS has no plans to widen private sector involvement in the San Francisco Bay project beyond its current CRADA partner because it is unaware of any other firms with the capabilities the NOS requires on this project. Even so, I was told, if a capable contractor were found, it is not clear their involvement would be cost-effective. Is this indeed the case, and on what basis can this position be held? Does the NOS have cost analyses on particular private sector enterprises to back this belief?

A3. As noted in our response to question one, the focus of the San Francisco Bay Demonstration Project is on making NOS data more accessible, and available in formats that are more readily usable by non-NOAA users; and on pursuing proof of concept or prototype activities related to improving the suite of services available to mariners and coastal managers. No activity we are undertaking in the Bay under the Demonstration Project is without either direct or potential use to the private sector either as a direct supplier of a particular product or service or as a developer and supplier value-added products and nautical charting.

The primary activity involving the acquisition of data is a photogrammetry project to delineate a new mean high water shoreline. As you know, we discussed this activity in some detail in a letter to you dated January 16, 1996. In the letter, we noted that the activity contains significant research and development components designed to demonstrate new technologies and to develop new survey and control techniques NOS may make operational. For example, we will test three different techniques for developing highly accurate large-scale charts for maneuvering ships close to docks in limited visibility. Another test will evaluate methods for linking tidal datums to GPS heights. Yet another will assess our ability to create efficiencies by quickly comparing data generated during previous projects to new data and compiling only those areas that have changed. Finally, we will be developing the capability to acquire such photography coordinated with the actual stage of tide using telemetered tide gauges. These research and development activities make it appropriate for NOS to conduct this particular survey, a capability which does not yet exist in the private sector. Once these techniques have been developed, they will be made available to the private sector, as is standard NOAA policy.

Process for Involving Private Sector

Q4. Please describe the process, including relevant dates, by which the NOS could involve further contractors should capable cost-effective support be found?

A4. Please refer to the answer in question three.

Contracting in Promote Safe Navigation

Q5. How much of the \$89.9 million NOAA is requesting for promoting safe navigation will be spent on contracting services out, and in which projects will this take place?

A5. NOAA has launched a number of initiatives aimed at creating a new mode of operation in partnership with the private sector. Contracts, one form of partnership, are a rapidly growing portion of NOAA's efforts to promote safe navigation.

In FY 1994, contracts totaled approximately \$4.9 million, with the largest portion, \$2.6 million, in support of aeronautical charting. In FY 95, the contracting total grew to \$8.5 million. In FY 1996 and FY 1997, the totals are expected to exceed \$10.0 million. Contracts for hydrographic data are expected to total between \$4.5 million and \$5.0 million for each of those fiscal years.

Private Sector Involvement in Hydrographic Data

Q6. You mentioned in your written testimony that NOAA's goal is private sector collection of 50 percent of hydrographic data nationwide. Was this goal incorporated in the San Francisco Bay demonstration Project Plan? Was it achieved? If not, how close did NOAA get, including the dollar value?

A6. The San Francisco Bay Demonstration Project includes limited hydrographic survey work to respond to pressing needs for updated surveys the San Francisco marine community has identified. NOAA intends to meet this need by contracting with the private sector for data for all such surveys through its cooperative agreement with the U.S. Army Corps of Engineers.

Uniqueness of the National Ocean Service

Q7. The San Francisco Bay plan claims, "The three functions of data acquisition, data distribution, and modeling build on unique strengths in NOS, have a ready market, and are mostly unexploited by other organizations in the region." What makes NOS's capabilities unique? And if these areas are "mostly unexploited by other organizations", is this, in your opinion, sufficient reason for a federal agency to take the place of the private sector.

A7. The San Francisco Bay Demonstration Project was designed to allow changes as the National Ocean Service gained experience working with the local community to improve NOS project and services and their delivery in San Francisco Bay. As a result, we have revised the project plan several times. The text you cite was extracted from a now-dated version of the Plan and is no longer a part of it because it did not adequately capture the Project's goals, design, or implementation.

The text originally appeared, however, to reflect the fact that NOS, as the agency responsible for providing navigation products and services in support of maritime

commerce, maintains an archive of historical data of some use to non-NOAA users; is responsible for acquiring, either directly or through the private sector, contemporary data related to this mission; and is responsible for distributing these data to non-NOAA users in a useful format. In support of its various mandates related to maritime commerce and coastal management, NOS maintains expertise in modeling; modeling activities under the San Francisco Bay Demonstration Project will be based on work already completed by the U.S. Geological Survey.

The "ready market" the old text referred to referenced the fact that interviews with the local community revealed a considerable interest in contemporary and historical NOS data. And finally, the phrase "unexploited by other organizations" referred to the fact that by engaging in the activities outlined in the Project Plan, NOS would not be duplicating the efforts of other agencies or private sector entities.

Mapping Services Contracts

- Q8.** On what basis does NOAA believe that the provision in the Federal procurement law (40 U.S.C. 541 et. Seq.) and the following Federal Acquisition Regulation (FAR 36.601-4(a)(4)) provision:

Contracting officers should consider the following services to be "architect-engineering services" subject to the procedures of this subpart:

Professional surveying and mapping services of an architectural or engineering nature. Surveying is considered to be an architectural and engineering service and shall be procured pursuant to 36.601 from registered surveyors or architects or engineers. Mapping associated with the research, planning, development, design, construction or alteration of real property is considered to be an architectural or engineering service and is to be procured pursuant to 36.601.

do not apply to NOAA contracts for mapping services?

- A8.** NOAA does not believe that its hydrographic charting requirements meet the test of traditional surveying services under FAR § 36.601-4(a)(4).

First, NOAA's charting has traditionally not been required to be performed by surveyors, licensed or otherwise. Up until recently, NOAA's hydrographic charting has been performed exclusively by NOAA Corps Officers. Though NOAA Corps Officers generally have scientific or engineering degrees, NOAA Corps Officers performing hydrographic charting activities are neither required to be engineers nor licensed land surveyors. Officers performing hydrographic charting lacking an engineering or surveying degree receive "on the job" training and adhere to NOAA's prescribed procedures. In contracting for charting services, NOAA has carried over that tradition by not requiring that the work be performed by a licensed surveyor.

State law, which forms part of the statutory basis for Brooks Act applicability, does not uniformly encompass charting activities such as those engaged in by NOAA as part of traditional licensed survey activities.

Finally, to the extent that NOAA's charting activities are considered to be "mapping," they do not fall within the scope of mapping activities "associated with the research, planning, development, design, construction or alteration of real property."
